Pages 180-182—F. R. Appendix 3.—Substitute the following for rule 21 in F. R. Appendix 3 of the Bengal Financial Rules:—

21. Municipal rates and taxes—1. Incidence and payment of taxes on buildings other than residential.

(a) As a general rule, municipal rates and taxes on non-residential buildings paid by, or passed on to, a department, occupying the whole or part of the building is charged to contingencies of the department concerned. Where, however, the whole or part of the tax is paid by the Public Works Department or by any other department in administrative control of the building, the payments may be charged to the maintenance estimate of the buildings concerned.

(b) Taxes on non-residential buildings if paid by department nominated by Government in this behalf and not passed on to the occupying departments are charged to “47—Miscellaneous—Rents, Rates and Taxes.”

(c) If the building is in the occupation of a single department, the taxes should be paid by that department.

(d) If the building is in the occupation of more than one department, or if the taxes are payable in a lump sum for a number of buildings in a municipal area, the taxes may be paid, in the first instance, by any one department nominated in this behalf by Government. When one of the several departments occupying a building or buildings assessed to lump sum taxes is a commercial department, a portion of the taxes calculated *pro rata*, in proportion to the accommodation actually occupied by each of the several departments, should be passed on to the commercial department concerned. The balance thereafter remaining, if it relates to a single non-commercial department occupying the rest of the building, should be passed on to that department; if it relates to more than one non-commercial department, it should not be passed on.

Note 1.—Before payment is made by a department which is not in occupation of the entire building concerned or if payment cannot be delayed, as soon after payment as possible, an acceptance should be obtained from every department which is in occupation of any portion of it.

Note 2.—No municipal taxes are payable on public buildings situated in cantonments.

11. Incidence and payment of taxes on buildings occupied as residences.

(a) Taxes on residential buildings if payable by Government, whether the buildings are under the administrative control of the Public Works Department or any other department, are charged to the maintenance estimates of the buildings concerned.

Note.—In cases where the whole or any portion of the taxes, which, by local rule or custom, are ordinarily leviable from the tenant, is paid by a department other than the department in administrative control of the building, the charge may be treated as contingent expenditure of the paying department.

(b) Except as provided in the note below this rule, taxes which are, by local rule or custom, ordinarily leviable from tenants should be paid, in respect of the term of his occupancy, by the occupant of the building, even though he be entitled to rent-free quarters.

Note.—If in any case it has been decided by competent authority that the whole or any portion of the taxes should be borne by Government and not by the occupant of the building, the whole tax should be paid in the first instance by the department in administrative control of the building, and the portion, if any, payable by the occupant should then be recovered from him.

Decision of competent authority (local Government).

(i) Officers on a pay not exceeding Rs. 150 per mensem.—The local Government exempt from the payment of the occupier's share of municipal taxes (whether the amount is based upon the rental or on the actual amount of service rendered) or from the payment of municipal taxes which are payable by Government in respect of the residence not being in the nature of house or property tax all officers occupying Government residences whose pay does not exceed Rs. 150 per mensem.

N.B.—In these cases the occupier's taxes or taxes payable by Government in respect of the residence not being of the nature of house or property tax will be paid by the heads of offices concerned.

(ii) Officers other than those mentioned in (i) above who occupy Government residences within the Calcutta and Howrah municipal area.—The local Government reduce the amount of taxes based on the rental value of the house and payable by the occupier to an amount equivalent to 1 per cent. of the officer's pay. In these cases the occupier's taxes will be paid in the first instance by the head of the department or head of office concerned and the amount payable by the occupier under this rule will be recovered monthly from the occupier by deduction from his pay. The heads of departments or the heads of offices concerned will be responsible for seeing that these recoveries are regularly and correctly made.

N.B.—(1) Where the taxes are less than 1 per cent. of the officer's pay the actual taxes should be recovered.

N.B.—(2) The exemption in (ii) above does not apply to charges which are levied, not on the basis of rental, but as payment for a definite amount of service rendered, *e.g.*, quantity of water or electric current supplied. Charges of the latter nature must be borne by the tenant, unless specifically exempted therefrom by orders of Government.

(iii) All officers not included in (i) and (ii) above, who occupy Government residences, are liable to pay the entire amount of the municipal taxes payable by Government in respect of the residence not being of the nature of house or property taxes, *i.e.*, occupier's share of municipal taxes which were before the passing of the Bengal Municipal Act, 1932, payable by them to the municipalities under the Bengal Municipal Act of 1884. The detailed instructions for the payment of these taxes, consequent on the passing of the Bengal Municipal Act 1932, will be found in Appendix 3-A.

N.B.—(1) The local Government have from time to time exempted certain officers from the payment of the occupier's share of the taxes on residences which they are compelled to occupy solely for the proper performance of their duties. These exemptions will remain in force so long as these officers occupy the posts, or exactly similar posts to which the exemptions at present apply.

N.B.—(2) If the residence occupied by an officer falling under (ii) and (iii) above forms part of a building which is partly used as a residence and partly as an office and the like, and if the residential portion is not separately assessed to taxes, the total taxes payable by the occupier shall be apportioned between the portion occupied by the officer as residence and the portion occupied as office or the like, by the head of the department concerned in consultation with the Public Works Department and the Accountant-General, Bengal.

(iv) The following procedure will be followed by departments responsible for the recovery of taxes in (ii) above:—

(A) Each head of a department or head of an office will maintain a register in P.W.A. Form 49. The word "rents" in the heading will be changed to "taxes" and for the column showing "standard rent" will be substituted a column showing the occupier's share of taxes as assessed on the building.

(B) Recoveries will be made by monthly deductions from the pay bills of the officers concerned. The head of the department or the head of the office will, before the close of each month, send a statement in duplicate in P.W.A. Form 48 (the heading of which will be changed to "Statement of taxes recoverable from pay bills") to the Accountant-General, Bengal, or the Treasury Officer concerned, who will make necessary recoveries and return one copy of the statement duly completed.

N.B.—(1) Treasury Officers will recover the amounts specified without prior reference to the tenants.

N.B.—(2) If the pay of an officer falling under paragraph (ii) above be changed retrospectively the amount of taxes payable will also be changed retrospectively.

(c) Taxes which are, by local rule or custom, not leviable from tenants should be paid by the department in administrative control of the building, the portion representing taxes in the nature of property or house tax being treated as part of the cost of maintenance of such building and the rest, if any, being recovered from the occupants concerned.

III.—Method of payment.

Payment of taxes by Government departments to local funds may be paid in cash or by book transfer as may be decided by the principal auditor in consultation with the local Government.

IV. Certificate to accompany payment.

(a) Charges for municipal taxes in respect of buildings which are borne on the books of the Public Works Department should be supported by a certificate from the Public Works Divisional Officer concerned in which he states either that he accepts the assessment, or if he considers any assessment to be excessive, that all means have been or are being taken to secure its reduction. In respect of other Government buildings, the certificate should be given by the departmental officer concerned.

(b) If an assessment appears to be excessive, proceedings should be taken to obtain redress under the ordinary municipal law.

Recourse to the special provisions of Act XI of 1881 (the Municipal Taxation Act) may, however, be had when it has been found impossible to effect an amicable, though possibly arbitrary settlement with the local authority of a case in which the property to be assessed is, from its nature, such as not to admit of the application of ordinary principles in assessing the payment thereon of any particular tax. An example would be a case in which, whereas the assessment should be on the letting value, the property is of such a nature that it is difficult to conceive of its being let or impossible to form an estimate of the rent which would be obtained if Government offered to let it.

Page 183.—Insert the following as F. R. Appendix 3A:—

Instructions regarding payment of "occupier's share" of municipal taxes consequent on the passing of the Bengal Municipal Act, 1932, which provides that all taxes on holdings are payable by the owner of the holding.

The following instructions should be followed wherever the above Act applies, namely, in all municipal areas except the following:—

- (1) Calcutta.
- (2) Howrah.
- (3) Darjeeling district.
- (4) Chittagong Hill Tracts.

A. Non-residential buildings owned by Government.

These fall into two classes—

(1) those borne on the books of the Public Works Department, and

(2) those borne on the books of other departments.

In the former case the Public Works Department has paid the "owner's share" and the occupying department has paid the "occupier's share." This arrangement should be continued in consultation with the municipalities, who will, it is presumed, experience no difficulty in continuing to present two bills. In the latter case both the "owner's" and "occupier's" share have hitherto been paid by the occupying department. This arrangement will continue.

B. Residential buildings owned by Government.

These similarly fall into two classes—

(1) those borne on the books of the Public Works Department, and

(2) those borne on the books of other departments; but both are sub-divided into (a) those whose occupants are charged rent, and (b) those whose occupants are not charged rent.

I. Residences on the books of the Public Works Department whose occupants are charged rent.—The Public Works Department has hitherto paid the "owner's share",

and recovered rent from the occupant. It will henceforth pay both shares of the tax, and recover both rent and the "occupier's share" from the occupant.

II. Residences on the books of the Public Works Department whose occupants are not charged rent.—The Public Works Department has hitherto paid the "owner's share" and the administrative department in which the officer is serving has paid the "occupier's share" when the occupying Government servant has been a person exempted from the payment of the "occupier's share," e.g., a person on a pay not exceeding Rs. 150 per mensem. The Public Works Department will continue to pay the "owner's share", and the administrative department will in future pay the "occupier's share" in all cases, recovering the "occupier's share" from Government servants not exempted from liability to pay that tax, e.g., those whose pay exceeds Rs. 150 per mensem.

III. Residences on the books of other departments whose occupants are charged rent.—The administrative department has hitherto recovered the rent from the officer, paid the "owner's share" of the tax and paid the "occupier's share" of the tax in the case of exempted officers. It will in future pay the "owner's" and the "occupier's" share in all cases, recover rent as heretofore and recover the "occupier's share" in the case of non-exempted officers.

IV. Residences on the books of other departments whose occupants are not charged rent.—The administrative department has hitherto paid the "owner's share" of the tax and paid the "occupier's share" in the case of exempted officers. It will in future pay both shares of the tax in all cases and recover the "occupier's share" in the case of non-exempted officers.

C. Method of recovery.

The method of recovery of "occupier's share" of tax from non-exempted officers will be the same as the method of recovery of rent from rent-paying officers, namely, by monthly deductions from pay bills. The duty of the Executive Engineer in cases in which it is stated that the Public Works Department will recover the tax, and of the head of department or head of office in the other cases, will be as follows:—

(1) He will maintain a register in P. W. Account Form 49. The word "rent" in the heading will be changed to "taxes" and for the column showing standard rent will be substituted a column showing "occupier's share" of the municipal taxes assessed on the building.

(2) He will, before the close of each month, send to the Treasury Officer concerned a statement in duplicate in P. W. Account Form 48 (the heading of which will be changed to "Statement of taxes recoverable from pay bills") and also send an extract of the statement to each of the drawing officers concerned, who should deduct the requisite amount from the pay bills. The Treasury Officer will see that the recovery is made and will return one copy of the statement duly completed to the officer from whom he received it.

D. Buildings leased by Government.

In cases in which the "occupier's share" of the tax has hitherto been paid not by the landlord but by Government or the occupying Government servant, it should be arranged that the "occupier's share" is henceforth paid to the landlord by Government, the municipality billing the landlord for the tax; and in the case of residences the recovery of the tax from occupants who are not in the exempted category should be made in the manner provided above for Government-owned residences.

E. Classification of expenditure.

Payments on account of municipal taxes are to be debited as contingent charges of the paying department.

F. Credit of recoveries.

Recoveries made by the Public Works Department, *i.e.*, at the instance of Executive Engineers, should be credited to the head "XXX—Civil Works". Recoveries made by other departments, *i.e.*, at the instance of heads of administrative departments and heads of offices, should be credited to the corresponding receipts head of their budget.

J. B. KINDERSLEY,

Secy. to the Govt. of Bengal (offg.).

Agreement.

(Special adhesive stamp for rupee one.)

MEMORANDUM OF AGREEMENT made this 25th day of April one thousand nine hundred and thirty-six, between the Medical Education Society of Bengal, a Society registered under Act XXI of 1860, and having its registered office at 1, Belgachia Road, in the district of Twenty-four Pargunnahs (hereinafter called the Society) of the one part and the Secretary of State for India in Council (hereinafter called Secretary of State) of the other part.

WHEREAS for the purpose of the extension of the Carmichael Medical College and Hospitals, Belgachia, in Ward No. 30 of the Calcutta Municipality, the Society has applied to the Government of Bengal for the acquisition under the provisions of the Land Acquisition Act, I of 1894, of the piece or parcel of land containing 0.1118 of an acre or thereabout situate in Ward No. 30 of the Calcutta Municipality in the city of Calcutta and more particularly described in the Schedule hereto and delineated in the plan* hereunto annexed.

And whereas the said Government of Bengal, being satisfied on report of the Collector under section 5A, sub-section (2) of the said Act that the proposed acquisition is needed for the aforesaid purpose and that the said work is likely to prove useful to the public, has consented to acquire on behalf of the Society the piece or parcel of land hereinbefore described.

And whereas the said Government of Bengal has required the Society under the provisions of section 41 of the abovementioned Act to enter into an agreement with the Secretary of State in the manner hereinafter contained.

NOW THIS MEMORANDUM WITNESSETH that it is hereby agreed and declared as follows:—

1. On demand the Society shall and will pay to the said Government of Bengal all and every compensation in respect of the said land tendered, paid or awarded or to be tendered, paid or awarded by the Collector under the Land Acquisition Act, 1894, or by

the Court to which a reference under part III of the said Act may be made, or by the Court or Courts to which an appeal from the award of the said Court may be preferred and all costs, charges and expenses of the proceedings in the aforesaid Courts, or otherwise incidental to the proposed acquisition or payable in respect thereof under the provisions of the said Act.

2. On demand made by the said Collector, the obligations of the Society under the last preceding clause not being thereby limited, the Society shall and will deposit with the said Collector such sum or sums of money as in his discretion the said Collector may in anticipation estimate to be necessary for the purposes mentioned in the last preceding clause.

3. On payment by the Society of all demands under the foregoing first clause, or in the discretion of the said Government of Bengal (on deposit by the Society of all estimated amounts as provided in the second clause), but not before possession shall have been taken under the provisions of the abovementioned Act, the Secretary of State shall make over possession of the said land to the Society and shall execute and do all such acts and deeds as may be necessary and proper for effectually vesting the same in the Society.

4. The said land shall be held by the Society for the purposes of such works of the Society as is hereinbefore mentioned and without the sanction in writing of the said Government of Bengal first had and obtained for no other purpose whatsoever.

5. The said extension works shall be completed (and fully equipped in all respects ready for use) within three years from the date on which possession of the said land shall have been given to the Society.

6. Should the said works be not completed (and fully equipped in all respects ready for use) within the period stated in the last preceding clause or within such further period as in its discretion may be prescribed or allowed by the said Government of Bengal or should the said land at any time thereafter cease for a period of twelve consecutive months to be held and used or ceased to be required for the purpose or purposes provided for in the foregoing fourth clause, then and in any such case the said Government may summarily re-enter upon and take possession of the said land together with all buildings thereon, whether such buildings were erected before or after transfer of the land to the Society, and thereupon the interest of the Society in the said land and buildings shall absolutely cease and determine.

7. On taking such possession, the said Government may sell or otherwise deal with the said land and buildings as it may think proper.

(i) Should the said Government sell the land with the buildings, the said Government after deducting the expenses incurred in connection with the said taking of possession and with such sale shall pay the proceeds to the Society.

*Not printed but may be inspected in the office of the 2nd Land Acquisition Collector at No. 5, Bankshall Street, Calcutta.

(ii) Should the said Government decide not to sell the land and buildings, the said Government shall retain the said land and buildings thereon in which case the Secretary of State shall repay to the Society the market value as on the day of re-entry of all the buildings erected by the Society and all sums received from the Society in respect of all and every compensation as provided in the foregoing first clause (less the statutory allowance of fifteen per cent. and less any amount received on account of trees and buildings which are not in existence at the time of resumption), but will repay any sums paid and received on account of costs, charges and expenses.

(iii) Should the said Government decide to sell the buildings only, upon such sale, the Secretary of State, after deducting the expenses of taking possession and selling, pay the balance of the proceeds of sale to the Society together with the sum received from the Society in respect of the compensation for the land (less the statutory allowance of fifteen per cent. and less any amount received from the Society on account of trees and buildings which are not in existence at the time of resumption), but will not repay any sums paid and received on account of costs, charges and expenses.

8. The public shall be entitled to use the Hospitals and the College on the following terms, viz., that they shall have (i) free admission into the out-patients' department during the hours specified for the purpose and (ii) admission into the Hospital and the College subject to the rules of the Society.

9. Rules for the guidance of students seeking admission into the Medical College, Calcutta.

1. Two classes of students are admitted to the college:—

(1) *Civil pupils' class*.—Admission to this class is restricted to students, male or female, who were born within or whose parents are domiciled within the territorial jurisdiction of the Calcutta University. Three students are also eligible for admission from the Dacca University area and three from the Dacca Intermediate Board. Students from other provinces and from Indian States for whom places have been reserved are also eligible for admission to the college.

Only students who intend to take the M. B. examination of the Calcutta University are admitted to this class.

(2) *Military pupils' class*.—Only European or Anglo-Indian students are admitted to this class (see separate prospectus for military pupils whose admission is regulated by the Director-General, Indian Medical Service).

2. The minimum preliminary qualification for admission is the First Class Pass certificate of the I. Sc. examination of the Calcutta University with Physics, Chemistry and Mathematics or an examination recognised as equivalent to it. This rule may be relaxed in favour of Muhammadan students and such candidates having passed the said examination in the second division may be admitted, provided they are otherwise considered suitable, to make up the number allotted for the Muhammadan students. In assessing the claims of those eligible for admission special weight will be attached to proficiency in English.

3. (a) Female students qualified under rules 1 and 2 will be admitted to the college, provided there is a vacancy in the Swarnamoyee Hostel in which all female students must reside. For special reasons to be recorded in writing, the Principal may allow any female student to reside outside this Hostel.

(b) Female students studying in the college but belonging to provinces other than Bengal and not domiciled in Bengal will pay rents for accommodation in the Swarnamoyee Hostel.

Principal, Medical College, Calcutta.

Calcutta University.

Senate House, the 30th April 1936.

Submission of Text-books for Matriculation Examination under Revised Regulations.

Enquiries are being received on various points arising out of the University's notification, dated the 4th April 1936, on the subject of submission of text-books for the Matriculation Examination under the New Regulations. The following decisions of the University, it is expected, will clarify the situation and enable intending authors to submit their books to the University with the least inconvenience either to themselves or to the University. It may be noted here that although the University's notification was issued about a month ago, the new syllabuses have been before the public since August 1935; they were published in the *Calcutta Gazette* on 1st August 1935.

The University is anxious to hold the first Matriculation Examination under the New Regulations in 1940. Many of the subjects, it appears, are taught in schools in accordance with the requirements of the University in classes IX and X. In the lower classes the same subjects are taught on a comparatively lower standard and text-books for those classes are not as a rule prescribed or recommended by the University. These subjects will therefore be taught in schools in classes IX and X in 1938 and 1939, respectively, for the Matriculation Examination to be held in 1940. There are, however, two subjects which it is felt, should be taught from at least class VIII; they are Mathematics and Elementary Scientific Knowledge. With regard to these two subjects, books should be approved by the University before the end of this year. The dates of submission already prescribed and announced will therefore hold good for Mathematics (barring Algebra written in Bengali) and Elementary Scientific Knowledge. It may be noted here that Elementary Scientific Knowledge will remain an optional subject for three years beginning from the year in which the first Matriculation Examination will be held. Accordingly, it is not expected that a large number of schools will find it necessary or possible to take up the teaching of this subject immediately. But there will be some schools which will arrange for such teaching and every effort should be made to prescribe books on this subject before the end of this year.

Books on Public Administration in India should be made up to date and include the new constitution. This will be in addition to what is contained in the syllabus.

As regards all other subjects, the last date for submission of books is extended to 31st March 1937. Books on Mathematics (barring Algebra written in Bengali) and on Elementary Scientific Knowledge, if received between 1st November 1936 and 31st March 1937 will be considered for the examination to be held in 1941.

The question of the University prescribing books which will be inconsistent with the list as already approved by the Education Department till December 1937 will not seriously arise. Elementary Scientific Knowledge is a new subject and no books according to the syllabus as prescribed by the University are now to be found on the list. As regards Mathematics, individual authors, who desire that their books already appearing in the departmental list should also be included in the University's list may submit their books to the University for such inclusion and the University will give the matter its full consideration. This is subject to what has been stated above regarding Algebra written in Bengali. The departmental list however does not include any book on Algebra written in Bengali.

The general indication of the number of pages which books on the more important subjects are likely to cover as also their approximate prices is given below. Numerous enquiries have been received on this point and this information will be helpful:—

Name of the subject.	Approximate number of pages.	Approximate price.
Elementary Scientific Knowledge.	200 to 250	Rs. 1-12 to Rs. 2.
Geography ..	150 to 200	Rs. 1-8.
Hygiene ..	200	Rs. 1-8.
History	{ India 300 } { England 200 }	Total Rs. 2.

Books are to be printed in types not smaller than small pica on unglazed paper in double crown 16mo. forms. The quality of paper should be at least 32 lbs. for books on mathematics and Scientific subjects and 28 lbs. for books on other subjects. A pamphlet containing the instructions of the University regarding the mode of spelling of Bengali words will be available at 2 annas per copy. These instructions should be followed by intending authors. Regarding the Paribhasik terms, a pamphlet containing mathematical terms will be available at 4 annas per copy. Arrangements have been made for enabling intending authors to copy out at the University Paribhasik terms in other subjects with the previous permission of the Registrar between the hours of 1 p.m. and 5 p.m. on any day excepting a Sunday or a holiday.

The University trusts that the arrangements outlined above will be found helpful and convenient and the parties concerned will co-operate with the University in introducing the New Regulations in a manner which will be considered generally satisfactory.

“230A. (1) Where any part of the property of a company which is being wound up consists of land of any tenure burdened with onerous covenants, of shares or stock in companies, of unprofitable contracts or of any other property that is unsaleable, or not readily saleable, by reason of its binding the possessor thereof to the performance of any onerous act, or to the payment of any sum of money, the liquidator of the company, notwithstanding that he had endeavoured to sell or has taken possession of the property, or exercised any act of ownership in relation thereto, may, with the leave of the Court and subject to the provisions of this section, by writing signed by him, at any time within twelve months after the commencement of the winding up or such extended period as may be allowed by the Court, disclaim the property:

Provided that, where any such property has not come to the knowledge of the liquidator within one month after the commencement of the winding up, the power under this section of disclaiming the property may be exercised at any time within twelve months after he has become aware thereof or such extended period as may be allowed by the Court.

(2) The disclaimer shall operate to determine, as from the date of disclaimer, the rights, interest and liabilities of the company, and the property of the company, in or in respect of the property disclaimed, but shall not, except so far as is necessary for the purpose of releasing the company and the property of the company from liability, affect the rights or liabilities of any other person.

(3) The Court, before or on granting leave to disclaim, may require such notices to be given to persons interested, and impose such terms as a condition of granting leave, and make such other order in the matter as the Court thinks just.

(4) The liquidator shall not be entitled to disclaim any property under this section in any case where an application in writing has been made to him by any persons interested in the property requiring him to decide whether he will or will not disclaim, and the liquidator has not, within a period of twenty-eight days after the receipt of the application or such further period as may be allowed by the Court, given notice to the applicant that he intends to apply to the Court for leave to disclaim, and in the case of a contract, if the liquidator, after such an application as aforesaid, does not within the said period or further period disclaim the contract, the company shall be deemed to have adopted it.

(5) The Court may, on the application of any person who is, as against the liquidator, entitled to the benefit or subject to the burden of a contract made with the company, make an order rescinding the contract on such terms as to payment by or to either party of damages for the non-performance of the contract, or otherwise as the Court thinks just, and any damages payable under the order to any such person may be proved by him as a debt in the winding up.

(6) The Court may, on an application by any person who either claims any interest in any disclaimed property or is under any liability not discharged by this Act in respect of any disclaimed property and on hearing any such persons as it thinks fit, make an order for the vesting of the property in or the delivery of the property to any persons entitled thereto, or to whom it may seem just that the property should be delivered by

way of compensation for such liability as aforesaid, or a trustee for him, and on such terms as the Court thinks just, and on any such vesting order being made, the property comprised therein shall vest accordingly in the person therein named in that behalf without any conveyance or assignment for the purpose:

Provided that, where the property disclaimed is of a leasehold nature, the Court shall not make a vesting order in favour of any person claiming under the company whether as under-lessee or as mortgagee by demise, including a chargee by way of legal mortgage, except upon the terms of making that person—

- (a) subject to the same liabilities and obligations as those to which the company was subject under the lease in respect of the property at the commencement of the winding up; or
- (b) if the Court thinks fit, subject only to the same liabilities and obligations as if the lease had been assigned to that person at that date;

and in either event (if the case so requires) as if the lease had comprised only the property comprised in the vesting order, and any mortgagee or under-lessee declining to accept a vesting order upon such terms shall be excluded from all interest in and security upon the property, and, if there is no person claiming under the company who is willing to accept an order upon such terms, the Court shall have power to vest the estate and interest of the company in the property in any person liable, either personally or in a representative character, and either alone or jointly with the company, to perform the lessee's covenants in the lease, freed and discharged from all estates, incumbrances and interests created therein by the company.

(7) Any person injured by the operation of a disclaimer under this section shall be deemed to be a creditor of the company to the amount of the injury, and may accordingly prove the amount as a debt in the winding up."

STATEMENT OF OBJECTS AND REASONS.

For some considerable time Government has had under consideration the overhaul of the law relating to companies.

2. Substantial material has accumulated in the form of communications and suggestions from Local Governments, public bodies and individuals, supplemented by publications in the press, indicating unanimity of opinion that the Indian Companies Act requires fairly extensive changes. The opinions received disclose a demand for power to deal with mushroom and fraudulent companies, for changes in the provisions relating to the issue and contents of prospectuses, for increased disclosure to shareholders of the financial position of companies and for increased rights to shareholders in connection with the management of companies, for modification of the present law applicable to managing agents, for changes in the provisions applicable to winding up, for special provisions to govern banking companies and for numerous other improvements.

3. The Indian Companies Act, 1913, was based on the English Companies Consolidation Act of 1908 and followed generally the provisions of that Act. Its revision in order to overtake subsequent developments in the law is overdue.

4. The English Act of 1908 was examined by a committee presided over by Lord Wrenbury in 1918, and again by a committee presided over by Mr. Greene, K.C., in 1926. The latter committee made extensive recommendations many of which were subsequently incorporated with or without modification in the Companies Consolidation Act, 1929. The guidance afforded by that Act is now available in the task of revising the company law of British India.

5. In September, 1934, the Government of India placed a lawyer with experience in the administration of company law on special duty to examine the material collected and to make proposals for the amendment of the Indian law. Those proposals were further discussed by a small committee of business experts specially convened for the purpose. Out of these proposals and discussions there have crystallized the amendments now proposed.

6. The revision of the law in England took the form of a consolidating Act which completely replaced the Act of 1908. This course has not been followed here. The arrangement adopted in the new English Act has attracted unfavourable criticism to an extent which does not encourage its adoption, and there are manifest advantages in retaining the form of the existing Indian Act with the administration of which the Courts are now familiar, even though the additions to it by this Bill are extensive.

7. In the amendments proposed, the lines followed in the overhaul of the English law have in accordance with the policy followed in the past been adopted in the amendments now proposed where the problems dealt with are problems common to India and England. India has however problems peculiar to itself, for example, those connected with the managing agency system.

8. The special provisions relating to banking companies have been included because there is no immediate prospect of legislation dealing solely with this subject being undertaken. The recommendations of the Central Banking Enquiry Committee have been carefully considered in drafting these provisions.

NEW DELHI,

The 4th March, 1936.

NOTES ON CLAUSES.

Clause 2.—The introduction of certain new terms in the Act has rendered further definitions necessary. The revised definition of “private company” follows the definition in section 26 of the English Act.

Clause 3 provides the sanction for enforcing observance of the provisions of section 4.

Clause 4 applies to a memorandum the requirements laid down by section 9 of the English Act for articles.

Clause 5.—The alteration made is suggested by the wording of section 17 of the English Act.

Clause 6.—In certain decisions it has been doubted whether in the absence of express provision in the memorandum a company is competent to alter its objects so as to enable it to perform the acts here referred to. Section 5 of the English Act makes express provision for this purpose and has been adopted by this clause.

Clause 7.—It is desired to make generally applicable certain provisions usually made by the articles of properly managed companies as to polls, absence of restrictions on form of proxies, retirement of directors by rotation, inspection of accounts, details shown in profit and loss accounts and the giving of notice to members. This clause makes the adoption of the model regulations on this subject contained in Table A compulsory.

Clause 8.—The amendment limits, on the lines of section 22 of the English Act, the liability of a member of a company under alterations made in the memorandum after he has become a member of the company.

Clause 9 follows section 24 of the English Act in providing that the memorandum should show all changes made therein.

Clause 10 follows section 18 of the English Act in limiting the exemptions now enjoyed by certain associations formed not for profit.

Clause 11 follows section 96 of the English Act in requiring an index of the names of members of a company in certain cases.

Clause 12.—Sub-section (1) of section 32 does not clearly show when the first list of members is to be prepared if a company is incorporated towards the end of a year. The words “first or only ordinary general meeting” have also given rise to confusion. The amendment is designed to remove this uncertainty and confusion.

Clause 13.—The Act does not lay down the procedure for the transfer of shares and this is generally provided for in the articles of the company. Undue restrictions upon transfers and undue delay in registering transfers are not uncommon. The section now introduced while leaving a discretion with the directors to refuse transfer requires for a transfer application either by the transferor or the transferee, notice by the transferee in the case of an application by the transferor, the use of the proper instrument of transfer required by the company in the case of an application by the transferee, and notice within a limited time to a proposed transferee. It also prescribes the time limit within which an objection by a transferee may be made or a refusal to register a transfer must be communicated.

Clause 14.—Under the English law it is a misdemeanour on the part of directors knowingly to allot shares to an infant, while shares held by an infant by an order of Court and shares held by a lunatic can only be transferred pursuant to an order in lunacy. The proposed new section aims at preventing such person from coming into possession of shares.

Clause 15 follows the English Act, section 98, sub-section (2), in laying down a time limit within which a requirement by a member must be complied with.

Clause 16 provides a time limit for a rectification of the register of members ordered by the Court.

Clause 17.—The issue of bearer share warrants is not compatible with the provision contained in new section 2(1)(13)(a). Section 43 should not, therefore, apply to private companies.

Clause 18.—The Act at present allows alteration of capital to be effected by the directors and requires only an alteration involving sub-division of shares to be made in general meeting. One consequence is that the registrar's office has no record of alterations of capital made by directors. This clause brings the law into accord with section 50 of the English Act.

Clauses 19 and 20.—The utilisation of the funds of a company in the purchase of its own shares has the result of reducing its capital and is prohibited by sub-section (1) of section 55. The prohibition is circumvented in some cases by advancing money out of the company's funds to nominees who acquire the shares. The proposed section 54A follows section 45 of the English Act in forbidding this subterfuge. Sub-section (1) of existing section 55 is transferred to the new section now introduced.

Clause 21.—The new section introduced reproduces section 61 of the English Act.

Clause 22.—The existing section of the Act does not lay down any time within which the registered office is to be set up or notice of its situation or any change of its situation is to be given. This clause adopts section 92 of the English Act.

Clause 23.—Compare section 112 of the English Act and clause 12 of this Bill.

Clause 24.—The new section follows generally the lines of section 113 of the English Act. It extends the obligation to hold a statutory general meeting to all companies having a share capital. "Ten days" has been substituted for "seven days" as the period for which the report is to be in the hands of members under sub-section (2), and further requirements have been added by clauses (f) and (g) of sub-section (3). Provision has also been introduced authorising certification of the report by the chairman of the directors.

Clause 25.—Compare section 114, sub-section (1), of the English Act.

Clause 26.—The new section is based on section 115 of the English Act, but whereas that section allows of its provisions being overridden by the provisions made in the articles of the company, the section here makes certain provisions such as those governing the notice to be given for special resolution, the manner of service of notices, the number of members entitled to demand a poll and the form of proxy instruments incapable of variation.

Clause 27 amends section 81 of the Act on the lines of section 117 of the English Act, that is to say, it abolishes the necessity for the confirmation of a special resolution by a second general meeting, but requires 21 days' notice to be given of the meeting at which the special resolution is passed.

Clause 28.—The object of this amendment is to secure the correctness of the records preserved in the registrar's office.

Clause 29 follows section 121 of the English Act.

Clause 30 increases the minimum number of directors of a company.

Clause 31.—This amendment is intended to secure greater independence to the directors by limiting the number of nominated or *ex-officio* directors.

Clause 32.—The first amendment slightly widens the application of the section, the second makes it applicable to companies which have no separate articles of association of their own but adopt Table A; the third renders it inapplicable to companies which began as private companies.

Clause 33.—The clause introduces certain new sections for the control of directors. Section 86A reproduces section 142 of the English Act. Section 86B follows section 151 of the English Act in controlling the practice of directors assigning their responsibilities. Section 86C follows section 152 of the English Act. Section 86D prohibits or limits the making of loans to directors and provides that any loans made shall be disclosed in the balance-sheet, the form of which as laid down in the Third Schedule has been correspondingly amended by clause 100. Section 86E prevents directors from holding offices of profit under the company while section 86F disqualifies them from acting as trustees for debenture holders. Section 86G follows section 148 of the English Act in requiring directors' remuneration to be disclosed. Section 86H and section 86I include in the Act provision for removal of or vacation of office by directors instead of leaving these matters to be provided for in the articles by some such regulations as regulation 86 and regulation 77 of Table A.

Clause 34.—The substituted section 87 follows section 144 of the English Act. It provides that the register of directors and managers shall be kept corrected and shall be open to inspection.

Clause 35.—This clause introduces a series of new sections dealing with managing agents. Section 87A limits the terms for which they may be appointed and may continue to act without re-appointment. Section 87B provides for their removal, controls the transfer of office by them, prohibits assignment of their remuneration and gives the company certain powers of control over them. Section 87C lays down the method by which the remuneration of managing agents shall be fixed in companies other than insurance companies. Section 87D makes provision in respect of managing agents, similar to that made by new section 86D in respect of directors, for controlling loans by the company to its managing agents. Section 87E controls the making of loans between companies under the same management. Sections 87F, 87G and 87H introduce further provisions for control of managing agents.

Clause 36 inserts a time limit within which the information required by section 91C is to be given to members of a company.

Clause 37 provides that copies of contracts by agents of the company in which the company is an undisclosed principal shall be sent to the directors and auditors in advance.

Clause 38 provides for the disclosure in the prospectus of a company of certain details, indicated in the amendments contained in the clause, which have not hitherto been required to be so disclosed.

Clause 39 inserts a penalty for the issue of a prospectus which fails to comply with the provisions of section 93.

Clause 40 introduces section 38 of the English Act by which a document containing an offer of shares is to be deemed a prospectus.

Clause 41 introduces the provisions of section 39 of the English Act and is aimed at discouraging flotation of companies with insufficient capital.

Clause 42.—The amendment excludes forfeited shares subsequently re-issued from the purview of the section.

Clause 43.—The amendment is consequential.

Clause 44 inserts section 47 and section 46 of the English Act.

Clause 45.—Under the existing provisions of the Act a charge or mortgage created over movable property of the company other than book debts or the uncalled share capital need not be registered. The first amendment requires such charges or mortgages to be registered with certain qualifications. The second amendment is designed to affect transferees with notice as from the date of registration.

Clause 46 inserts section 81 of the English Act.

Clause 47 provides for the registration of charges when modified.

Clause 48 inserts the provisions of section 308 of the English Act.

Clauses 49, 50 and 51.—Section 121 of the Act as it stands empowers the registrar on proof of satisfaction of a mortgage or charge to record the satisfaction in the register. It is not, however, obligatory on a company or the mortgagee to have such satisfaction recorded, and the records of the registrar may accordingly remain incomplete. The amendments made by these clauses remedy this defect.

Clause 52.—It has been doubted whether the provisions of section 123 apply to floating charges in view of the fact that such charges do not affect property until the charges are crystallized. The amendment makes the intention of the section clear.

Clause 53 substitutes section 122 of the English Act for the existing section.

Clause 54 introduces the substance of sub-section (1) of section 123 of the English Act and makes the section applicable to all companies.

Clause 55 inserts the provisions contained in sub-section (2) of section 123 of the English Act regarding the report by the directors.

Clause 56 introduces a provision requiring disclosure in the profit and loss account, now made compulsory by clause 54, of certain information of importance to shareholders.

Clause 57 adopts the provisions of section 126 of the English Act.

Clause 58 applies the penalty provided by sub-section (4) of section 131 of the existing Act to defaults under that section and sections 132 and 132A.

Clause 59.—The amendment is consequential.

Clause 60.—The first amendment provides for intervention by the Court to secure production of documents for the information of the registrar; the second extends the powers of the registrar and makes the section applicable to documents required by a liquidator.

Clause 61 introduces provisions based on section 136 of the English Act.

Clause 62 provides *inter alia* for charging the expenses of an investigation undertaken in consequence of a report by the registrar to the company itself.

Clause 63 supplements the duties of auditors and gives them power of attending meetings to explain the accounts.

Clause 64 gives the trustees for debenture-holders the right to receive and inspect the balance-sheets and auditors' reports.

Clause 65 allows stay of suits while a compromise or arrangement between a company and its creditors is pending.

Clause 66 inserts sections 154 and 155 of the English Act dealing with arrangements and reconstructions.

Clause 67 substitutes a section in the terms of section 27 of the English Act for the existing section.

Clause 68 amends the provisions relating to the manner of serving on a company a demand for payment of debts.

Clause 69 gives power to the registrar to apply for the winding up of a company and defines the circumstances in which the power may be exercised.

Clause 70 provides that notice of a Court's order for winding up shall be sent to the official receiver.

Clause 71.—Under the existing law it is only after a winding up order has been made that proceedings against a company are stayed. The amendment follows the English Act in providing that the appointment of a provisional liquidator should operate as a stay.

Clause 72.—Inconvenience has been experienced through the office of official liquidator remaining vacant after a winding up order has been made. This clause is designed to secure that a public official shall automatically become the liquidator until some other person is appointed by the Court and can undertake the work.

Clause 73.—Under section 172, as it stands, the duty of filing with the registrar a copy of the winding up order is laid on the company. It is now laid on the petitioner.

Clauses 74, 75 and 77 are consequential on clause 71.

Clause 76 inserts sections 181 and 182 of the English Act.

Clause 78.—The new section 178A is based on section 199 of the English Act.

Clause 79.—The sub-sections added to section 182 reproduce section 195 of the English Act.

Clauses 80 and 81.—The amendments are consequential.

Clause 82 substitutes for 13 sections of the existing Act dealing with the winding up of companies the provisions of sections 230 to 255 of the English Act. New section 215E, corresponding to section 253 of the English Act, has however been slightly expanded.

Clause 83.—It is equitable that compensation payable under the Workmen's Compensation Act should not be treated as an ordinary debt provable in the winding up but should have priority. This view is taken in England. The expenses of an investigation held in pursuance of clause (iv) of section 138 are now charged to the company, *vide* clause 62.

Clause 84 inserts section 267 of the English Act which gives a liquidator power, corresponding to that of a trustee in bankruptcy, to disclaim land burdened with covenants, unprofitable contracts and property which is unsaleable.

Clause 85.—The existing section has been construed as not covering sales held after the winding up. The amendment is designed to forbid such sale.

Clause 86.—Sub-section (3) of the existing section by applying to an application under the section the limitation imposed on a suit allows delinquent directors in many cases to evade their civil liabilities. The amendment allows three years for the making of an application dating from the first appointment of a liquidator.

Clause 87 substitutes the more adequate provisions of section 277 of the English Act for existing section 237.

Clause 88 follows section 271 of the English Act in providing for the punishment of offences antecedent to or in the course of a winding up.

Clause 89 provides that the interim report of the liquidator shall be submitted to the Court or the registrar, as the case may be, but that a copy should in any case be given to the registrar and defines the times when the report shall be made. The form, and the particulars to be contained in these statements are prescribed by the High Courts, which have followed rules 193 to 195 of the English Companies (Winding Up) Rules, and have prescribed a form similar to the English Form 92 drawn up under those Rules.

Clause 90 inserts a section based on section 194 of the English Act requiring the liquidator to lodge moneys received during a winding up in the Imperial Bank and prohibiting him from paying any such moneys into his private accounts.

Clause 91 rectifies an omission in the rule making powers of High Courts.

Clause 92 reproduces section 135 of the English Act dealing with the enforcement of the duty of a company to submit returns and documents to the registrar.

Clause 93 inserts the provisions contained in section 338(2) of the English Act providing for the winding up of companies incorporated outside British India.

Clause 94 inserts the provisions of section 347 of the English Act and requires the balance-sheets of companies incorporated outside British India to comply with the same requirements as those of companies registered in British India.

Clause 95.—New sections 277A and 277B reproduce sections 354 and 355 of the English Act and regulate the issue of prospectuses on behalf of companies incorporated outside British India. Sections 277C and 277D follow section 90 of the English Act in making applicable to such companies the provisions of the Act which relate to registration of charges and registration of the appointment of a receiver.

Clause 96 inserts a new Part containing special provisions applicable to banking companies. Section 277E defines what a "banking company" is. Section 277F restricts the activities of such companies to ordinary banking transactions. Section 277G forbids for the future the employment of managing agents. Section 277H ensures adequate working capital before business is commenced. Sections 277I and 277J require, respectively, a reserve fund and an adequate cash reserved to be maintained. Section 277K gives effect to the recommendations of the Central Banking Enquiry Committee that provision should be made for a moratorium to save from liquidation a banking company in temporary difficulties.

Clause 97 introduces a new section penalising misapplication of the property of a company by an officer or employee and a section designed to prevent misuse of securities lodged with a company by its employees under their contracts of service, and to safeguard provident funds.

Clause 98 makes amendments in certain of the model regulations in Table A which under the amendment made by clause 7 must be adopted by all companies.

Clause 99 substitutes for the existing form of a statement in lieu of prospectus the form now contained in the English Act.

Clause 100 incorporates in the form of balance-sheet the additional particulars which are considered necessary in order that the balance-sheet shall fully disclose the position of the company's affairs.

The following Bill* was introduced in the Legislative Assembly on the 8th April, 1936:—

L. A. BILL No. 11 of 1936.

A Bill further to amend the Indian Tariff Act, 1934, for certain purposes.

WHEREAS it is expedient further to amend the Indian Tariff Act, 1934, for the purposes hereinafter appearing; **XXXII of 1934.**
It is hereby enacted as follows:—

Short title.

1. This Act may be called the Indian Tariff (Second Amendment) Act, 1936.

Amendment of First Schedule, Act XXXII of 1934.

2. In the First Schedule to the Indian Tariff Act, **XXXII of 1934.**

(a) for Items Nos. 10 (1) and 10 (2), the following items shall be substituted, namely:—

" 10 (1)	WHEAT	Protective	Re. 1 per cwt.	March 31st, 1937.
10 (2)	BROKEN RICE.	Protective	Twelve annas per Indian maund of 82 2/7 lbs. avoirdupois weight.	March 31st, 1937."

and

(b) for Item No. 11 (1) the following item shall be substituted, namely:—

" 11 (1)	WHEAT FLOUR.	Protective	Re. 1 per cwt.	March 31st, 1937."
----------	--------------	------------	----------------	----	----	--------------------

It is hereby declared that it is expedient in the public interest that the provisions of clause 2 of this Bill shall have immediate effect under the Provisional Collection of Taxes Act, 1931. **XVI of 1931.**

STATEMENT OF OBJECTS AND REASONS.

Since the passing of the Indian Tariff (Amendment) Act, 1935, the Government of India have maintained a careful watch on the position of rice and wheat in India and other world markets. They are satisfied that in the interests of the Indian rice grower the existing duty of twelve annas per maund on broken rice should continue for a further period of one year. As regards wheat, they have come to the conclusion that the continuance of the operation of the import duty for another year is essential in the interests of the Indian wheat grower. The statistical position, however, has shown further improvement and it is consequently proposed to continue the import duty on wheat and wheat flour at a reduced rate of Re. 1 per cwt. for another year.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill* was introduced in the Legislative Assembly on the 8th April, 1936:—

L. A. BILL No. 12 OF 1936.

A Bill further to extend the operation of the Salt (Additional Import Duty) Act, 1931.

WHEREAS it is expedient further to extend the operation of the Salt (Additional Import Duty) Act, 1931; It is hereby enacted as follows:—

XIV of
1931.

Short title.

1. This Act may be called the Salt Additional Import Duty (Extending) Act, 1936.

Amendment of
section 1, Act
XIV of 1931.

2. In sub-section (3) of section 1 of the Salt (Additional Import Duty) Act, 1931 (hereinafter referred to as the said Act), for the figures "1936" the figures 1931. "1938" shall be substituted.

Amendment of
section 3, Act
XIV of 1931.

3. In sub-section (1) of section 3 of the said Act, for the word "two" the word "one" shall be substituted.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to continue the Salt (Additional Import Duty) Act, 1931, for two more years, subject to a reduction of the rate of duty to 1½ annas.

2. This reduction is a continuation of the process which was begun in 1933, when the rate of duty was lowered from 4½ annas to 2½ annas. It is considered that this step can be taken without detriment to the indigenous producers of salt particularly in the absence—temporary though it may possibly be—of competition from Italian sources.

3. The Indian salt industry has complained that it has been unduly handicapped by the uncertainty created by the practice, hitherto followed, of renewing the Act only on a year to year basis. On this occasion, it is proposed to meet this complaint to some extent by making the reduced duty last for at any rate two years instead of the usual one.

4. It is not proposed that the buying-in price should be further reduced at present. There is reason to believe that the competition between Indian sources is now keen enough to provide reasonable security against the exaction of unduly high profits from the consumer particularly in view of the reduction of duty now proposed; while, on the other hand, recent experience has shown that there may be quite legitimate advances of price in Calcutta owing to changes in freight rates.

(a) prohibit the extraction or reduction of pillars in any part of the mine if, in his opinion, such operation is likely to cause the crushing of pillars or the premature collapse of any part of the workings or otherwise endanger the mine, or if, in his opinion, adequate provision against the outbreak of fire has not been made by providing for the sealing off and isolation of the part of the mine in which such operation is contemplated and for restricting the area that might be affected by a fire; or

(b) limit to such dimensions as he considers reasonable the galleries that may be driven in the mine;

and the provisions of sub-sections (3), (4), (5) and (6) shall apply to an order made under this sub-section as they apply to an order made under sub-section (2).”

sub-sections (1), (2) and (3) of section

clusive of section 29 may be made without
previous publication and without previous
reference to Mining Boards, if the Governor-
General in Council is satisfied that for the
prevention of apprehended danger or the
speedy remedy of conditions likely to cause
danger it is necessary in making such regula-
tions to dispense with the delay that would
result from such publication and reference:

Provided that any regulations so made shall not
remain in force for more than two years from
the making thereof.”

STATEMENT OF OBJECTS AND REASONS.

Recent events and inquiries have indicated the urgent need of taking further
measures to ensure safety in coal mines, more particularly in respect of danger from
fires. The proposals in the Bill which are explained in the Notes on Clauses are
designed to secure this end.

F. NOYCE.

NEW DELHI;
The 31st March, 1936.

NOTES ON CLAUSES.

Clause 2 seeks to enlarge the powers at present vested in the Inspector to issue orders applicable to individual mines where danger is apprehended. Any orders made under this section by an Inspector will be subject to appeal to the Chief Inspector and in all cases the right of appeal to a Committee is provided. The powers are granted temporarily and can be limited to particular areas. It is intended that the whole question of danger from fires in mines should be subjected to expert examination before the period of two years expires.

Clause 3 seeks to enlarge in certain respects the power, vested in the Governor General in Council, to make regulations for safety purposes.

Clause 4 is designed to secure that central rescue stations will be established where they are required.

Clause 5 is designed to enable safety regulations to be made promptly when necessary. Under the present law, not only is previous publication necessary in all cases, but such publication can only be made after the draft has been referred to all the Mining Boards concerned and they have had the opportunity of expressing their views. It is proposed that regulations so made shall be of a temporary character. They will normally be superseded by regulations made in the ordinary way.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 23rd March, 1936:—

L. A. BILL No. 10 OF 1936.

A Bill further to amend the Indian Railways Act, 1890, for certain purposes.

WHEREAS it is expedient further to amend the Indian Railways Act, 1890, for the purposes hereinafter appearing; It is hereby enacted as follows:— IX of 1890.

Short title.

1. This Act may be called the Indian Railways (Amendment) Act, 1936.

Amendment of section 68, Act IX of 1890.

2. Section 68 of the Indian Railways Act, 1890 (hereinafter referred to as the said Act), shall be re-numbered as sub-section (1) of that section and to the section as so re-numbered the following sub-section shall be added, namely:— IX of 1890.

“(2) A railway servant when granting the permission referred to in sub-section (1) may, if empowered in this behalf by the railway administration, grant to the passenger a certificate that the passenger has been permitted to travel in such carriage upon condition that he subsequently pays the fare payable for the distance to be travelled.”

Substitution of new section for section 112, Act IX of 1890.

Travelling or attempting to travel without proper pass or ticket.

3. For section 112 of the said Act the following section shall be substituted, namely:—

“112. (1) If a person enters in contravention of section 68 any carriage on a railway, he shall, unless he satisfies the Court that he had no intention to defraud the railway administration, be punished with imprisonment which may extend to two months, or with fine which may extend to one hundred rupees in addition to the amount of the single fare for any distance he may have travelled.

(2) If a person uses or attempts to use a single pass or single ticket which has already been used on a previous journey, or, in the case of a return ticket, a half thereof which has already been so used, he shall be punished with imprisonment which may extend to two months, or with fine which may extend to one hundred rupees in addition to the amount of the single fare for any distance he may have travelled.

(3) Any railway servant authorised by the railway administration in this behalf or any other person whom such railway servant may call to his aid may remove from a carriage a person found travelling therein without having a proper pass or ticket with him, unless he then and there pays the fare and the excess charge which he is liable to pay under the provisions of section 113.”

Amendment of
section 113,
Act IX of 1890.

4. In section 113 of the said Act,—

(a) to sub-section (2) the following proviso shall be added, namely:—

“Provided that the excess charge referred to in sub-section (1) and this sub-section shall not be payable if the passenger has with him a certificate issued under sub-section (2) of section 68.”;

and

(b) after sub-section (4) the following sub-section shall be added, namely:—

“(5) An application made under sub-section (4) shall contain a statement, certified as correct by the railway servant, of the sum payable by the passenger, and such statement shall, unless the contrary is proved, be proof that the sum so stated is recoverable from the passenger.”

Amendment of
section 131,
Act IX of 1890.

5. In section 131 of the said Act,—

(a) in sub-section (1), after the figures “101” the figures “112” shall be inserted, and after the word, brackets and figure “sub-section (1)” the following words shall be inserted, namely:—

“or if a person fails or refuses to pay any excess charge or other sum demanded under section 113 and there are reasonable grounds for believing that except by his arrest he cannot be placed before a Magistrate without undue delay, trouble or expense,”;

and

(b) to sub-section (2) the following words shall be added, namely:—

“or, in the case of a person arrested on failure to satisfy a demand made under section 113, before the Magistrate to whom the application under sub-section (1) of section 113 is to be made”.

Amendment of
section 132,
Act IX of 1890.

6. In sub-section (1) of section 132 of the said Act the words “or fails or refuses to pay any excess charge or other sum demanded under section 113” shall be omitted.

STATEMENT OF OBJECTS AND REASONS.

The Bill is intended to permit of more effective and deterrent action being taken than is possible under the existing law when persons are found travelling by railway without proper tickets. Although Railways have provided an elaborate and expensive organisation for the check of tickets both at stations and in trains, the number of cases detected of passengers travelling without proper tickets has tended to increase, and the amount recovered from them approximates to the amount spent on the organisation for check in trains. Experience has shown that any expenditure incurred on additional checks by the appointment of more travelling ticket checkers results in an increase of revenue proportionate to the increased expenditure. This indicates to some extent the seriousness of the evil which, it has been estimated, causes a loss of about 50 lakhs annually.

2. The sections of the Act under which action can be taken at present are 112 and 113. The former refers to cases in which there is intent to defraud a Railway and the latter to cases where there is no such intent. In cases in which action is taken under section 112 the onus of proving intent to defraud rests on the railway staff, the discharge of which is not always practicable. It is proposed, therefore, that the onus of proving that there was no intent to defraud should rest on the person

found travelling without a proper ticket. The penalty of a fine extending to Rs. 100 prescribed under section 112 has proved, in practice, to be ineffective and the Bill therefore provides for a sentence of imprisonment to be inflicted.

3. Most cases in which passengers found travelling without proper tickets are, however, dealt with under section 113 under which a passenger is liable to pay in addition to the fare due an excess charge equal to the amount of the fare but not exceeding the maxima provided in section 113, sub-section (3). The maximum excess charge in the case of a third class passenger is one rupee when he is detected before he has notified his liability, and two annas otherwise. A passenger who declines to pay the amount demanded can, under the present law, only be asked to give his name and address. If these are disbelieved, arrangements have to be made to hand the man over to the police to be placed before a magistrate. In many cases, such passengers are found to have no assets and are discharged. Where a distress warrant is issued against any person, the results are usually quite incommensurate with the time, trouble and expense involved in court proceedings, etc., as the amount payable is frequently not realised. To deal effectively with such cases, it is necessary that railway servants should be empowered to arrest such persons as refuse to pay the charges due if there is reason to believe that it will not be possible to get them to appear before a magistrate without undue delay, trouble or expense. Provision for this has been made in the proposed amendment to section 131 of the Act.

PART I.

Rules to be observed at ports in India on the arrival of vessels.

1. The diseases to which the rules in this part apply are:—(1) Plague, (2) Cholera, (3) Yellow Fever, (4) Typhus, (5) Small-pox, (6) Chicken-pox, (7) Cerebro-spinal Meningitis, (8) Diphtheria, (9) Relapsing fever, (10) Jigger, and (11) Influenzal pneumonia.

2. The master of every vessel arriving at any port subject to these rules shall show, until the vessel is free from control under these rules, a signal which shall be whichever of the undermentioned signals is appropriate:

(a) by day, during the whole of the time between sunrise and sunset, when the ship is within three miles of the coast or is within the limits of a district—

(i) the Flag Signal Q: meaning—"my ship is healthy and I request free pratique",

(ii) the Two Flag Signal QQ: meaning—"my ship is suspected", *vide* Rules 17, 22, 27, 32, 34 and 38, or

(iii) the Two Flag Signal QI: meaning—"my ship is infected", *vide* Rules 17, 22, 27, 32, 34, 38, 40 and 43.

(b) by night, during the whole of the time between sunset and sunrise but only when the vessel is within three miles of coast a signal comprising a red light over a white light, the lights being not more than six feet apart, and meaning—"I have not free pratique".

The night signal shall be shown at the peak or other conspicuous place where it can best be seen.

Provided that the authorities at a port may, with the previous approval of Government, notify supplementary signals not conflicting with the International Code, for use by vessels visiting the port frequently.

3. The master of any vessel fitted with a suitable wireless transmitting apparatus shall, when not less than 12 hours out from any port, send to the Health Officer, either directly or through an agent approved by the Health Officer, a wireless message, embodying all such of the items of information set out in the Standard Quarantine Messages of the International Code of Signals as are applicable:

provided that the authorities at a port may, with the previous approval of Government, notify supplementary signals not conflicting with the International Code, for use by vessels visiting the port frequently.

4. Cases of sickness or death occurring subsequent to the transmission of an earlier message shall be notified separately before the arrival of the vessel in the port.

5. On arrival at a port the master shall, at the earliest opportunity, report to the pilot or other boarding officer all matters that have occurred during the voyage which might affect the classification of the vessel as "infected", "suspected" or "healthy" and any sickness or deaths from any cause, and the pilot or other boarding officer shall promptly communicate such report to the Health Officer, provided that in the case of healthy vessels and vessels that are classed as "suspected", not on account of the occurrence of any disease on board but merely by reason that they have sailed from or touched at a particular port, it shall be permissible for the pilot or other boarding officer if acting on the general or special advice of the Health Officer to treat the vessel as "healthy" and allow pratique.

6. If after a vessel has arrived within port limits a case or suspected case of any of the diseases enumerated in Rule 1 occurs on board, the master shall hoist the signal prescribed in Rule 2 for "infected vessels", shall stop all communication with the shore and shall immediately report the circumstances to the Health Officer.

7. Every medical pretitioner, who becomes cognizant that any passenger on board or recently disembarked from any vessel or any member of the crew or any person employed on board any vessel in the port is suffering from any of the diseases mentioned in Rule 1, shall immediately give notice thereof by telephone and in writing to the Health Officer.

8. All infected or suspected vessels shall stop at such place as Government shall by order provide and shall not enter any dock or come alongside any wharf or have communication with the shore until authorised to do so by the Health Officer or in the conditions specified in the proviso to Rule 5, by the pilot or other boarding officer.

9. So long as the signals showing that the vessel is "infected" or "suspected" are shown, no tindal or other person in charge of or navigating any boat shall attempt to take it alongside such vessel except with the permission of the Health Officer, and no person other than a pilot or an official acting in the execution of these Rules shall board or leave any "infected" or "suspected" vessel without the written permission of the Health Officer.

10. Healthy vessels which, while in port, desire to have no communication with the shore shall, on arrival, hoist the code over Q flag by day and by night the "International Code Signal" meaning—"I have not free pratique" specified in Rule 2; provided that a vessel shall only be treated as having no communication with the shore under this rule if making a call of 12 hours or less, and provided that the vessel remains out in the stream and does not enter locked areas or moor alongside any quay.

Such vessels shall be subject to such restrictions as the Health Officer may direct and be guarded by the port sanitary police until departure.

11. In the case of all infected vessels the Health Officer shall, and in the case of all other vessels the Health Officer may proceed on board and examine the vessel, and the master shall give him every facility for the examination of the passengers, crew, personal effects, cargo, provisions, water supply and any part of the vessel the Health Officer considers it necessary to examine. The Health Officer may require a declaration, written or on oath, from the medical officer (if any) of the

vessel or from the master or from both, whether any death or sickness from an unknown or suspicious cause or any case of any of the diseases enumerated in Rule 1 has occurred on board the vessel either during the voyage or before her departure, and with reference to plague, whether any unusual mortality has been observed among rats. If the Health Officer is satisfied that such deaths or cases of sickness as may have occurred were not due to any of the diseases enumerated in Rule 1, he shall permit the vessel to proceed to the usual place of anchorage or berth in harbour and to discharge passengers and cargo without any further restriction. If he is not so satisfied, he shall proceed as provided in these rules. Inspection by the Health Officer under this Rule will not be undertaken between sunset and sunrise except in such unusual circumstances as justify a departure from the usual rule.

12. As the result of every inspection the Health Officer shall finally classify the vessel as infected, suspected or healthy, in accordance with the definitions given hereafter.

13. All cases of Plague, Cholera, Yellow Fever, Typhus and Small-pox shall be removed from a vessel on diagnosis by the Health Officer. The removal of persons who have been in contact with such cases may be enforced by the Health Officer if after full consideration of the circumstances he considers that such removal is necessary to prevent the spread of the disease.

In the case of the other diseases mentioned in Rule 1, the removal of such sick persons and their contacts as are bound for an onward port shall be enforced by the Health Officer only if he considers such action necessary on account of lack of facilities for isolation or treatment on board the vessel.

Whenever a person suffering from one of the diseases mentioned in Rule 1 remains on board, the Health Officer may at his discretion, limit communication with the shore.

14. The Health Officer shall inform the Municipal or Corporation Health Officer in all cases in which he arranges for the conveyance of a patient to a sanatorium or hospital or other place within municipal or corporation limits, and shall furnish the Municipal or Corporation Health Officer with the address of any private residence to which he permits the removal of a patient.

15. Where plague, cholera, or small-pox, is the disease on account of which the vessel is deemed to be infected, the Health Officer shall offer free of charge inoculation, vaccination or re-vaccination to all persons willing to be operated upon and shall cause to be inoculated or vaccinated, if their guardians or those in charge of them consent, all minors whom he may consider to be in a suitable physical condition for such operation.

16. In the case of a vessel infected or suspected to be infected with any of the diseases enumerated in Rule 1, the Health Officer may, whenever he considers it necessary and practicable, intimate by letter or telegram to the health authorities of the Presidency, Province or Indian State concerned, the date of departure, route, number of persons and ultimate destination in the respective Presidency, Province or Indian State of the passengers from the said vessel.

SPECIAL RULES ON ACCOUNT OF PLAGUE.

17. *Infected vessel*.—A vessel shall be regarded as infected—

- (1) if it has a case of human plague on board;
- (2) or if a case of human plague broke out more than six days after embarkation;
- (3) or if plague-infected rats are found on board.

Suspected vessel.—A vessel shall be regarded as suspected:—

- (1) if a case of human plague broke out in the first six days after embarkation;
- (2) or if investigations regarding rats have shown the existence of an unusual mortality without determining the cause thereof.

The vessel shall continue to be regarded as suspected until it has been subjected to the measures prescribed by these rules at a suitably equipped port.

Healthy vessel.—A vessel shall be regarded as healthy, notwithstanding its having come from an infected port, if there has been no human or rat plague on board either at the time of departure, or during the voyage, or on arrival and the investigations regarding rats have not shown the existence of an unusual mortality and, when unusual mortality among rats has been observed, expert examination has proved that this mortality was not due to plague.

18. In the case of plague-infected vessels, the following measures shall be taken before pratique is given:—

- (1) The vessel shall be inspected and all persons on board shall be medically examined;
- (2) All persons suffering from plague or suspected to be suffering from plague shall be disembarked and isolated.
- (3) In the case of persons who have been in contact with a case of plague, the medical officer, after taking into consideration the date of the last case, the condition of the vessel, and all the circumstances, may either—

- (a) isolate any such person; or
- (b) place him under surveillance; or
- (c) first isolate him and then place him under surveillance:

provided that no person shall be isolated or left under surveillance for a period extending in the aggregate beyond six days after the date of the arrival of the vessel in the port.

During any period of isolation or surveillance the members of the crew may be prohibited from leaving the vessel, except for the purposes of their duty, and after notification to the Health Officer.

- (4) Bedding which has been used, soiled linen, wearing apparel and other articles which, in the opinion of the Health Officer, are infected shall be disinfected and, if necessary, disinfectant;

- (5) The parts of the vessel which have been occupied by persons suffering from plague or which, in the opinion of the Health Officer, are infected shall be disinfected and, if necessary, disinfected.
- (6) The Health Officer may require deratisation before the discharge of cargo, if he is of opinion, having regard to the nature of the cargo and the way in which it is loaded that it is possible to effect a total destruction of rats before discharge. In this case, the vessel may not be subjected to a further deratisation after discharge. In other cases the complete destruction of rodents on board shall be effected when the holds are empty. In the case of vessels in ballast, this process shall be carried out as soon as possible before taking cargo.
- (7) When before or during the course of discharge of cargo, plague-infected rats are found on board, or when it has been established that there exists on board an unusual mortality among rats, the cause of which has not been determined, the Health Officer may require the fumigation of the ship before, or during the discharge of cargo, and if during the course of discharge, or after the discharge of cargo, live rats are again found, a fresh fumigation may be carried out if the master approves; but only one of the fumigations thus effected shall be done at the expense of the vessel.

If a vessel is to discharge a part of its cargo only, and if the Health Officer considers that it is impossible to carry out complete deratisation, the said vessel may remain in the port for the time required to discharge that part of its cargo, provided that all precautions, including isolation, are taken to the satisfaction of the Health Officer to prevent rats from passing from the vessel to the shore, either during unloading or otherwise.

The discharge of cargo shall be carried out under the control of the Health Officer, who shall take all measures necessary to prevent the staff employed on this duty from becoming infected. The staff shall be subjected to observation or to surveillance for a period not exceeding six days from the time when they have ceased to work at the unloading of the vessel.

19. When the measures prescribed in Rule 18 have been duly taken in respect of any infected vessel the Health Officer shall, by written order, grant pratique: provided that, if a case of plague or of illness suspected to be plague, occurs on board subsequent to the grant of the above certificate, the certificate shall become invalid and the vessel again becomes subject to the requirements of the rules regarding infected vessels.

20. In the case of plague-suspected vessels, the measures specified in (1), (4), (5) and (6) of Rule 18 shall be taken at the discretion of the Health Officer before pratique is given. In addition, the crew and passengers may be subjected to surveillance or observation, the duration of which, dating from the arrival of the vessel, shall not exceed six days. The crew may, during the same period, be prevented from leaving the vessel except on duty notified to the Health Officer.

21. Healthy vessels shall be admitted to free pratique. The only measures which the Health Officer may take as regards these vessels are the following:—

- (i) medical inspection as prescribed in Rule 11;
- (ii) destruction of rats on board in exceptional cases and for well-founded reasons which shall be communicated in writing to the master of the vessel;
- (iii) the crew and passengers may be subjected to surveillance during a period which shall not exceed six days reckoned from the date on which the vessel left the infected port. The crew may during the same period be prevented from leaving the vessel except on duty notified to the Health Officer.

SPECIAL RULES ON ACCOUNT OF CHOLERA.

22. *Infected vessel.*—A vessel shall be regarded as infected if there is a case of cholera on board or if there has been a case of cholera during the five days previous to the arrival of the vessel in port.

Suspected vessel.—A vessel shall be regarded as suspected if there has been a case of cholera at the time of departure or during the voyage, but no fresh case in the five days previous to arrival. The vessel shall continue to be regarded as suspected until it has been subjected to the measures prescribed by these rules.

Healthy vessel.—A vessel shall be considered healthy, although arriving from an infected port or having on board persons proceeding from an infected area, if there has been no case of cholera either at the time of departure, during the voyage, or on arrival.

Cases presenting the clinical symptoms of cholera, in which no cholera vibrios have been found or in which vibrios not strictly conforming to the character of cholera vibrios have been found, shall be subject to all measures required in the case of cholera.

23. In the case of cholera-infected vessels, the following measures shall be taken before pratique is given:—

- (1) The vessel shall be inspected and all persons on board shall be medically examined.
- (2) All persons suffering from cholera, or suspected to be suffering from cholera shall be disembarked and isolated.
- (3) The members of the crew and the passengers may be disembarked and either be kept under observation or subjected to surveillance for a period not exceeding five clear days from the date of arrival of the vessel, provided that persons satisfying the Health Officer that they have been protected against cholera by vaccination effected within the preceding six months excluding the last six days thereof may be subjected to surveillance but not to observation.
- (4) Bedding which has been used, soiled linen, wearing apparel and other articles, including foodstuffs, which, in the opinion of the Health Officer of the port, have been recently contaminated, shall be disinfected.

- (5) The parts of the ship that have been occupied by persons infected with cholera or that the Health Officer regards as infected, shall be disinfected.
- (6) Unloading shall be carried out under the supervision of the Health Officer who shall take all measures necessary to prevent the spread of infection, including the placing of the personnel employed on the unloading under observation or surveillance for a period not exceeding five days from the time when they ceased unloading.
- (7) If the drinking water stored on board is suspected by the Health Officer, he shall cause it to be emptied out after it has been disinfected, and to be replaced after disinfection of the tanks and filters by a supply of wholesome drinking water.
- (8) The Health Officer may prohibit the emptying of water ballast in port without previous disinfection if it has been taken in at an infected port.
- (9) The Health Officer may require human dejecta and the waste water of the vessel to be disinfected before they are discharged from the vessel.

24. *Cholera-suspected vessels.*—In the case of cholera-suspected vessels, the measures specified in (1), (4), (5), (7), (8) and (9) of Rule 23 shall be taken at the discretion of the Health Officer before pratique is given.

In addition, the crew and passengers may be subjected to surveillance the duration of which, dating from the arrival of the vessel, and shall not exceed five days. The crew may, during the same period, be prevented from leaving the vessel except on duty notified to the Health Officer.

25. *Clinical Cholera.*—If the vessel has been declared infected or suspected on account only of a case on board presenting the clinical features of cholera, and two bacteriological examinations, made with an interval of not less than 24 hours between them, have not revealed the presence of cholera or other suspected vibrios, the vessel shall be considered healthy.

26. *Healthy vessels* shall be admitted to free pratique. The only measures which the Health Officer may take as regards these vessels are those specified in (1), (3), (7), (8) and (9) of Rule 23.

SPECIAL RULES ON ACCOUNT OF YELLOW FEVER.

27. *Infected vessel.*—A vessel shall be regarded as infected if there is a case of yellow fever on board, or if there was one at the time of departure or during the voyage.

Suspected vessel.—A vessel shall be regarded as suspected, if, although there has been no case of yellow fever, it arrives after a voyage of less than six days from an infected port or from a port in close relation with an endemic centre of yellow fever, or if it arrives after a voyage of more than six days and there is reason to believe that it may carry from the said port adult *stegomyia (aedes egypti)* or other mosquitoes which are considered capable of transmitting the disease.

Healthy vessel.—A vessel shall be regarded as healthy notwithstanding its having come from an infected port, if on arriving after a voyage of more than six days it has had no case of yellow fever on board and either there is no reason to believe that it transports mosquitoes believed to be capable of transmitting yellow fever, or it is proved to the satisfaction of the Health Officer:—

- (a) that the vessel, during its stay in the port of departure, was moored at a distance of at least 200 metres from the inhabited shore and at such a distance from harbour vessels (pontoons, etc.), as to make the access of mosquitoes improbable.
- (b) or that the vessel, at the time of departure, was effectively fumigated in order to destroy mosquitoes.

28. The only port of entry in India open to vessels infected with yellow fever is the port of Bombay.

29. In the case of vessels infected with yellow fever, the following measures shall be taken before pratique is given:—

- (1) The vessel shall be inspected and all persons on board shall be medically examined.
- (2) All persons suffering from yellow fever, or suspected to be suffering from yellow fever, shall be disembarked and those of them who are in the first five days of the disease shall be isolated in such a manner as to prevent the access of any mosquitoes to them.
- (3) All other persons who disembark shall be kept under observation during a period which shall not exceed six days reckoned from the date of their disembarkation.
- (4) The vessel shall be moored at such distance, not being less than 200 metres, from the inhabited shore and from all other vessels, as will render the access of mosquitoes from shore to vessel or from vessel to shore improbable.
- (5) The destruction of mosquitoes in all phases of growth shall be carried out on board, as far as possible before discharge of cargo; if discharge is carried out before the destruction of mosquitoes, the personnel employed shall be subjected to observation or to surveillance for a period not exceeding six days from the time when they ceased unloading.

30. *Yellow fever suspected vessel.*—Vessels suspected of yellow fever may be subjected to the measures specified in (1), (3), (4) and (5) of Rule 29 before pratique is granted.

Nevertheless, if the voyage has lasted less than six days and if the vessel complies with the conditions specified under paragraphs (a) and (b) of Rule 27 relating to healthy vessels, the vessel shall be subjected to the measures prescribed by Rule 29 (1) and (3) only and to fumigation.

When 30 days have been completed after the departure of the vessel from the infected port, and no case has occurred during the voyage, the vessel may be granted free pratique subject to preliminary fumigation should the Health Officer consider this to be necessary.

31. *Healthy vessels.*—Healthy vessels shall be granted free pratique after medical inspection.

SPECIAL RULES ON ACCOUNT OF TYPHUS.

32. *Infected vessel*.—A vessel shall be regarded as infected if during the voyage or at the time of arrival it has had or has one or more cases of typhus on board.

Suspected vessel.—A vessel shall be regarded as suspected if there has been no case of typhus on board but it carries any person or persons who, within the twelve days prior to arrival, left an area where typhus was epidemic at the time of their departure.

33. In the case of infected vessels, the following measures shall be taken :—

- (1) The vessel shall be inspected and all persons on board shall be medically examined.
- (2) All persons suffering from typhus, or suspected to be suffering from typhus, shall be disembarked, isolated and deloused.

- (4) Bedding which has been used, linen, wearing apparel, and other articles which the Health Officer considers to be infected, shall be disinfected.
- (5) The parts of the vessel which have been occupied by persons infected with typhus and which the Health Officer regards as infected shall be disinfected.

33. (a) *Typhus-suspected vessels*.—Vessels suspected of typhus may be subjected to the measures specified in (1), (3) and (4) of Rule 33 before pratique is given.

(b) *Healthy vessels*.—Vessels not infected or suspected according to the definitions given in Rule 32 shall be treated as healthy and given free pratique.

SPECIAL RULES ON ACCOUNT OF SMALL-POX.

34. *Infected vessel*.—A vessel shall be regarded as infected if, during the voyage or at the time of arrival, it has had or has one or more cases of small-pox on board.

Suspected vessel.—A vessel shall be regarded as suspected if there has been no case of small-pox on board during the voyage but it has on board any person, unprotected by vaccination, from an area where small-pox was epidemic, within 14 days prior to arrival.

35. In the case of infected vessels the following measures shall be taken before pratique is given :—

- (1) The vessel shall be inspected and all persons on board shall be medically examined.
- (2) All persons suffering from small-pox, or suspected to be suffering from small-pox, shall be disembarked and isolated.

- (3) Other persons reasonably suspected to have been exposed to infection on board, and who, in the opinion of the Health Officer are not sufficiently protected by recent vaccination, or by a previous attack of small-pox, may be subjected to vaccination, if willing, and in the case of minors if their guardians or those in charge of them consent, to surveillance; or, if they are unwilling to be vaccinated, may be subjected to observation, the period of surveillance or observation being specified according to circumstances, but, in any event, not exceeding 14 days reckoned from the date of arrival of the vessel.
- (4) Bedding which has been used, soiled linen, wearing apparel, and other articles which the Health Officer considers to have been recently infected, shall be disinfected.
- (5) Only the parts of the vessel which have been occupied by persons ill with small-pox and which the Health Officer regards as infected, shall be disinfected.

36. *Small-pox suspected vessels.*—Vessels suspected of small-pox may be subjected to the measures specified in (1), (3) and (4) of Rule 35 before pratique is given.

37. *Healthy vessels.*—Vessels not infected or suspected according to the definitions given in Rule 34 shall be treated as healthy and given free pratique.

SPECIAL RULES ON ACCOUNT OF CHICKEN-POX, CEREBRO-SPINAL MENINGITIS,

Provided that a vessel shall no longer be regarded as suspected if a period of at least 14 days has elapsed since the occurrence of any case before her arrival at a previous port of call and the Health Officer is satisfied that she has been subjected to proper medical examination and that all necessary precautions have been taken.

39. In the event of a vessel being classed as infected or suspected on account of any of the above-mentioned diseases, the Health Officer, before pratique is given,—

- (1) shall arrange for the conveyance of any person suffering or suspected to be suffering from such disease to a sanatorium or hospital, unless the sick person or his friends can make adequate provision elsewhere to the satisfaction of the Health Officer; but he shall not enforce the removal from the vessel of any passenger or passengers bound for an onward port except as provided for in Rule 13.

- (2) may detain under observation or keep under surveillance persons whom he suspects of having been exposed on board to infection with relapsing fever, during a period which, reckoned from the date of arrival of the vessel must not exceed 14 days and may cause any such persons to be deloused;
- (3) may direct such bedding, soiled linen, wearing apparel, and articles belonging to the crew and passengers as he considers to be infected, to be disinfected or disinsected;
- (4) may order that any portion of the vessel that has actually been exposed to contamination or is in a filthy or insanitary condition, or which he considers likely to be infected, shall be disinfected and cleansed as he may direct.

SPECIAL RULES ON ACCOUNT OF JIGGER.

40. *Infected vessel.*—A vessel shall be regarded as infected if it has on board or has had on board during the voyage any person suffering from Jigger.

- (4) the ballast of such vessel, if of earth or sand, shall not be landed without the permission, in writing, of the Health Officer, who, if he considers necessary, may order that it shall be discharged into the sea/river at such places as shall be appointed for the purpose by Government.

(2) In exercise of the functions imposed upon him by the foregoing rules, the Health Officer shall attach due importance to the presence on board the vessel of a medical officer and to the provision on board the vessel of suitable apparatus for disinfection, disinsectisation and destruction of rats, and shall, in general, apply the principles laid down in the foregoing rules with due regard to their necessity and practicability in the particular circumstances of each case.

46. Vessels arriving from an infected area which have been subjected to sufficient sanitary measures to the satisfaction of the Health Officer, shall not be subjected to these measures a second time on their arrival in another port whether belonging to the same country or not, unless, since their departure, some incident has occurred which, in the opinion of the Health Officer, justifies the application of the said sanitary measure and unless they have subsequently called at an infected port.

47. The foregoing rules shall not prevent the transshipment, under restrictions to be imposed by the Health Officer in conformity therewith, of passengers, mails, or goods between vessels which have not been granted pratique.

48. Vessels refusing to submit to measures prescribed in these rules shall be at liberty to put out to sea: Provided that such refusal has been made before there has been any communication, except by signal or through the port authorities, between such vessel and the shore or with any other vessel in port. Such vessel may, however, be permitted to land goods, if the ship is isolated, subject to such restrictions or conditions as the Health Officer may lay down in this behalf. In all cases, a note shall be made on the bill of health, stating the nature of the infectious disease and whether diagnosed definitely or suspected, and the precautions taken in connection therewith.

PART II.

Rules to be observed in the case of vessels leaving ports in India for ports beyond India.

55. (1) In the case of vessels leaving any Indian port for any port beyond India, the Health Officer shall take effectual measures by medical examination to prevent the embarkation of persons showing symptoms of plague, cholera, yellow fever, typhus, small-pox or any of the diseases specified in rule 1 and of persons in such relation with the sick as to render them liable to transmit the infection of these diseases.

(2) Such medical examination shall ordinarily take place by day on shore as shortly as possible before embarkation, the time and place being fixed by the Health Officer. The Health Officer may, however, at his discretion, arrange to examine on board such passengers or members of the crew as have not remained one night on shore.

(3) Any person wilfully neglecting or refusing to attend at the time and place appointed for such medical examination shall be liable to the penalty prescribed in Section 54 of the Indian Ports Act, 1908 (XV of 1908).

(4) In case the disease or diseases with which the port has been declared to be infected, be plague, cholera or small-pox, it shall be competent for Government by general or special orders to direct that all persons sailing on the vessel shall submit to inoculation or vaccination or both or satisfy the Health Officer by the production of valid certificates or otherwise that they are adequately immunised against the disease or diseases in question.

(5) In any case where he considers such action necessary, the Health Officer may cause to be disinfected or disinfested on shore previous to embarkation any clothing, bedding or other articles belonging to any person and in the absence of such disinfection or disinfestation any such clothing, bedding or other articles shall not be allowed on board any vessel or, if already placed on board, shall be removed as quickly as possible.

(6) The master of a vessel shall not allow the embarkation of any clothing, bedding or other articles belonging to new members of the crew unless the embarkation of such baggage has been authorised by the Health Officer of the port.

56. It shall be open to the Consular representative interested in any vessel to be present, if he so desires, at the medical examination conducted by the Health Officer under Rule 55 and at the disinfection, if any, ordered by him under clause (5) of that rule.

57. At all ports declared to be infected, the Health Officer shall take effectual measures—

- (1) in the case of plague, to prevent rats gaining access to vessels;
- (2) in the case of cholera, to ensure that drinking water and food-stuffs taken on board are wholesome, and that water taken in as ballast is disinfected if necessary;
- (3) in the case of yellow fever, to prevent mosquitoes gaining access to vessels;
- (4) in the case of typhus, to secure the delousing of all suspects before their embarkation; and
- (5) in the case of small-pox, to ensure that old clothes and rags, whether baled or otherwise, have been thoroughly disinfected before loading.

58. On the completion of the medical examination, the Health Officer shall give to the master of the vessel a bill of health to that effect stating that all the measures, which, in his opinion, are necessary, under Rules 55 and 57, have been carried out:

Provided that, if the vessel has not been in communication with the shore, the measures prescribed in Rule 55 shall be taken only in respect of persons joining the vessel at that port. In such a case the bill of health need only take the form of an endorsement on the last bill of health held by the vessel and need only refer to the passengers and crew embarking at the port in question:

Provided also that once the bill of health has been granted, no person, baggage or merchandise shall be taken on board except with the permission of the Health Officer to whom, in such event, the bill of health shall be returned by the master for necessary amendment if the Health Officer considers such amendment necessary.

59. If any vessel does not leave port within 24 hours after the medical examination made under Rule 55 she shall not leave until—

- (a) a fresh medical examination of the passengers and crew has been made under that rule, and
- (b) a fresh bill of health has been given to the master under Rule 58:

Provided that such fresh examination may be conducted on board the vessel, whether or not there has been communication with the shore since the previous examination was made, and provided that if the time of departure be after sunrise on the day after that of inspection, the master of the vessel shall send the bill of health to the Health Officer to have the date of departure amended.

60. Previous to the departure of a vessel, the Health Officer shall direct it to be cleared for medical inspection and this shall be signified by the hoisting of Q flag. After this has been done, no person except the pilot or any person specially authorised by the Health Officer shall be permitted to embark or go on board the vessel even as a visitor, unless he has been medically examined by the Health Officer as prescribed in Rule 55.

61. Port-clearance shall not be granted for any vessel, unless and until the master produces the bill of health prescribed in the foregoing rules:

Provided that, at any port where, in the opinion of Government, local conditions render this relaxation advisable, the authority responsible for granting port-clearance may grant it for any vessel on receiving from the agents of the vessel a written guarantee that a duplicate of such bill of health, signed by the Health Officer, will be furnished by them to him within forty-eight hours.

62. (1) If the Health Officer considers that any member of the crew of the vessel is suffering from, or is in the incubation stage of any infectious or contagious disease or likely to convey such disease

(a) he shall prevent such member from re-embarking on, or if already embarked, shall cause him to be removed from such vessel and may, at his discretion, refuse to give a bill of health until the baggage and personal effects of such members have been removed from the vessel and such parts of the vessel as have been occupied or frequented by such members have been disinfected; and

(b) the baggage and personal effects of such persons as were in immediate contact with such member of the crew may also be disinfected, and the names of such persons given to the medical officer or master of the vessel for supervision on the voyage.

(2) If the Health Officer of the port considers that the rats on board are infected with plague, he shall destroy the rats in the manner provided for in Rules 18 (6) and (7).

(3) All action taken under clauses (1) and (2) of this rule shall be noted in the bill of health.

63. Any person who is prevented by the Health Officer under the foregoing rules from embarking or sailing, may be removed to and kept at a hospital or kept under observation, or subjected to surveillance under the conditions prescribed by Rules 50 to 53.

64. Whether the port of embarkation has been declared infected or not, Rules 55 to 63 shall apply to all pilgrim and emigrant vessels and the Health Officer may, at his discretion, apply them to any vessel leaving for any port beyond India. By the special orders of the Governor-General in Council, they may also be applied to vessels leaving any port in India or Burma for any other port in India or Burma.

PART III.

General Rules.

65. In accordance with the provisions of Article 28 of the International Sanitary Convention, 1926, all ships, except those employed in national coastwise service, shall be periodically deratised, or be permanently so maintained that any rat population is kept down to the minimum. In the first case, they shall receive Deratisation Certificates, and in the second Deratisation Exemption Certificates.

Note.—The only ships which can be considered as employed “in national coastwise service” are those trading between ports in India and Burma only. Ships trading to Singapore, Penang, Ceylon, Aden and the Persian Gulf as well as to ports in the foreign settlements in India cannot be exempted from the necessity of providing themselves with the certificates. The fees payable for the certificate as well as for the process in connection therewith will be fixed by orders issued by Government from time to time.

66. A Deratisation Certificate or a Deratisation Exemption Certificate shall be issued only by the Health Officers of the Ports of Bombay, Calcutta and Rangoon. Every such certificate shall be valid for six months but this period may be extended by one month in the case of a ship proceeding to its home port.

67. If no valid certificate is produced, the Health Officer of any of the ports mentioned in Rule 66 may after enquiry and inspection—

- (a) himself carry out deratisation of the vessel, or cause such operations to be carried out under his direction and control. On the completion of these operations to his satisfaction, he shall issue a dated Deratisation Certificate. He shall decide in each case the technique which should be employed to secure the practical extermination of rats on board, but details of the deratising process applied and of the number of rats destroyed shall be entered on the certificate. Destruction of rats shall be carried out so as to avoid as far as possible damage to the vessel and cargo (if any). The operation must not last longer than 24 hours. In the case of vessels in ballast the process shall be carried out before taking cargo. Any charges made in respect of these operations of deratisation and any question of compensation for damage shall be governed by the terms of Article 18 of the International Sanitary Convention, 1926;
- (b) issue a dated Deratisation Exemption Certificate if he is satisfied that the vessel is maintained in such a condition that the rat population is reduced to a minimum. The reasons justifying the issue of such a certificate shall be set out in the certificate.

All requisite and practicable measures shall be taken by the competent authorities to secure the destruction of rats in ports and their surroundings as well as on lighters and coastwise vessels.

68. The Health Officer may at any time inspect any vessel within the precincts of the port with regard to the prevalence and breeding of rats, mosquitoes or other vermin or insects thereon, and make recommendations to the master, owner or agent for the destruction of such rats, mosquitoes, vermin or insects and the elimination of their breeding places on board, and, subject to such general or special orders as may be issued by Government in this behalf, may require such measures to be adopted and, in default, carry them out himself or cause them to be carried out at the expense of the master, owner or agent.

69. Whenever a person suffering or suspected to be suffering from an infectious disease or anyone who has been in contact with such a person and is considered liable to develop such infectious disease is disembarked from a vessel, the Health Officer shall notify the Corporation or Municipal Health Officer and supply him with the necessary particulars.

70. The Health Officer may direct the disinfection or in special cases the destruction of foodstuffs which have been exposed to contamination and are considered likely to be infected with any disease or to be dangerous to public health.

71. (1) The Health Officer shall, on request, furnish the master or any representative of the owner or agent, free of charge, with a certificate specifying the nature of the sanitary measures undergone, and the methods applied, the parts of the vessel treated, and the reasons for employing such measures.

(2) He shall, on request, furnish any passenger who has arrived by an infected vessel, free of charge, with a certificate setting out the date of arrival and the measures to which the passenger or his baggage has been subjected.

Disposal of dead bodies.

72. Disposal shall be as follows:—

- (1) If death occurs on board a vessel before entering port limits, the body shall, unless there are special reasons to the contrary, be buried at sea in not less than nine fathoms of water, in such manner as shall secure its immediate sinking and remaining below the surface.
- (2) If death occurs during the day on board a vessel within the port limits the ensign and house flag, if any, should immediately be lowered to half-mast and kept in that position from sunrise till sunset as long as body remains on board. If death occurs between sunset and sunrise, one red light shall be hoisted at the peak, half-mast high.
- (3) If death occurs on board a vessel within the port limits, or if a vessel arrives having on board a dead body, the master of such vessel shall at once inform the Health Officer of the fact and shall carry out such instructions for the disposal of the body and for the cleansing and disinfection of the vessel as may be given by the Health Officer.

Three students are also eligible for admission from the Dacca University area and three from the Dacca Intermediate Board. Students from other provinces and from Indian States for whom places have been reserved are also eligible for admission to the college.

Only students who intend to take the M. B. examination of the Calcutta University are admitted to this class.

(2) *Military pupils' class*.—Only European or Anglo-Indian students are admitted to this class (see separate prospectus for military pupils whose admission is regulated by the Director-General, Indian Medical Service).

2. The minimum preliminary qualification for admission is the First Class Pass certificate of the I. Sc. examination of the Calcutta University with Physics, Chemistry and Mathematics or an examination recognised as equivalent to it. This rule may be relaxed in favour of Muhammadan students and such candidates having passed the said examination in the second division may be admitted, provided they are otherwise considered suitable, to make up the number allotted for the Muhammadan students. In assessing the claims of those eligible for admission special weight will be attached to proficiency in English.

3. (a) Female students qualified under rules 1 and 2 will be admitted to the college, provided there is a vacancy in the Swarnamoyee Hostel in which all female students must reside. For special reasons to be recorded in writing, the Principal may allow any female student to reside outside this Hostel.

(e) Any candidate who has—

(i) endeavoured to enlist for his candidature the support of persons of influence or of Government officials,

9. Forms of application for admission will be issued from the 15th April and received up to the 25th May every year.

The fees for the summer term are due (except from new students) on the 15th June and those for the winter term on the 1st November and must be paid together with athletic club fees, on those dates or on such later dates as the Principal may direct, after which a daily fine of annas four will be levied along with the fees on each defaulter. The names of students whose fees are more than 30 days overdue will be removed from the rolls of the college.

(a) A student detailed to hospital duty who overstays the authorised vacation leave without the permission of the Principal will be liable to pay a fine of Rs. 2 only for each day of overstay.

BENGAL LEGISLATIVE COUNCIL DEPARTMENT.

NOTIFICATION.

No. 1500L.C.--9th May, 1936.--The following report of the Select Committee on the Bengal Patni Taluks Regulation (Amendment) Bill, 1936, by Raja Bhupendra Narayan Sinha Bahadur of Nashipur, M.L.C., with the Bill embodying an amendment recommended by the Committee, is hereby published for general information.

Report of the Select Committee on the Bengal Patni Taluks Regulation (Amendment) Bill, 1936, by Raja Bahadur Bhupendra Narayan Sinha of Nashipur, M.L.C..

We, the members of the Select Committee of the Bengal Legislative Council to which the Bengal Patni Taluks Regulation (Amendment) Bill, 1936, by Raja Bahadur Bhupendra Narayan Sinha of Nashipur, M.L.C., was referred by a motion carried in the Bengal Legislative Council on the 27th February, 1936, have the honour to submit this our report with the Bill embodying an amendment recommended by us, annexed. The matter omitted by the Select Committee has been printed in italics and enclosed in square brackets and new matter recommended to be inserted has been underlined.

2. The Bill was published in English in the *Calcutta Gazette* of the 19th March, 1936.

3. We do not consider that the Bill has been so altered by our recommendation as to require republication.

4. The Committee met on the 23rd March, 1936, and concluded its sitting on the same day.

Clause 2.—We consider that the proposed amendment can be made more appropriately in section 17.

Any party to a suit relating to the sale or to the disposal of the purchase money should, in our opinion, be entitled to make an application for investment of the sum in deposit.

It is desirable to make it clear that the sum to be invested is the residue which remains after deducting the amount due to Government under the second clause of section 17 and after satisfying the demand of the *zemindar* under the third clause of that section.

The clause in its original form referred only to a suit for the reversal of the sale, but it should apply also to the suits contemplated by the fifth clause of section 17.

We have modified clause 2 accordingly.

We recommend that the Bill, as reported on by us, be passed.

Minute of dissent by Rai Bahadur Hem Chandra Roy Choudhuri, M.L.C.

For the sake of security of purchase money it should be provided in the Act that either the investment must be made in Government securities or all the interested persons in the surplus sale proceeds including the tenure-holders of second degree who may not be the parties to the suit relating to the sale will be given an opportunity to submit their objection, if any, before the Court about the proposed investment. They should also have a right of appeal against the decision of the Court on the point.

In some cases several suits relating to the sale of a Patni Taluk may be instituted in different Courts of same or different jurisdiction within the same or different districts. Parties in these suits may not be the same group of persons. It should, therefore, be made clear, the direction of which Court the Collector would follow.

- (b) by an employed person, if the total amount of wages claimed to have been withheld from him or from the unpaid group to which he belonged exceeds fifty rupees, or
- (c) by any person directed to pay a penalty under sub-section (5) of section 15.

(2) Save as provided in sub-section (1), any direction made under sub-section (3) or sub-section (5) of section 15 shall be final.

Powers of authorities appointed under section 15.

18. Every authority appointed under sub-section (1) of section 15 shall have all the powers of a Civil Court under the Code of Civil Procedure, 1908, for the purpose of taking evidence and of enforcing the attendance of witnesses and compelling the production of documents, and every such authority shall be deemed to be a Civil Court for all the purposes of section 195 and of Chapter XXXV of the Code of Criminal Procedure, 1898. V of 1908.

PART VI

Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly, and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill* was introduced in the Legislative Assembly on the 8th April, 1936:—

L. A. BILL No. 14 OF 1936.

A Bill to amend the Indian Aircraft Act, 1934, for a certain purpose.

WHEREAS it is expedient to amend the Indian Aircraft Act, 1934, for the purpose hereinafter appearing; It is hereby enacted as follows:—

XXII of
1934.*

Short title.

1. This Act may be called the Indian Aircraft (Amendment) Act, 1936.

Insertion of
new section 8A
in Act XXII of
1934.

2. After section 8 of the Indian Aircraft Act, 1934 (hereinafter referred to as the said Act), the following section shall be inserted, namely:—

XXII of
1934.

Power of
Governor
General in
Council to
make rules
for protecting
the public
health.

“8A. The Governor General in Council may, by notification in the Gazette of India, make rules for the prevention of danger arising to the public health by the introduction or spread of any infectious or contagious disease from aircraft arriving at or being at any aerodrome and for the prevention of the conveyance of infection or contagion by means of any aircraft leaving an aerodrome and in particular and without prejudice to the generality of this provision may make, with respect to aircraft and aerodromes or any specified aerodrome, rules providing for any of the matters for which rules under sub-clauses (i) to (viii) of clause (p) of sub-section (1) of section 6 of the Indian Ports Act, 1908, may be made with respect to vessels and ports.”

XV of
1908.

Amendment of
section 10, Act
XXII of 1934.

3. In section 10 of the said Act, for the words and figure ‘or section 8’ the words, figures and letter “section 8 or section 8A” shall be substituted.

*The Governor General has been pleased to accord the sanction required by section 67 (2) of the Government of India Act.

STATEMENT OF OBJECTS AND REASONS.

Under section 6(1) (p) of the Indian Ports Act, 1908 (XV of 1908), Local Governments are empowered to make rules for the prevention of danger arising to public health by the introduction and the spread of any infectious or contagious disease from vessels arriving at, or being in, any sea port, and for the prevention of the conveyance of infection or contagion by means of any vessel sailing from any such port. The development of air traffic has made it necessary to establish similar control over incoming and outgoing aircraft and as a first step in this direction a whole-time Health Officer has recently been appointed at the Karachi Air Port. There is, however, no provision of present law under which rules laying down and authorising the action to be taken by such an officer can be made. The absence of any such provision is a serious drawback and may, any moment, prove a source of great embarrassment especially as conditions in India are favourable to the spread of yellow fever and there is a risk, as a result of the rapid development of air traffic, of this disease being introduced into India from Africa by the entry of an infected person or infected insect, if adequate measures are not taken to prevent it. The Government of India have, therefore, come to the conclusion that it is desirable to amend the Indian Aircraft Act, 1934 (XXII of 1934), so as to enable the Governor General in Council to make the necessary rules. The Bill is designed to provide for the carrying out of the requisite amendments.

General.

8. In the preamble and throughout the said Act, for the word "Committee" and for the words "Tea Cess Committee", wherever they occur, the word "Board" shall be substituted.

STATEMENT OF OBJECTS AND REASONS.

The Indian Tea Cess Act was amended last year in order to raise the maximum rate of cess leviable from 8 annas to 12 annas per 100 lbs. of tea exported. That amendment was admittedly an emergency measure dictated by the necessity of providing additional funds for propaganda purposes and it was recognised that the Act required amendment in other respects. In the course of the debate on the amending Bill an undertaking was given that a more comprehensive measure would be brought forward. The present Bill seeks to give effect to that undertaking.

2. The more important amendments which are now proposed are as follows:—

- (a) that the designation of the Committee administering the Cess funds be changed to "The Indian Tea Market Expansion Board"—a description which sets out more specifically the nature of the activities of the Committee;
- (b) that the strength of the Committee be increased from 20 to 25 in order to permit of greater representation of Indian tea interests;
- (c) that, in order to provide finance for continuous propaganda in the non-exporting season, the Committee be given power to borrow, subject to the limitations set out in the Bill;
- (d) that the objects for which the cess may be expended be so defined as to permit of the participation of the Indian Committee in joint propaganda together with the two other important tea producing countries of the world;
- (e) that, in order to provide adequate funds for propaganda purposes, the maximum rate of cess leviable be raised from annas 12 to Rs. 1-8 per 100 lbs.

3. These proposals have been accepted by all Local Governments and Indian States concerned in the production of tea and carry with them the overwhelming support of the tea growing industry in India. A very large majority of the commercial bodies which have been consulted have also expressed themselves in favour of the proposed amendments.

(a) For establishing an institution for agricultural instruction—including dairy-farming and cattle-breeding. If in the opinion of the Administrators the said income is insufficient for this purpose or if for any other reason it is or shall be impracticable, to apply the said income towards such agricultural instruction, the same shall be applied for scholarships for graduates in Science who are natives of the Rajshahi Division of Bengal to assist them in studying Applied Science either in India or abroad, in accordance with a fresh scheme to be settled by the said Administrators with the approval of the Government of Bengal.

Such scholarships shall be awarded to the students of the Rajshahi College for the purposes and in manner hereinafter mentioned and shall be subject to the provisions hereinafter contained.

3. The scholarships mentioned in clause 2 (b) shall be called Basanta Kumar Scholarship in Agriculture. The holders thereof shall be selected by the Governing Body of the Rajshahi College as from time to time appointed or constituted, but shall be natives of the Rajshahi Division being also graduates in Science from the said Rajshahi College. Such selection may be made by means of special

examinations or may be based upon general progress in the College. The scholarships may at the discretion of the aforesaid Governing Body be awarded for any period not exceeding three years and the aforesaid Governing Body may discontinue any scholarship wholly or partly at their discretion for misconduct or unsatisfactory work or for any cause which they may deem sufficient. If in any year there shall be no candidate from natives of the Rajshahi Division, the scholarship for that year may be awarded by the aforesaid Governing Body to a suitable graduate of the said College in Science from any other part of Bengal. Any unexpended income intended for scholarships under clause 2 (b) shall be used for the purpose sanctioned in clause 2 (a) hereof.

4. *Name.*—The institution referred to in clause 2 (a) hereof shall be known as Basanta Kumar Agricultural Institute, Rajshahi, after the name of the donor.

Object.—The object of the Institute shall be to impart a thorough and practical training in Agriculture and other allied subjects including dairy-farming and cattle-breeding and to provide modern scientific training in agriculture as far as possible with a view to turning out trained practical agriculturists capable of taking up farming and applying improved methods.

The course, therefore, will be more practical in nature than theoretical and the students will be expected to do all the operations of the farm themselves under the directions of the Superintendent of the Institute.

Admission.—There will be two classes of students—

- (i) casual students, and
- (ii) regular students.

(i) The casual students shall generally be students, who, along with their studies in the College classes at Rajshahi or elsewhere, join the Institute for such vocational training as may be available—practical and theoretical—as casual students.

(ii) Regular students will be those who are solely and whole-time students of the Agricultural Institute.

In the case of regular students admissions shall ordinarily be open to (i) Matriculates, and to (ii) those who have read up to the end of the second year's course of the I.Sc. standard, or equivalent or higher standard with Science subjects. The Matriculates will have to follow a four years' course unless the Superintendent of the Institute is of opinion that it is possible for such students to complete the course earlier.

Those who have read up to the second year's course of the I.Sc. standard or equivalent or higher standard with Science subjects will have only a two years' course of training.

Applications for admission will be received by the Superintendent of the Institute up to the 15th of July or such other date as the Superintendent may fix for this purpose. The normal qualification for admission shall be a

pass certificate in the Matriculation Examination of any Indian University but candidates who have passed the above examination from either the Calcutta University or Dacca Board of Intermediate and Secondary Education shall have preference. Preference shall also be given to candidates from the Rajshahi Division, provided they satisfy the requirements for admission. Should suitable Matriculates be not available others can be considered but these will be required to pass an admission test of a similar or suitable standard.

Applicants must apply through the Headmaster of the School last attended by them, who would testify as to their age, educational qualification, character and physique. Applications should be accompanied by two certificates of moral character and physical fitness. The age of the candidate at the time of application should be between 15 and 19 years.

Period of study.—The course of study shall be spread over the following period:—

For Matriculates or for those who have not read up to the end of second year I.Sc. course—

First year.—Mathematics, Physics, Chemistry and Botany—Theoretical and Practical—with farm work.

Second year.—Mathematics, Physics, Botany and Chemistry as above but with more practical work and with more farm work.

Third year.—Horticulture, Dairy, Poultry, Agricultural Farming.

Fourth year.—Horticulture, Dairy, Cigar-making.

In the first and second years provision shall be made for some suitable practical field work either in poultry or in dairy or in cultivation of crops or in agricultural farming. Students completing the I.Sc. course up to the end of the second year or higher course in Science shall be able to begin from the third year's course. Classes shall begin in the first week of August every year.

Certificate.—At the completion of the course an examination test, both theoretical and practical, shall be held by a Board consisting of the Director of Public Instruction and the Director of Agriculture, Bengal, with such other persons as they nominate on this behalf, and students coming out successful shall be given certificates.

Discipline.—On admission, the students shall be required to give an undertaking to the effect that they will obey the rules of the Institute, observe discipline and respect the instruction of the authorities of the Institute. Any student not satisfying as to progress made at the end of the first year shall be liable to stay in the first year course of study again. Any student is liable to expulsion for misbehaviour and the power to so expel a student will lie with the Board of Management of the Institute hereinafter mentioned.

Control and staff.—The Institute shall be under the control and administrative authority of the Principal of the Rajshahi College subject to such directions, instructions and rules as may be framed by the Board of Management subject to the approval of Government or the Director of Public Instruction.

The staff of the Institute will consist of a Superintendent assisted by lecturers.

The first staff of the Institute shall be appointed by Government on the recommendation of an expert Board, which shall be appointed for this purpose, provided that at any later stage such appointments shall be made by Government on the recommendation of the Board of Management.

Charges.—A regular student will have to pay a fee of Rs. 3 per month while a casual student will only pay a fee of Re. 1 per month. These rates may be varied by the Board of Management with the approval of Government. There will be no admission fee, but the Board of Management reserve the right to levy admission fee which shall not exceed the rate of monthly tuition fee for regular students with effect from any session they deem fit.

Each student will be required to deposit a sum of Rs. 5 as caution money at the time of admission which will be refunded on his leaving the Institute, less the cost of breakages. The rules governing the realisation and refund of, and deduction from, the caution money deposits from the pupils of the Government colleges shall *ipso facto* apply to the pupils of the Basanta Kumar Agricultural Institute.

Notwithstanding the above rule, the unclaimed caution money deposits shall be deposited to the Reserve Fund of the Institute and not in the Treasury as in the case of Government Institutions.

All regular students shall ordinarily reside in the hostel provided, for which a special seat-rent shall be charged. The students will manage their own mess under the guidance and general control of the Superintendent of the hostel.

Vacation.—There will be only one vacation in the year beginning from the 15th December to the 15th January or such other dates as the Board of Management shall consider suitable. The laboratory work and lecture classes will not be held on Sundays and other gazetted holidays, but the actual field training will go on throughout the year, except in the vacation noted above, and at such times and days as the Superintendent shall from time to time determine in this behalf.

Syllabus.—The courses of study will include theoretical and practical training in dairy-farming, including preparation of dairy products, horticulture, poultry, cigar-making and agricultural farming, as outlined below—

No. 2147M.—11th May 1936.—In exercise of the power conferred by section 32 of the Bengal Local Self-Government Act, 1885 (Bengal Act III of 1885) as modified up to 1st September 1933, I sanction the following rules of business framed by the Malda local board in the district of Malda:—

Rules under section 32 of the Act framed by the Malda Local Board.

Clause (A).

The time and place of its meetings, the business is to be transacted at meetings, and the manner in which notices of meetings shall be given.

Rule 1. If the Chairman is temporarily absent from his duties, or if the office of the Chairman is temporarily vacant the duties of the Chairman under these rules shall be performed by the Vice-Chairman.

Rule 2. Meetings shall be either ordinary or special.

Rule 3. An ordinary meeting of the local board shall be held on such day of every month as may be fixed from time to time by the board at a meeting, provided there is business to be transacted. Provided also that if in any month there is not enough business to make a meeting necessary no meeting shall be held in that month.

Rule 4. A special meeting of the local board may be called at any time by the Chairman. The Vice-Chairman shall be bound to call a special meeting on a requisition signed by not less than one-fourth of the total number of the members.

Rule 5. All subjects which come within the province of the local board may be dealt with at either ordinary or special meetings, provided there be necessary quorum.

Rule 6. Meetings shall be held at the meeting room of the district board or at such place as the Chairman may from time to time determine.

Rule 7. The notice under rule 67 of the General Rules shall be sent by post or by such other method as may be convenient, provided that if a local newspaper be published at the headquarters of the local board, the board by

a resolution duly passed, may decide that the publication of such notice in the newspaper in question shall be sufficient.

Rule 8. Notice of motions and amendments accompanied by *verbatim* drafts signed by the proposer shall be sent to the Chairman or in the case of there being a Secretary, to the Secretary, so as to reach him in case of motions at least fifteen days and in case of amendments at least two days before the date of the next meeting. Notice received too late shall be inserted in the list of business of the next succeeding meeting, provided that the Chairman may, in his discretion, admit any motion or amendment at a shorter notice.

Rule 9. A member who wishes to ask a question at a meeting for the purpose of obtaining information relating to the affairs of the board shall give notice of his intention to the Chairman at least fifteen days before the day of a meeting and shall together with the notice submit a copy of the *verbatim* draft of the question he wishes to ask, provided that no single member shall be allowed to ask more than three questions in any one meeting.

On the day of the meeting and before other business commences the Chairman may at his discretion read out his answer, if any, or lay a written copy of his answer on the table. No debate shall be allowed on any question.

Rule 10. A notice book shall be kept by the Chairman of the local board, in which all notices of motions shall be entered. All such notices shall be dated and numbered as received.

Adjourned meetings.

Rule 11. An adjourned meeting is not competent to transact any business save that which the original meeting left unfinished.

Rule 12. An adjourned meeting being merely a continuation of the original meeting does not require any fresh notice.

Clause (B).

Rule 13. At ordinary meeting the business shall be conducted in the following order:—

(a) The first half an hour of every meeting shall be available for the asking and answering of questions.

(d) A progress report of works shall be laid before the board.

(e) Letters and reports of committee shall be read, and accounts and statements shall be considered and passed.

(f) Motions and amendments of which due notice has been given shall be discussed.

Rule 14. At a special meeting only the business for which the meeting was called shall be considered, provided that with the consent of the majority of the members present any other business may be considered.

Rule 15. In the event of any objection being raised to the manner in which any resolution has been recorded the Chairman shall decide the question after reference to the original draft of the resolution and if he finds the minute to be inaccurate, shall make the necessary correction in the minute book.

Rule 16. Unless with the consent of the majority of the members present at the meeting all subjects shall be discussed in the order in which they appear in the notice paper, provided that the Chairman may give precedence to the discussion of any subject appearing in the notice paper by reason of its importance and urgency.

Rule 17. Every motion and amendment duly moved shall be seconded and until seconded no debate thereon shall take place.

Rule 18. When any motion involving several points has been discussed it shall be in the discretion of the Chairman to split up the motion and put each or any point separately to the vote.

Rule 19. Every amendment shall be relevant to and within the scope of the proposal to which it relates and shall be so worded as to be capable of making an intelligible sentence either alone or in its proper place in an original motion as the case may be, provided that no amendment shall be moved which merely negatives the original motion, provided also that an amendment on a question shall not be inconsistent with a previous decision on the same question given at the same stage of any motion.

Rule 20. The President of the meeting may, for reasons to be recorded in writing and entered in the minutes of the proceedings—

(a) rule that a motion or amendment or question is illegal or out of order, and

(b) make such alterations in a motion or amendment or question as shall, in his opinion, render it legal, or in order; and may in case (a) refuse to put amendment to the meeting or to answer the question and in case (b) refuse to put the amendment to the meeting unless and until the proposer and seconder accept and sign the alteration so made.

And the decision of the President shall be final.

Rule 21. On the discussion being concluded in the event of several amendments having been proposed, the President shall put the last amendment to the vote first; if it is negatived, he shall put the last preceding amendment; and lastly, the first amendment; and if all the amendments are lost, the original proposition shall be put to the vote.

Of the right to speak.

Rule 22. A member desiring to make any observation on any matter before the meeting shall speak from his place, shall rise when he speaks and shall address the President. If the President rises at any time any member speaking shall immediately resume his seat.

Rule 23. The member who first addresses the meeting shall be entitled to be heard first; and should more than one member rise to address the meeting at the same time, the order of precedence shall be determined by the President.

Rule 24. Any member shall be at liberty to call the attention of the President to a point

of order, even when a member is speaking. On a point of order being raised, the member addressing the meeting shall resume his seat until the question has been decided by the President. After the decision of the President the same point of order cannot be raised again. Except as provided by this rule no member shall interrupt a speaker in possession of the meeting.

Rule 25. Except as provided in the last preceding rule no member shall speak except to move or second a motion or amendment or to support or oppose a motion or amendment which has been duly moved and seconded.

Rule 26. A speaker who has exhausted his right to speak on an original motion, may speak on any amendment being moved, as that raises a new question.

Rule 27. The mover of a motion or amendment shall in all cases have a right of reply, but otherwise no member shall speak more than once on the same motion or amendment, unless in explanation of some part of his original speech.

Miscellaneous.

Rule 28. Unless not less than two-thirds of the members of the board consent by signing a requisition, no subject once finally disposed of can be reconsidered within six months.

Rule 29. When any business, of which notice has not been given, is considered at a meeting, the decision recorded or resolution adopted at such meeting shall be of no effect unless and until it is confirmed at the next succeeding ordinary meeting, or at a special meeting called expressly for the purpose.

Rule 30. For the purpose of taking into consideration business involving many details the meeting may resolve itself into a committee of the whole body. When this has been determined on the rule prohibiting any person from speaking more than once shall be deemed suspended until the meeting resumes.

Rule 31. When a motion or amendment is put to the vote the President or the Secretary shall record against it, first the names of the members voting for it, and then the names of those voting against it.

Rule 32. Vote may be taken by voice or by show of hands, provided that if a poll be demanded by at least five members the votes of all members present who desire to vote shall be taken under the direction of the President. PART VI

Is introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly, and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 17th April 1936:—

L. A. BILL No. 22 of 1936.

A Bill to amend the Indian Medical Council Act No. XXVII of 1933.

WHEREAS it is expedient to amend the Indian Medical Council Act No. XXVII of 1933; It is hereby enacted as follows:—

Preamble.

Omit the word "Higher" in the preamble of the Act.

Short title,
extent and
commencement.

1. This Act may be called the Indian Medical Council Amendment Act, 1936.

2. It extends to the whole of British India.

3. It shall come into force on such date as the Governor General in Council may, by notification in the Gazette of India, appoint.

Constitution and
composition of
the Council.

In clause 3 (1) add new clause (d) as under:—

(d) One member from each province where a provincial register is maintained, to be elected from amongst themselves by persons enrolled in the Register.

Clause (d) of the old Act to be reconstituted as clause (c) and amended as under, if the latter provision in new clause (d) is not acceptable.

(c) Six members to be nominated by the Governor General in Council of whom three shall be License-holders and having been elected already by the All India Medical Licentiates' Association.

In the first schedule below Punjab University and as an additional item add:—

Medical Schools recognised by
the Provincial Governments.

Medical Diplomas recognised
by the Provincial Govern-
ments and the Provincial
Medical Councils.

STATEMENT OF OBJECTS AND REASONS.

Ever since the Indian Medical Council Act of 1933 came into force, the discontent among that large and important class of Medical Men known as L. M. Ps. had become deeper and deeper. This state of affairs cannot be allowed to continue long.

(2) It is but right that the All India Medical Council should be seized with the problem of setting right the medical standards in this country and unless this Medical Council for India exercises its central control and authority over Medical Education in Medical Schools, as it does at present with that of the University Medical Colleges, the Provincial Governments who are in sole charge of Medical school education are not likely in near future to bestow the desired and much needed attention.

(3) It is unimaginable that a vast body of Medical Men who are entitled to practise by law and statute of the Provincial Governments and who are recognised by the Provincial Medical Council as legally qualified Medical Practitioners should be denied their legitimate right of being included in the All India Medical Council.

(4) It is patent that if the Medical Council for India has to justify its title it must include within its scope the Medical Licentiates who form a preponderating majority of Medical Men with responsible official and public situations.

(5) It may be mentioned, the original intention as was proposed in the draft Bills previous to the passing of the Act in its final form, was to constitute a Medical Council in India in order to establish a uniform standard of qualifications in Medicine for all provinces, but that this laudable proposal was given up at the selfish behest of the General Medical Council.

It is therefore now proposed by the above amending Bill to make the Indian Medical Council Act No. XXVII of 1933 more comprehensive and equitable and make it acceptable to the Indian Medical profession. I strongly commend it for the favourable consideration of this Assembly.

ANUGRAH NARAYAN SINHA.

MR. RAJI,

Secy. to the Govt. of India.

Distribution of
offerings.

19. The distribution of offerings at the Durgah shall take place and all disputes relating thereto shall be decided in accordance with the decrees of the Civil Court.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to bring about a desirable change in the present constitution of the Committee of the Durgah Khawaja Sahib, Ajmer (formed under Notification No. 1811-A., dated the 1st June 1867, of the Honourable the Lieutenant-Governor of the North-Western Provinces under section 7 of Act XX of 1863 and printed at page 786 of the Ajmer Regulations, Volume M to P), by reducing the term of office of the members from life to five years and increasing the number of independent Muslim members in the Committee so as to provide for popular and effective control over the Durgah Hazrat Khawaja Moinud-din Chisti and the Endowments attached thereto, which have hitherto remained almost exclusively in the hands of persons themselves financially interested in the institution as attendants, servants or representatives of the office-holders of the shrine, and further to ensure the proper collection of income, disbursement of expenditure, maintenance and publication of the accounts and observance of discipline in the Durgah.

These changes cannot be brought about except by express legislation.

All such claims and objections shall be addressed to the Revising Authority and shall either be presented to the Revising Authority or to the Registering Authority or to the District or Subdivisional Magistrate of the district or subdivision to which the claimant or objector belongs or be sent by post to the Revising Authority.

Claims and
objections when
and how to be
made.

16. (1) All such claims and objections to the roll shall be made in forms II and III annexed hereto, within thirty days from the date of the publication of the roll under rule 14:

Provided that the Governor may, by notification in the Gazette, specify a shorter period within which claims and objections shall be preferred in respect of the electoral roll of any constituency.

Applications for the transfer of a name from the electoral roll of one constituency to that of another constituency are inadmissible. If any person desires such a transfer he shall prefer an objection to the inclusion of his name in the one roll and a second and separate claim for the inclusion of his name in the other roll.

(1) The Registering Authority, or in any case where the Registering Authority is a Commissioner of a division or the Member, Board of Revenue, Bengal, his agent employed under rule 10 shall, within the period specified in sub-rule (1) of rule 16, make an application to the Revising Authority for the making of any corrections in the roll—such as the removal of duplicate entries, or the expunging of the names of persons who are dead or subject to any legal incapacity—which he considers necessary to the preparation of a complete and accurate roll.

(2) The Revising Authority shall serve, on each of the persons affected by the application, a notice specifying the correction which it is proposed, to make in the roll and the place where and the time when objections to the proposed correction will be heard:

Provided that no such notice shall be served where the Revising Authority is *prima facie* satisfied that the application for correction should be granted or where the application is one for the correction of a clerical or printing error.

19. A register of all claims and objections shall be maintained by the Revising Authorities, the Registering Authorities, the District Magistrates and the Subdivisional Magistrates.

Register of claims and objections.

Except in the case where the Revising Authority is *prima facie* satisfied as to the validity of a claim, every person whose claim or objection is received in time shall be served with a notice in form IV by the Revising Authority specifying the place where and the time when his claim or objection will be heard, and directing him or his agent to be present with such evidence as he may wish to adduce.

20. When objection is made by any person to the inclusion of the name of any other person recorded therein, the Revising Authority shall, except in the case where such authority is *prima facie* satisfied as to the validity of the objection, serve on such other person a notice in form V annexed to these rules, giving the grounds on which the inclusion of his name has been objected to, and requiring such person or the agent of such person to attend at the place and time fixed for the hearing of the objection.

Notice of objections when to be given.

21. Every notice issued by the Revising Authority shall, if possible, be served personally, and in default of personal service, shall be served by registered post or by affixing a copy thereof at the residence within the constituency of the person concerned. A certificate of service, either personal or otherwise, shall be deemed to be conclusive proof of the fact of such service.

Service of notice.

22. At the time fixed for the hearing, the Revising Authority shall hold a summary inquiry into the claim or objection preferred, and shall record his decision. He shall also, after considering any verbal or written objections that may be preferred, decide on any application made by the Registering Authority for corrections to the roll. For the purpose of the inquiry the roll as published under rule 14 shall be presumed to be correct and complete until the contrary has been proved. No party shall be represented by any legal practitioner at any proceeding under this rule.

Inquiry into claims and objections by the Revising Authority.

23. The orders made by the Revising Authority shall be final and he shall communicate his decision to the Registering Authority and to the agent, if any, employed under rule 10, and such Registering Authority or agent shall cause the roll to be altered in accordance therewith. The Revising Authority shall also direct the Registering Authority, and such agent, if any, to correct any clerical or printing errors which he may himself discover in the roll.

Decision of the Revising Authority regarding claims and objections.

24. (1) The electoral roll so altered shall be republished in the manner specified in rule 14 and shall come into force from the date of such republication and shall remain in force for a period of three years after which a fresh roll shall be prepared:

Final publication of electoral rolls.

Provided that the Governor may, by notification in the Gazette, direct the preparation in accordance with these rules of a fresh roll at any time before the expiration of the said period.

(2) If a constituency is called upon to elect a member or members after an electoral roll has ceased to have force and before the completion of the new electoral roll, the old electoral roll shall for the purposes of that election continue to operate as the electoral roll for the constituency.

(3) Provision may be made for the sale of copies of the roll to the public.

Amendments to
electoral rolls.

25. (1) Notwithstanding anything contained in these rules any person may apply to the Registering Authority for the constituency concerned for the amendment of any electoral roll for the time being in force, and the Registering Authority on receipt of such application shall forward it to the Governor. The Governor may, at any time after any such application has been received in respect of an electoral roll, by notification in the Gazette, direct the preparation of a list of amendments thereto, and all the provisions of these rules shall apply in the case of every such list in like manner as they apply in the case of electoral rolls:

Provided that where any such application is made for the correction of an existing entry in the electoral roll and the Registering Authority is satisfied after personally hearing the applicant that the entry relates to the applicant and is erroneous or defective in any particular, he may amend the roll or cause it to be amended accordingly:

Provided further that where any such application is made for amendment of the electoral roll by the inclusion of the name of the applicant, the Registering Authority shall, on payment by the applicant of a fee of Rs. 10 make, subject to the general or special order of the Governor, such inquiry as he thinks fit and shall, if satisfied as to the validity of the applicant's claim, amend the roll or cause it to be amended accordingly.

(2) When any list of amendments has been republished under sub-rule (1), the electoral roll to which it relates shall be deemed to have been amended accordingly.

Part III—Custody and preservation of electoral rolls and other election papers connected therewith.

Custody and
preservation of
electoral rolls,
etc.

26. (1) The papers mentioned in column 1 of Schedule II hereto annexed shall be kept in the custody mentioned in the second column thereof for the period specified in the third column thereof, unless their retention is otherwise ordered by competent authority.

(2) One complete copy of the final electoral roll of each constituency shall be forwarded by the Registering Authority of each constituency, to the Keeper of Records, Bengal, through the Reforms Office, for permanent deposit in the Secretariat Record Room.

(3) Copies of final electoral rolls referred to in entry 3 of Schedule II deposited under sub-rule (1) and copies of such rolls deposited under sub-rule (2) shall, before deposit, be duly authenticated by the Registering Authority.

(4) Printed copies of final electoral rolls in excess of the number required for permanent record shall be also deposited in the case of a constituency other than the Calcutta General (Urban) constituency in the office of the Registering Authority of the constituency and in the case of the Calcutta General (Urban) constituency in the office of the Commissioner, Presidency Division. Spare copies of electoral rolls so deposited shall be available for sale to the public for a period of three years from the date of publication after which they will be sold as waste paper under the orders of the authority with whom they are deposited.

(5) The public shall have a right to inspect the election papers mentioned in Schedule II and to get attested copies thereof on payment of the fees laid down in the Bengal Records Manual, 1917, and in the rules for the management of the Secretariat Record Room.

Part IV—Special provision.

27. If any difficulty arises as to the preparation or publication of any electoral roll or of any list of amendments to any such roll under the provisions of these rules, or of the Act or any Order or other rule made under the Act, or of any Act of the Provincial Legislature, the Governor may by order do anything not inconsistent with such provisions which appears to him to be necessary for the proper preparation or publication of the roll.

CALCUTTA, THE 25TH MAY 1936.

RESOLUTION—No. 1723P.J.

The Governor in Council has had under consideration the extension of the system of the premature release of prisoners on the recommendation of the Advisory Boards appointed in Government (Revenue Department) resolution No. 2221, dated the 8th March 1924. In accordance with the terms of that resolution, the Boards consider the cases of non-habitual prisoners who have served a period of 2½ years including remissions and have completed two-thirds or more of their sentences. The Fourth All-India Conference of Inspectors-General of Prisons, held in 1929, recommended that the cases of all casual convicts undergoing substantive sentences of 3 years and over should be considered by the Advisory Boards when the prisoners have completed 2 years' imprisonment, or half their sentences, whichever is greater, excluding the period of remission. The Governor in Council has decided to accept this recommendation, with the modification that the period of remission will be taken into account in fixing the point at which the review of sentences should be considered. In the case of old and infirm prisoners, the limit of 2 years' imprisonment, or half the sentence, may be reduced at the discretion of the Boards.

2. In resolution No. 2868P.J., dated the 7th August 1933, reference was made to cases in which a prisoner might not have served the prescribed portion of his sentence at the time of the meeting of the Board, but might be due for release before the next meeting. The Governor in Council has decided that cases of this nature should be considered, so that if a prisoner is found otherwise suitable for premature release, the Board may recommend his release on completion of 2 years' imprisonment, or half the sentence, as the case may be.

3. For the purpose of calculating the period of 2 years' imprisonment, or half the sentence, the Superintendent of the Jail will, when examining cases for submission to the Advisory Board, take into account the remission actually earned and ordinary remission likely to be earned before the meeting of the Board and for a period of 6 months thereafter. In fixing the date of release, the Superintendent will take into account the total remission earned including all special remission, but the remission must not exceed one-third of the period actually spent in jail.

4. Resolution No. 2868 P.J., dated the 7th August 1933, is hereby cancelled.

By order of the Governor in Council,

24-Parganas.—No. 1979P. II.—25th May 1936.—In pursuance of rule 8 of rules for the preparation, publication and execution of projects for water-supply, sewerage or drainage by municipal authorities, it is hereby notified for general information that a joint scheme for the supply of water to the Baranagore and Kamarhati municipalities in the district of the 24-Parganas, has been approved by the Government of Bengal (Ministry of Public Health) and that the particulars of the said scheme are as follows:—

(1) (a) The joint scheme which is designed to supply 5 lakhs gallons of water per day to the Baranagore Municipality and 3 lakhs gallons of water per day to the Kamarhati Municipality, is divided into three sections as below:—

Section I—Baranagore Kamarhati joint head works.

Section II—Baranagore Distribution system.

Section III.—Kamarhati Distribution system.

The main delivery pipe from the joint pumping station will be divided into two pipes immediately outside the head works, one delivering water to Baranagore and the other to Kamarhati. Separate meters will be fixed on these two pipes just after the dividing point, the recording instruments being placed in a separate meter house. Should the meters or the recording instruments go out of order, the quantity of water supplied will be determined on the basis of the average of the meter reading or recording of the previous three months.

(b) The total estimated cost of the scheme (including the cost of the land acquisition) is Rs. 7,84,200 of which Rs. 5,08,600 will be borne by the Baranagore Municipality and the balance (Rs. 2,75,600) by the Kamarhati Municipality.

(c) The cost of maintenance of Section II will be met by the Baranagore municipality and that of Section III by the Kamarhati Municipality, while the maintenance cost of Section I will be borne by the two municipalities in proportion to the quantities of water supplied to their respective areas.

The total annual cost of maintenance of the scheme is at present estimated at Rs. 23,000 and assuming that the distribution of water between the Baranagore and Kamarhati municipalities will be maintained in the proportion of 5:3, Rs. 14,700 will represent the share of the Baranagore Municipality and Rs. 8,300 the share of the Kamarhati Municipality.

(d) The entire cost of the joint scheme will be met by loans from Government.

(e) and (f) The following statement shows the amount of loan, annual instalments by which the loan is repayable and the number of

years required to repay it in respect of each municipality:—

	Amount of loan.	Amount of each annual instal- ment.	Number of years required to repay the loan.
	Rs.	Rs.	
Baranagore	5,08,600	36,500	20
Kamarhati	2,75,600	19,832	20

(2) (a) The total annual charge of Rs. 79,332 to be incurred by reason of the water-supply is to be met by water rate.

(b) In the Baranagore Municipality the water rate is to be levied at 6 per cent. and in the Kamarhati Municipality at 7 per cent.

(c) The average incidence of such water rate per head of the population in the Baranagore Municipality will be Rs. 1.5 and that in the Kamarhati Rs. 75.

2. The joint scheme will be taken into consideration on or after the 26th June 1936, and any objection or suggestion with regard thereto, which may be received by the undersigned before that date, will be duly considered.

CALCUTTA, THE 25TH MAY 1936.

RESOLUTION—No. 1723P.J.

The Governor in Council has had under consideration the extension of the system of the premature release of prisoners on the recommendation of the Advisory Boards appointed in Government (Revenue Department) resolution No. 2221, dated the 8th March 1924. In accordance with the terms of that resolution, the Boards consider the cases of non-habitual prisoners who have served a period of 2½ years including remissions and have completed two-thirds or more of their sentences. The Fourth All-India Conference of Inspectors-General of Prisons, held in 1929, recommended that the cases of all casual convicts undergoing substantive sentences of 3 years and over should be considered by the Advisory Boards when the prisoners have completed 2 years' imprisonment, or half their sentences, whichever is greater, excluding the period of remission. The Governor in Council has decided to accept this recommendation, with the modification that the period of remission will be taken into account in fixing the point at which the review of sentences should be considered. In the case of old and infirm prisoners, the limit of 2 years' imprisonment, or half the sentence, may be reduced at the discretion of the Boards.

2. In resolution No. 2868P.J., dated the 7th August 1933, reference was made to cases in which a prisoner might not have served the prescribed portion of his sentence at the time of the meeting of the Board, but might be due for release before the next meeting. The Governor in Council has decided that cases of this nature should be considered, so that if a prisoner is found otherwise suitable for premature release, the Board may recommend his release on completion of 2 years' imprisonment, or half the sentence, as the case may be.

3. For the purpose of calculating the period of 2 years' imprisonment, or half the sentence, the Superintendent of the Jail will, when examining cases for submission to the Advisory Board, take into account the remission actually earned and ordinary remission likely to be earned before the meeting of the Board and for a period of 6 months thereafter. In fixing the date of release, the Superintendent will take into account the total remission earned including all special remission, but the remission must not exceed one-third of the period actually spent in jail.

4. Resolution No. 2868 P.J., dated the 7th August 1933, is hereby cancelled.

By order of the Governor in Council,

J. R. BLAIR,

24-Parganas.—No. 1979P. II.—25th May 1936.—In pursuance of rule 8 of rules for the preparation, publication and execution of projects for water-supply, sewerage or drainage by municipal authorities, it is hereby notified for general information that a joint scheme for the supply of water to the Baranagore and Kamarhati municipalities in the district of the 24-Parganas, has been approved by the Government of Bengal (Ministry of Public Health) and that the particulars of the said scheme are as follows:—

(1) (*a*) The joint scheme which is designed to supply 5 lakhs gallons of water per day to the Baranagore Municipality and 3 lakhs gallons of water per day to the Kamarhati Municipality, is divided into three sections as below:—

Section I—Baranagore Kamarhati joint head works.

Section II—Baranagore Distribution system.

Section III.—Kamarhati Distribution system.

The main delivery pipe from the joint pumping station will be divided into two pipes immediately outside the head works, one delivering water to Baranagore and the other to Kamarhati. Separate meters will be fixed on these two pipes just after the dividing point, the recording instruments being placed in a separate meter house. Should the meters or the recording instruments go out of order, the quantity of water supplied will be determined on the basis of the average of the meter reading or recording of the previous three months.

(b) The total estimated cost of the scheme (including the cost of the land acquisition) is Rs. 7,84,200 of which Rs. 5,08,600 will be borne by the Baranagore Municipality and the balance (Rs. 2,75,600) by the Kamarhati Municipality.

(c) The cost of maintenance of Section II will be met by the Baranagore municipality and that of Section III by the Kamarhati Municipality, while the maintenance cost of Section I will be borne by the two municipalities in proportion to the quantities of water supplied to their respective areas.

The total annual cost of maintenance of the scheme is at present estimated at Rs. 23,000 and assuming that the distribution of water between the Baranagore and Kamarhati municipalities will be maintained in the proportion of 5:3, Rs. 14,700 will represent the share of the Baranagore Municipality and Rs. 8,300 the share of the Kamarhati Municipality.

(d) The entire cost of the joint scheme will be met by loans from Government.

(e) and (f) The following statement shows the amount of loan, annual instalments by which the loan is repayable and the number of

years required to repay it in respect of each municipality:—

	Amount of loan.	Amount of each annual instal- ment.	Number of years required to repay the loan.
	Rs.	Rs.	
Baranagore	5,08,600	36,500	20
Kamarhati	2,75,600	19,832	20

(2) (a) The total annual charge of Rs. 79,332 to be incurred by reason of the water-supply is to be met by water rate.

(b) In the Baranagore Municipality the water rate is to be levied at 6 per cent. and in the Kamarhati Municipality at 7 per cent.

(c) The average incidence of such water rate per head of the population in the Baranagore Municipality will be Rs. 1.5 and that in the Kamarhati Rs. 75.

2. The joint scheme will be taken into consideration on or after the 26th June 1936, and any objection or suggestion with regard thereto, which may be received by the undersigned before that date, will be duly considered.

FINANCE DEPARTMENT.**RESOLUTION.**

Simla, the 16th May 1936.

Rules for the examination of candidates for admission to the Indian Audit and Accounts Service, the Imperial Customs Service, the Military Accounts Department and the Indian Railway Accounts Service.

No. F. 13 (3)-Ref./36.—In supersession of this department resolution No. F. 15 (6)-Ex. I/35, dated the 13th of April 1935, the following revised rules, which are liable to alteration from year to year are prescribed for the examination to be held in November 1936, for admission to the Indian Audit and Accounts Service, the Imperial Customs Service, the Military Accounts Department and the Indian Railway Accounts Service.

1. A competitive examination for admission to the Indian Audit and Accounts Service, the Imperial Customs Service, the Military Accounts Department and the Indian Railway Accounts Service, shall be held in India at such time as the Governor-General in Council may direct.

2. The maximum number of candidates to be admitted to the examination may, at the discretion of the Governor-General in Council, be limited to such number, not being less than 200, as the Governor-General in Council may decide. If the number of candidates exceeds that limit, the Public Service Commission shall select from among the applicants those who shall be admitted to the examination and in doing so shall have regard to the suitability of the applicants and to the adequate representation of the various provinces and communities of India.

3. (i) A candidate who is in the permanent service of the Government shall apply to the Public Service Commission for admission to the examination through the head of his office, who shall forward his application to the commission through the Government concerned unless he refuses his consent to the application.

(ii) A candidate who is not in Government service or is employed in Government service only in a temporary capacity at the time that he submits his application, shall apply to the Public Service Commission through the proper authority of the area in which his parents reside at the time of submitting his application, or have resided for a period of not less than three years, or in which the candidate has himself resided, otherwise than as a student, for a like period. A Government servant who is employed in a temporary capacity should, however, before submitting his application, obtain in writing the permission of the Head of the Office or Department in which he is employed and attach it to the application.

(iii) The proper authority for a Governor's Province shall be the Local Government of that Province; for Coorg, Delhi, Ajmer-Merwara, or British Baluchistan, the Chief Commissioner; and for a State in India the Political Officer or Agent who must be addressed through the Government of the State.

(iv) No candidate may make more than one application in respect of any one occasion on which an examination is held.

4. A candidate must be a male and either:—

(a) a British subject of Indian domicile whose father (if alive) is a British subject or a subject of a State in India, or (if dead) was at the time of his death either a British subject or a subject of a State in India or a person in the permanent service of the Crown or a person who had retired from that Service; or

(b) a ruler or a subject of a State in India:

Provided that in the case of a male British subject the requirements of this rule may be waived by Government if satisfied that their observance would occasion exceptional hardship, and that the candidate is so closely connected by ancestry or upbringing with His Majesty's Dominions as to justify special treatment.

Provided also that a ruler or a subject of a State in India cannot be appointed unless he has obtained the declaration required under Section 96A of the Government of India Act.

5. Candidates must have attained the age of 22, and must not have attained the age of 25, on the first day of August 1936.

Provided that a candidate who is over the age of 25 and under the age of 28 on that date may be admitted to the examination if he—

(a) holds substantively a permanent appointment in a Department or Office administratively connected with the Service which he seeks to enter or in an Office or Department subordinate thereto, and

(b) is recommended by the Head of his Department.

6. A candidate must satisfy the Public Service Commission that his character and antecedents are such as to make him suitable for appointment to the public service. No candidate who is in the employment of the Central or of a Local Government will be admitted to the examination, unless the Head of his Department reports that his character and attainments are satisfactory.

7. The decision of the Public Service Commission as to the eligibility or otherwise of a candidate for admission to the examination shall be final.

8. A candidate must be a graduate of one of the Universities enumerated in the first appendix to these rules or hold the Senior Diploma of the Mayo College, Ajmer.

Provided that, in exceptional cases, the Public Service Commission may, on the recommendation of the Central Government or a Local Government, treat as qualified a candidate who, though he has not any of the foregoing qualifications, has passed examinations conducted by other institutions of a standard which in the opinion of the Commission justifies his admission to the examination.

9. No candidate shall be admitted to the examination unless he holds a certificate of admission from the Public Service Commission.

10. No recommendations except those invited in the form of application will be taken into consideration. Any attempt on the part of a candidate to obtain support for his candidature by other means may disqualify him for admission.

11. Candidates must pay the following fees:—

A.—To the Public Service Commission—

(i) Rs. 7-8-0 with the application form.

(ii) Rs. 75-0-0 immediately on receipt of an admission certificate from the Public Service Commission.

No claim for a refund of these fees will be entertained.

Candidates are required to pay their medical fees in cash to the Medical Boards concerned at the time of their medical examination.

12. The examinations will be conducted by the Public Service Commission in the manner prescribed in the regulations in the second appendix.

13. (a) A list of competitors, in the order of proficiency as disclosed by the aggregate marks finally awarded to each competitor, shall be prepared by the Public Service Commission.

(b) Subject to the provisions of the Home Department Resolution Establishments No. F. 14/17-B./33, of 4th July 1934, appointments up to the number required will be made in the order of merit disclosed by the list prepared by the Commission, provided that sufficient candidates are found by the Commission to be qualified by examination and are considered by the Governor-General in Council to be duly qualified in all other respects.

(c) The Governor-General in Council shall assign successful candidates to the various services on a consideration of all circumstances, including any personal preference expressed by the candidates.

14. A candidate must be in good mental and bodily health and free from any physical defect likely to interfere with the discharge of his duties as an officer of Government. A candidate who is found after examination by a Medical Board not to satisfy these requirements will not be appointed. GOVERNMENT OF BENGAL.

ocal Self-Government Department.

al Self-Government (Municipalities).

ALCUTTA, THE 1ST MAY 1936.

RESOLUTION—No. 3062M.

ster-in-charge: The Hon'ble Sir Bijoy Prasad Singh Roy, Kt.

he number of municipalities and revision of boundaries.—The number of municipalities remained unchanged at .. There was no noticeable variation in the actual limits of any municipality during the year. The boundaries of some

of the townships in the district of the 24-Parganas were, however, revised mainly in order to correct discrepancies noticed during the recent survey and settlement operation between the notified boundaries of the municipalities and the boundaries of the areas actually administered.

Elections.—The first general elections under the provisions of the Bengal Municipal Act, 1932, were held in 50 municipalities. The general election which occurred in the hill municipality of Kurseong was under the old Act of 1884, as the new Act had yet to come into force in the district of Darjeeling. These elections did not pass without incidents. The general election of the small borough of Gobordanga had to be set aside on account of irregularities. Election in the South Suburban Municipality had to be postponed under special orders of Government on account of

defective procedure. The election of commissioners of the Chittagong Municipality had also to be put off on account of serious defects in the preparation of electoral rolls.

The elections showed, on the whole, a very keen interest on the part of the ratepayers in the exercise of municipal franchise. Polling was unnecessary only in two municipalities, namely, Barrackpore and Khardah, and in certain stray wards of other municipalities. Four wards sent over 90 per cent. of the voters to the polls while 38 wards spread over 20 municipalities polled 80 per cent. of the total number of voters. Only in two wards did the percentage fall below 50, the lowest being 45.1 in a ward in the Bhatpara Municipality. The Commissioner of the Rajshahi Division reports that there were no contests or only lukewarm contests in respect of seats reserved for the Muhammadan community.

Municipal meetings.—The total number of meetings held fell from 2,809 to 2,524. While the municipalities in the other divisions record slight increases in the number of meetings, those in the Burdwan Division convened only 348 meetings, as against 778 in the previous year. The Commissioner has found himself unable to find any reason for this very marked falling off in municipal activity; it will however be hardly fair to draw any moral as unnecessary multiplication of meetings far in excess of the statutory minimum of 12 is not always an indication of real interest in public affairs.

The small township of Bansheria in Hooghly continues to hold the largest number of meetings held by any municipality, while at the other extreme the two municipalities of Murshidabad and Netrokona held the smallest number of meetings.

The attendance of commissioners at meetings was on the whole fairly satisfactory. The average attendance in three municipalities exceeded 80 per cent., while in 16 others the percentage was over 70. In 15 municipalities only half the number of members failed to attend on an average.

Thirty out of the 40 meetings held by the municipality of Pirojpur had to be adjourned or failed for want of quorum. The municipality of Pabna which held 41 meetings had to put off 13 of them for one reason or another.

The number of adjourned meetings increased from 210 to 309 and the number of meetings which failed to do business for want of quorum also rose from 90 to 113.

Ratepayers and population.—The total number of ratepayers fell from 346,520 to 344,747, the ratio to total urban population, according to the census of 1931, being 15.01 against 15.09 in the preceding year. While slight increase in the number of ratepayers, and consequently in the percentage of ratepayers to population, is reported from the Burdwan and Presidency Divisions, the other three divisions record a falling-off. The decrease in the number of ratepayers in Jalpaiguri is reported to be due to the introduction for the first time of the rate on holdings under the Bengal Municipal Act, 1932, in lieu of the rate on persons. The percentage of ratepayers to population was highest at Kumarkhali (43.6 per cent.) and lowest at Bhatpara (3.2 per cent.).

As usual the mill municipalities of the Burdwan and Presidency Divisions constitute the majority of the townships in which rates are paid by less than a tenth of the population.

Rates and taxes.—The yield of rates and taxes rose from Rs. 68.81 lakhs to Rs. 71.16 lakhs. The incidence of taxation per head of the total municipal population was Rs. 3-1-2. In 1923-24, the incidence was Rs. 2-12-5. It rose gradually reaching the peak figure of Rs. 3-8-10 in 1929-30. Thence it fell gradually down to Rs. 2-15-11 in the year preceding that under review. There were large variations in the actual incidence of taxation in individual municipalities. Darjeeling, as usual, headed the list with an average of Rs. 13-0-6; the other hill municipality of Kurseong returned an average of Rs. 8-11-9. In the plains, Howrah returned the figure of Rs. 7-10-4 followed by Dum Dum with Rs. 6-13-10. At the other end can be cited the petty borough of Sonamukhi with an average of Re. 0-9-9 and Debbhatta which taxed its residents to the extent of only Re. 0-5-7 per head.

Revision of assessment was made in a number of municipalities with mixed results. In Howrah, a consolidated rate was levied under the provisions of the Calcutta Municipal Act as extended to this municipality. The tax on persons was replaced by a rate on holdings according to the provisions of the

New Municipal Act in Kotchandpur, Barisal, Jalpaiguri and Bogra. The result in the last two municipalities was a marked loss of income. The general revision of assessment in certain other municipalities produced notable gains. Bankura added Rs. 17,964 to its income followed by Midnapore with Rs. 8,103. By imposition of a conservancy rate, Bally made an increased income of Rs. 13,032. Addition of Rs. 11,775 to the municipal revenue of Bhatpara was due to the full benefit of the lighting tax imposed in the latter half of the preceding year.

Partial revision of assessment accounted for an increase of Rs. 13,096 in Dacca. In Comilla, however, such partial revision resulted in a loss of Rs. 6,143 attributed to fall in the value of holdings owing to economic distress.

Collections.—Some improvement was noticeable in the matter of collection of dues by municipalities. The total collection increased from Rs. 66.65 lakhs to Rs. 69.28 lakhs; the percentage of collections to current demand also rose from 88.8 to 92.8. The accumulated arrears of past years, however, take away from the value of this improvement. The increased income was shared by all divisions, the increase in the municipalities of the Burdwan Division (Rs. 124 lakhs) being most marked. The number of boards which collected more than 100 per cent. of their demand was 18 while the percentage fell below 80 in 13 municipalities.

The small municipality of Sherpur collected 131.1 per cent. of its demand, being followed by Bajitpur (120.4 per cent.) and the small borough of Old Malda (118.3 per cent.).

Among the larger municipalities, Dacca with a percentage of 110.9 holds pride of place. Asansol, English Bazar and Kurseong also shared the distinction of collecting 100 per cent. and over.

The mill municipality of Garulia as in the previous year collected the whole demand and left no outstanding balance.

The record is marked by lamentable failures in many other towns. Noakhali collected no more than 68.4 per cent. of the current demand. Among those townships which showed noticeable deterioration were Rangpur, Rajshahi and Comilla.

Various excuses are put forward on behalf of municipalities for bad collections. Satisfactory collection in a number of municipalities furnishes the strongest refutation of these excuses. The total remission of rates, arrear and current, rose by nearly half a lakh to Rs. 5.1 lakhs. The percentage of remissions on the current demand for the whole province was 6.8 against 6.2 in 1932-33 and 6.0 in 1931-32. Large remissions were granted by Howrah (Rs. 1,66,197), Dacca (Rs. 38,947), Bally (Rs. 13,671), and Bankura (Rs. 11,803); a few others also exceeded the ten thousand mark. The ratio of total remissions to current demand varied largely. The municipality of Rajpur remitted more than one-third of its current demand; Seraiganj with its record of remissions ran it close with a percentage of 30.7. The small municipality of Debhatta wrote off one-fifth of the demand and the remissions in Chandrakona, Sherpur (Mymensingh), Kotchandpur and Satkhira amounted to considerably more than one-fourth. On the other hand, Garulia made no remissions and the municipalities of Meherpur and Joynagar remitted less than 1 per cent. The wastage of municipal revenues which these figures of remissions indicate is obvious particularly as remissions have been reported to be not infrequently made on flimsy or inadequate grounds.

The outstanding balances increased from Rs. 28.53 lakhs to Rs. 28.82 lakhs. The only municipalities which showed no outstanding balance were Garulia, Bhadreswar and Dhulian. Baraset, on the other hand, had outstanding arrears which exceeded the amount of its current demand. Panihati closed the year with arrears representing 95 per cent. of its current demand after remission of more than 16 per cent. of the demand. Rangpur carried over Rs. 60,402 or 91.29 per cent. of the annual demand. The Howrah Municipality, as usual, had the largest outstanding balance, namely, Rs. 9,14,277. Next comes Dacca with Rs. 1,83,695. Arrears in Mymensingh and Chinsura also exceeded Rs. 1 lakh. A list of all the municipalities which had undoubtedly large balances would be too heavy for inclusion in this review. Accumulation of these heavy balances can only be partially attributed to the continued economic depression and is often due to inefficiency in collection.

Income and expenditure.—The total receipts, with the opening balances, amounted to Rs. 114·9 lakhs against Rs. 112·9 lakhs in the preceding year, the increase occurring mainly under the head "Municipal rates and taxes". The total Municipal expenditure also rose from Rs. 99·7 lakhs to Rs. 101·6 lakhs, the increase being distributed over the heads "Public instruction" and "Miscellaneous". The aggregate balance to the credit of the municipalities at the close of the year was Rs. 13·29 lakhs as against Rs. 13·24 lakhs in the previous year. Conspicuously large balances were held by Darjeeling (Rs. 1,51,770), Dacca (Rs. 1,48,740), Baranagar (Rs. 58,995), Burdwan (Rs. 56,352), Budge-Budge (Rs. 49,155), South Dum-Dum (Rs. 26,957), Bhatpara (Rs. 26,415) and Khulna (Rs. 23,121). Baranagar has the bulk of the balance earmarked for its water-supply scheme while the balances nursed by the latter four municipalities are really funds set apart for town improvement. Numerous municipal bodies failed to keep the minimum working balances, and a number ended with little or nothing in hand. For instance, Sonamukhi closed the year with Rs. 3 in its till. Bhola had Rs. 66 only left while several others had equally insignificant reserves. A very disquieting feature is that the outstanding liabilities of a large number of these townships far exceeded the closing balances, which would have been wiped out in some cases several times over had any attempt been made to meet these debts. Baraset closed the year with a few hundred rupees while its liabilities amounted to 78·1 per cent. of its current hundred rupees while its liabilities demand. Several others had debts which exceeded or nearly equalled half of their demand.

Among the larger municipalities Mymensingh had a balance of Rs. 9,653 while its liabilities were as much as Rs. 62,518 or 45·17 per cent. of the annual demand. Dinajpur owed Rs. 21,243 on current bills but wound up the year with an actual balance of Rs. 7,923 only.

The financial difficulties of these boards are not due to capital outlay but to the tendency of recurring charges to exceed the recurring income while arrear bills are allowed to accumulate. The obvious remedy, as the Commissioner of the Rajshahi Division suggests, is to take stock of the position as regards outstandings at the time of framing the budget and make systematic provision

for at least part payment of old debts and arrear bills even if this means drastic cuts in expenditure in other directions.

Education.—The educational expenditure including a Government subvention of Rs. 1·28 lakhs, rose from Rs. 5·25 lakhs to Rs. 5·53 lakhs. This general rise was shared by all divisions. The expenditure on primary education also showed a corresponding increase of about Rs. 21,000. The Howrah Municipality which is in a class of its own spent Rs. 67,686 on elementary education. Dacca spent Rs. 27,645 which included a contribution of Rs. 14,006 towards primary schools. The Narayanganj Municipality spent Rs. 16,442 for education and maintained a free public library and seven free primary schools. The marked increase in expenditure in Burdwan was due to a grant of Rs. 5,000 to the local municipal high school. Asansol paid a lump grant of Rs. 1,000 towards construction of buildings for primary schools.

The Rajshahi Municipality introduced a system of free primary education and opened two primary schools during the year.

The municipality of Naihati opened a municipal school for girls. The South Suburban Municipality made increased grants to primary schools and spent more on free primary schools.

The Chittagong Municipality the most progressive of all municipalities in the matter of education deserves separate and honourable mention. It spent 31·2 per cent. of its ordinary income on education. Out of an aggregate expenditure of Rs. 68,996 on education, the commissioners contributed Rs. 27,355 from their own fund. Primary education cost Rs. 39,408 of which Rs. 22,242 was spent by the municipality.

The scheme of the municipality for primary education for girls received the sanction of Government last year. Female education received, as the Commissioner puts it, such a powerful stimulus that the only high school for girls was unable to absorb the overflow and make-shift classes up to the Matriculation Standard had to be opened in two primary schools to accommodate the surplus.

On the whole elementary education, which is the concern of municipal bodies, received adequate attention. Only 5 municipalities (viz., Darjeeling,

Mymensingh, Uttarpara, Garulia and Dum-Dum) failed to achieve the minimum proportion of 3·2 per cent.

Water-supply.—The total expenditure on water-supply was Rs. 10·90 lakhs against Rs. 14·90 lakhs in 1932-33 showing a decrease of Rs. 4 lakhs.

These figures vary markedly as individual schemes are completed or accounted for. Adjustment of the advance made to the Public Health Department in Midnapore (Rs. 3·38 lakhs) accounts for the bulk of the decrease. Narayanganj also shared in the decrease to the extent of Rs. 34,252 having completed the waterworks on the east bank of the Lakhya in the previous year. The expenditure in Barisal was less by Rs. 15,761 owing to heavier payments made last year by way of adjustment of accounts with the Public Health Department. A number of municipalities in the Presidency Division increased their expenditure on water-supply mainly by sinking tube-wells.

The Tollygunge and South Suburban municipalities continued to obtain supplies of filtered water from the Calcutta Corporation main at fixed charges; but the supplies being inadequate to meet the increasing demand, they had to be supplemented by tube-wells. In Bhatpara the water-supply scheme forms part of the town improvement scheme. Differences arising over the terms of agreement with the mill authorities about granting of private connections are reported to have been settled. The commissioners have also accepted Mr. Griffin's decentralised storage scheme. But the revised rules regarding private house connections are still to be adopted. A revised scheme for water-supply in Hali-shahar based on the assistance guaranteed by the authorities of the Hukum Chand Mills has been drawn up and is under consideration.

The Baranagar Jute Mills supply filtered water to a part of the town of Baranagar. This supply being insufficient tube-wells have been sunk in different parts of the town. This municipality has under examination an independent water-supply scheme.

The Dacca waterworks with 51 miles of pipe line supplied 16 gallons per day per head of population. There was an increase in the number of street hydrants and private house connections. At

Narayanganj, while the new waterworks solved the problem of water-supply on the east bank, the whole scheme of improvement of the west bank could not be taken up for want of funds; a part of the scheme has however been completed. A scheme for the improvement of Mymensingh waterworks is under detailed examination by Government.

The Chandpur Municipality submitted a project for improvement of the waterworks in a section of the town but failed to obtain administrative approval of Government owing to defects in the scheme.

The scheme for Jalpaiguri (Mr. Griffin's decentralised storage scheme) was under execution and made considerable progress under the supervision of the Public Health Department. The Electric Company which is to supply the power failed however to keep pace but has made up lost ground since the close of the year. Pipe laying and erection of distributing tanks were nearly completed in the main streets. Government paid their subsidy and the district board will complete their quota during the current year. A loan of Rs. 20,000 is under notification.

The Rajshahi waterworks scheme made little headway. The principal donor, Maharani Hemanta Kumari of Puthia, being unable to contribute the balance of the promised contribution, has entered into an arrangement to pay an annual contribution of Rs. 5,000 agreeing to increase the payment as soon as the economic depression lifts.

The scheme for pipe water-supply at Pabna also remained at a standstill as the zeminders of Taras who had promised a contribution of half a lakh expressed their inability to pay anything for the present. The Public Health Department has since drawn up a reduced scheme estimated to cost Rs. 83,000. The finances of the municipality are in too unsatisfactory a state to make the project of a loan from Government or in the open market feasible.

A scheme for improvement of water-supply of the Dow Hill area in the Kurseong Municipality has been prepared by the Public Health Department at an estimated cost of Rs. 12,000. It is now under the consideration of the commissioners.

The waterworks in all municipalities worked satisfactorily on the whole. Frequent inspections were held by the

Chief Engineer and his staff. The water was subjected to frequent analysis and invariably found safe for drinking.

The water-supply at places other than those at which there is pipe water-supply is by means of masonry wells, tube-wells and tanks. Several municipalities sank small tube-wells and constructed masonry wells to improve their water-supply.

Conservancy and drainage.—The total expenditure on conservancy rose from Rs. 22·64 lakhs to Rs. 28·99 lakhs and exceeded the receipts on this account by Rs. 14·26 lakhs. The deficit was met as usual from the general fund by most municipal bodies which appear generally to shirk any serious effort to make these special funds self-supporting by raising the rates or cutting down expenditure. There is however this much to be said for them that while the old latrine fees bore only the charges for cleansing the private privies and cesspools, the rest of the expenditure for conservancy being met from the general fund, the consolidated rate has now to defray all expenses of cleansing latrines, urinals and cesspools as well as those of general conservancy. It is also a fact that in most municipalities the arrangements for conservancy cannot by any means be said to be lavish or even moderately satisfactory.

Nevertheless the conservancy rates have been pitched unduly low in many cases and the commissioners should not hesitate to increase the rates whenever possible even up to the maximum limit in order to prevent the drain on the general funds which involves sacrifice of other vital services.

The largest increase in expenditure occurred in Bhatpara (Rs. 6,35,565), but this was due to transfer of drainage charges to this head. Titagarh, on the other hand, showed a decrease of Rs. 12,316 owing to larger expenditure incurred during the previous year for the sewerage extension scheme. In the Burdwan Division there was a decrease in expenditure amounting to Rs. 30,765 which was mainly due to economy and retrenchment by some municipalities. There were however increases in expenditure in Baidyabati and Uttarpara Municipalities due to extension of conservancy provisions throughout the municipal area. Bally purchased more carts and cattle during the year. No

satisfactory explanation has been furnished for the heavy increase of Rs. 20,784 in Dacca. The payment of arrear bills of fodder, purchase of a motor lorry and making of additional arrangements for the removal of night-soil from the Military Camp were responsible for an increase of Rs. 7,849 in Mymensingh. The expenditure rose by Rs. 2,530 in Barisal due to the purchase of a new motor lorry for watering the streets. On the other hand, the decrease of Rs. 3,081 in Faridpur was due to the fact that some bills could not be paid for want of funds. In Chittagong the contract system of removal of night-soil by bullock carts worked satisfactorily. Two motor lorries also on contract system were engaged for the removal of town refuse at a cost of Rs. 8,500 per annum. This municipality also reconstructed a public latrine on sanitary lines and metalled a portion of the road leading to the trenching ground. The Darjeeling Municipality spent Rs. 7,187 more than in the previous year on original conservancy works. Road-watering by motor lorry was in vogue in the Rangpur and Jalpaiguri Municipalities and the municipality of Dinajpur sank a number of shallow tube-wells for road-watering purposes. The township of Malda still continued without a latrine system although it had passed long ago a resolution to introduce latrines.

The reports of public health experts of Government indicate that in most municipalities conservancy work is far from efficient. The trenching grounds are either insufficient or sewage sick. The provision for night-soil depots is unsatisfactory and inadequate. The methar service is also said to be far from adequate for the needs of these towns. The methar problem is difficult to solve, the supply being unequal to the demand. Besides, this monopolist labour is hardly tractable. But other improvements in order to remedy the present unwholesome state of things and to increase sanitary amenities can be effected without difficulty.

Drainage.—The total expenditure on drainage fell from Rs. 7·09 lakhs to Rs. 3·27 lakhs. Of this decrease Bhatpara alone accounts for Rs. 3,31,760. The reason given is that the charges on account of drainage were debited to the conservancy rate fund and figured under head "Conservancy." This decrease was therefore rather apparent than real. As the Commissioner has pointed out separate account should have been kept

or purposes of statistics. Naihati showed a marked decline in expenditure as it had constructed extensive drains in the preceding year. Payment of an outstanding bill and arrangement for flushing drains in the previous year are ascribed as the reasons for the big fall in expenditure on drainage in the Suri Municipality. Noticeable increases occurred in Krishnagar, which extended its drainage to another ward, and in Banaghat, which built pucca drains. The increase of Rs. 7,589 in Dacca is attributed to the payment of outstanding bills and construction of some drains. While all divisions shared the decrease in expenditure Rajshahi alone showed a small increase on its generally small outlay.

Nothing was however done towards carrying out any of the large schemes which some of the important municipalities have had in view for some time.

The drainage scheme for Dinajpur remains where it was. The latest reduced scheme is roughly estimated to cost slightly over a lakh. The commissioners of this municipality in which the drainage has been described by Mr. Robertson as a blot on civilisation declared themselves unable to bear any share of the cost and asked Government to make a gift of the whole cost of the scheme.

The English Bazar Municipality has practically abandoned the project for improvement of drainage owing to lack of funds. Lack of resources no doubt stands in the way of ambitious schemes of drainage in most municipalities, but as pointed out by the Commissioner of the Rajshahi Division the commissioners and executives of municipalities would be well advised to pay greater attention to small remedial measures involving only moderate outlay and not much skilled supervision which would improve the public health and amenities of the town much more than other more spectacular schemes. What is needed chiefly in the rural municipalities is not the substitution of pucca for kutchra drains but a careful taking of levels with a view to preventing drains becoming waterlogged.

Lighting.—The expenditure under this head amounted to Rs. 6,90,335 against Rs. 7,03,308 in the previous year. Increases of expenditure in Bally (Rs. 4,504) and Asansol (Rs. 1,463) were due to electric lighting,

while in Hooghly-Chinsura and Serampore they were due to the payment of pending bills. Darjeeling is the only municipality which holds its own licence. The new 3 phase 50 cycle supply is reported to have led to decided improvement and attracted industrial loads. Works of further improvement have also been taken up and are progressing rapidly. Electric lighting was extended in the Kurseong Municipality and this is reported to have resulted in a great improvement in the amenities of the town. The electrification of Jalpaiguri is making good progress and is reported to be nearing completion. The principal streets of Rangpur continued to be lit by electric lights, there being kerosene lights in lanes and by-lanes. There is electric lighting in the centre of Serajgunj town, but the prospects of the private company are reported to be far from satisfactory owing to dearth of private custom. At Pabna the prospect of electrification of the town had made no headway since the licensee became bankrupt. Khulna has a scheme of electrification in hand. The Dacca Municipality increased its electric lights from 807 to 926. The Chittagong Municipality also added to its electric lights. Lighting arrangements continued to be unsatisfactory in some important parts of the town of Comilla.

Public health.—The municipal bodies gave increasing attention to the important municipal duty of taking suitable measures for the improvement of public health especially for preventing and controlling epidemics. Most towns returned a fairly clean bill of health.

Epidemics of smallpox, generally mild, are reported to have broken out in a few towns and the municipalities claim to have checked them by prompt and adequate measures. The epidemic was however severe in Bogra and the district board had to come to the aid of the municipality, practically taking over the work of fighting the epidemic.

Vaccination and revaccination were carried out systematically and measures were taken by most municipalities to vaccinate and revaccinate children. Free home vaccination was resorted to by a large number of municipalities in the 24-Parganas most of which employed permanent vaccinators. A few municipalities employed female vaccinators for purdah ladies. Temporary vaccinators were also employed by some municipalities when occasion demanded.

As regards malaria and kala-azar, there are reports from all parts of the province of activity in filling up insanitary tanks, cutting down jungles and kerosinising of ditches, pools and tanks. The wider powers conferred by the new Act on municipalities in this direction were brought into use by several bodies with more or less satisfactory results. Measures were also taken by several municipalities of which Jessore deserves special mention in eradicating water-hyacinth. In the Presidency Division the anti-malarial societies did excellent work in co-operation with local municipalities. The Palli Mandali of Birnagar undertook preventive and curative schemes against malaria as in previous years with the co-operation of the local municipality and with financial assistance from Government.

Berhampore continued to maintain one leprosy and two kala-azar centres for free treatment of patients and the leprosy clinics at Krishnagar and Nabadwip were fairly well attended. The Dacca and Chittagong Municipalities also started free leprosy treatment centres.

The Nabadwip Municipality by opening a maternity home and orphanage in connection with the local Lodging House Committee continued to do useful work. Training classes for dais were maintained at Krishnagar and Nabadwip.

The Burdwan Municipality organised a Baby Show with the help of the district board and also held a Health Welfare Exhibition. The municipality of Kurseong started a health association for health education and propaganda among the ratepayers. The town has been divided into 13 groups, each group being placed under the control of an honorary organiser. The municipal Sanitary Inspector visits each group by turn and hold talks by means of charts and posters and distributes leaflets. This example may be profitably followed in the larger plains municipalities.

There were 68 prosecutions under the Food Adulteration Act in the Presidency Division of which 66 ended in conviction, while in the Dacca Municipality alone 393 prosecutions were instituted. Eighty-seven prosecutions were instituted in that town against vendors for exposing food-stuffs of contamination by dust and insects. In Chittagong there was a noticeable improvement in the quality of food-stuffs

as a result of strict administration of the Food Adulteration Act. Varying interest in this respect was displayed by the municipalities in the Rajshahi Division where the number of prosecutions totalled 73 of which 71 ended in conviction. Darjeeling Municipality instituted 34 cases. The small municipality of Gaibandha prosecuted 18 cases while Rangpur and Jalpaiguri had only 6 cases each to their credit. The above record shows, with few exceptions, half-hearted work in place of an unrelenting drive against adulteration of food-stuffs.

Public works.—Expenditure on public works which had shown a slight rise in the previous year increased from Rs. 10.40 lakhs to Rs. 11.75 lakhs. The local bodies were allotted shares from the proceeds of the Motor Vehicles Tax for the first time during the year, to supplement their normal expenditure on roads.

The shares were calculated on the basis of metalled and unmetalled roads within each municipality adhering at the same time to a fixed ratio of distribution between municipalities and district boards. Individual shares varied from Rs. 25,000 given to Howrah in the shape of a special grant, to Rs. 100 in respect of the smallest municipal bodies. A not inconsiderable amount in the aggregate was however made available for improvement of roads and this addition to the receipts explains the bulk of the increased expenditure during the year.

The municipality of Dacca spent Rs. 46,906 more than in the preceding year aided by a grant of Rs. 11,438 from the Motor Vehicles Tax Fund and a further subsidy of Rs. 6,000 for tarmacadamising the roads in the residential area of Purana Paltan Khasmahal.

Tollygunj and Baranagore, the two important suburban municipalities, assisted by the auxiliary grant from the Motor Vehicles Tax Fund paid more attention to communications which had been allowed to deteriorate. Payment of outstanding bills accounted for an increase of Rs. 9,251 in Comilla. The large increase in expenditure under this head in Chandpur (Rs. 12,613) was owing to adjustment of advance for land acquisition and thorough repairs of metalled roads and metalling of earth roads.

The Darjeeling Municipality spent a large amount on painting its roads. Jalpaiguri tarred and shingled the principal roads of the town. Rajshahi

treated some of its roads with bituminous emulsion. Dinajpur took up a programme of colfixing some of its principal streets.

Noticeable increase in expenditure on buildings occurred only in South Suburban Municipality which built a new municipal office.

Audit.—The Accountant-General's Local Audit Department audited during the year under review the accounts of all municipalities in the Presidency with the exception of 5, viz., Debhatta, Netrokona, Kishoregunj, Noakhali and Faridpur.

There was the usual crop of embezzlements or defalcations. In South Suburban Municipality a collecting sircar misappropriated Rs. 10,000 and was convicted on trial.

Two cases of embezzlement by collecting sircars were discovered in Dacca. In one case the amount was recovered and the offender dismissed. In the other the culprit has been suspended and attempts are being made to realise the money. At Khirpai, a case of temporary embezzlement was detected in audit. The tax daroga and the accountant were fined. At Vishnupur, an embezzlement of a petty sum was discovered and the prosecution ended in conviction.

The embezzlement case in Netrokona reported last year is still proceeding.

The case of defalcation at Sirajgunj is interesting. The *modus operandi* adopted was to issue receipts to ratepayers for the correct amount but to write up the carbon copy by a clever manipulation showing a realisation of a much smaller amount due from a different ratepayer who may not have paid anything at all. The realisations of subsequent quarters were also shown as pertaining to the immediately preceding quarters in the carbon copy by some sort of ingenious adjustment. Similar defalcation by the same method has been committed by two sircars only a few years ago.

There was a serious case of theft in the Darjeeling Municipality. The office of the Market Superintendent was broken into and a fairly large sum of money, viz., Rs. 1,144-11, being collections from the market, stolen. There was, it appeared, no arrangement for guarding the office. The amount has been written off. Arrangements have since been made for daily remittances to the bank or the central office and for better custody of the market safe.

The audit notes, while they show considerable variations in the efficiency of different municipal offices, repeat the same story of easily remediable defects and irregularities from year to year.

The value of these audit notes, which serve to show up the slack and weak points of administration and often indicates the line of improvement, can hardly be said to be appreciated by most municipalities. On the other hand their indifference to accounts is illustrated by the chronic delay in dealing with these audit reports.

The machinery for accounting and financial control is below the normal standard in most of these local bodies. Considering the simple nature of municipal accounts, the carefully prepared account rules and the system of regular audits, there is no reason why improvement in this respect should not be possible by means of regular and careful supervision.

General remarks.—The first chapter of municipal history under the Bengal Municipal Act of 1932 has but barely commenced, the year under review being the first complete year in which municipal bodies worked under the new Act. As was natural in such a large piece of legislation, points of varied importance calling for adjustment or interpretation presented themselves. An urgently needed amendment regarding the franchise was put through during the year.

The boards are passing through difficult times. Finance is the greatest obstacle which lies in their path, and lack of funds has prevented, with few exceptions, any striking advance in the activities of municipalities.

Government, while appreciating that the routine administration of the municipalities has been carried on fairly well, view with some apprehension the reports of the local officers commenting on the reluctance of the municipal authorities to undertake unpopular duties such as necessary increase in taxation, on the prevailing neglect of rules and canons of finance, and on the failure of a very large number of these bodies to recover taxes and arrears or to meet outstanding debts.

It was considered inevitably necessary to assume control of the budget in some municipalities and to take over collection and assessment departments in a few others. Warnings had also to be administered to some other municipalities that Government would be compelled to have recourse to supersession unless

they put their affairs in order within a given time. While Government are naturally reluctant to interfere in the internal administration of these self-governing bodies, they have a definite responsibility in the matter and cannot but step in in case of continued and serious maladministration.

RESOLUTION - No. 90T.A.1.

Minister-in-charge: The Hon'ble Nawab Sir Mohiuddin Farouqi, Kt., of Ratanpur.

Read—

Annual Reports of the Civil Veterinary Department, Bengal, and
of the Bengal Veterinary College for the year 1934-35.

I. Civil Veterinary Department.

The year under review was one of the cyclic years in which the incidence of mortality of cattle from epidemic diseases was high. Rinderpest alone was responsible for 18,513 deaths, the number of outbreaks being 732. The disease was fairly widespread in North and West Bengal while with the exception of Bakarganj, East Bengal was practically free. There was also a substantial increase in the death rate from Anthrax, the number being 1,437 against 329 in the year 1933-34.

The usual programme of preventive inoculation was carried out in 890 outbreaks and about 2 lakhs animals were inoculated with satisfactory results; the death rate among the protected animals being as low as 0.82 per cent. for the whole province.

The striking results which have been obtained by the substitution of the Goat Tissue Vaccine method for the "Serum alone" method have proved beyond doubt that this method is the most effective for a campaign against Rinderpest. The Vaccine Depot which was started temporarily in 1933 was continued throughout the year. It is hoped that with the establishment of the depot on a permanent and organised basis, it will be possible to ensure an unfailling supply of Goat Tissue Vaccine, which is gaining in popularity amongst the cattle owners.

In addition to the inoculations carried out during the year, the veterinary assistant surgeons working in the mufassal visited 17,600 villages and treated 153,780 cases against 16,068 and 152,673 in the preceding year.

During the year under review 4,604 scrub bulls unsuitable for breeding purposes were castrated against 3,193 in the previous year. The increase in the number is an indication of the interest taken by the people in the improvement of their stock of cattle.

His Excellency acting with the Minister-in-charge notices with pleasure the names of officers of the department who did good work during the year and desires to acknowledge the efficient way in which Mr. Kerr and Khan Sahib S. S. Ahmad discharged their duties.

II. Bengal Veterinary College.

The popularity of this College which is the only institution in Bengal for the training of veterinary practitioners continued unabated as can be seen from the increasing demand for admission into the College. The number of students on the rolls at the beginning of the session was 203 of whom 170 prolonged their studies throughout the session, the number for Bengal being 66 against 60 in the year 1933-34. The results of the diploma and annual examinations were satisfactory.

The Governor acting with the Minister-in-charge is pleased to acknowledge the services rendered by Mr. MacGregor in the administration of the College and notes with pleasure the names of members of the College staff who did good work during the year. His thanks are also due to the non-official members of the Committee of Management for the services rendered by them.

Resolution on the Report of the Committee appointed to enquire into the charges for electrical energy levied by the Calcutta Electric Supply Corporation, Limited.

GOVERNMENT OF BENGAL.

Commerce Department.

CALCUTTA, THE 4TH MAY 1936.

RESOLUTION -No. 3345 Com.

Read—

Report of the Committee appointed to enquire into the charges for electrical energy levied by the Calcutta Electric Supply Corporation, Limited.

In its resolution No. 7760Com., dated the 26th July 1935, the Government of Bengal appointed a Committee to enquire into and to advise Government on the question of the charges levied by the Calcutta Electric Supply Corporation, Limited, for electrical energy.

The report of the Committee has been printed and is now obtainable from the Superintendent, Government Printing, Bengal Government Press, Alipore.

2. The Governor in Council desires to record his appreciation of the care and thoroughness with which the Committee has conducted its investigation.

3. The conclusions of the Committee regarding the charges levied by the Company in connection with supplies of electrical energy to consumers are summarised in Chapter VII of the report. For the information of those to whom the report of the Committee is not immediately available the summary of the Committee's conclusions is reproduced below :—

(1) The present charges levied by the Company for energy supplied to large industrial power users are controlled by competition and we have no proposals to make in regard to these charges.

(2) The nett charge for energy supplied for domestic purposes, for lights, fans, house service pump motors and lifts should be reduced from 2·5 annas to 2 annas per unit.

(3) The nett charge for energy for heating, cooking and refrigeration and all domestic purposes other than lights, fans, house service pumps and lifts should be reduced from 1 anna to 0·75 anna per unit.

(4) The charges for energy supplied for advertising signs, theatres and cinemas are related to the charges for domestic supplies and adjustments may be necessary if reductions are made in the charges for domestic supplies.

(5) The charge for energy for battery charging should be reduced from 1·25 annas to 1 anna per unit.

(6) Reductions in the charge for energy supplied under special agreements and for public lighting will follow the reductions proposed in the charges for domestic supplies.

(7) The present scale of rebate or discount allowed by the Company should be revised and so adjusted that the difference between the nett and gross rates does not exceed 10 per cent. approximately.

(8) The present minimum charge of Rs. 1-8 per month should be reduced to 12 annas per month if it is not possible to abolish the charge altogether.

(9) The charges levied for energy supplied to small industrial power users should be reduced. The revision which the Company propose to make in the rate applicable to this class of consumers will reduce the average charge to 1 anna per unit.

(10) The possibility of making some reductions in the cost of service connections should be considered by the Company.

(11) The monthly hire charge for ordinary consumers' meters should be reduced from 8 annas to 4 annas, but higher charges may be made for exceptionally expensive meters.

(12) We are of opinion that the reduction in the rates and charges which we have summarised above can be made at once and for the reasons given in our report, we consider that further reductions will be possible in the near future.

4. Advance proof copies of the report were forwarded to the Company with the request that Government might be informed to what extent the Company were prepared to give effect to the reductions recommended by the Committee. A memorandum containing the observations of the Board of Directors of the Company has been received by air-mail and is published as an annexure to this resolution.

5. It will be seen that the Company propose to give immediate effect to the following reductions:—

(1) The nett charge for energy supplied for domestic purposes, for lights, fans, house service pump motors and lifts will be reduced from 2·5 annas to 2·25 annas a unit.

(2) There will be a corresponding reduction in the charges for energy supplied for advertising signs, theatres and cinemas.

(3) The charge for energy for battery charging will be reduced from 1·25 annas to 1 anna a unit.

(4) Reductions in the charges for energy supplied under special agreement and for public lighting will follow the change in the domestic rate.

(5) The present minimum charge of Rs. 1-8 per month will be abolished.

(6) The revised rate referred to in paragraph 97 of the Committee's report for small industrial power users will be introduced as soon as the maximum demand meters are available.

The estimated sacrifice of revenue entailed in the reductions detailed above amounts to nearly £150,000 a year against £225,000 that the Committee estimated as the total fall in revenue which would result from the complete acceptance of its proposals.

By order of the Governor in Council,

E. N. BLANDY,

Secretary to the Government of Bengal.

ANNEXURE.**Memorandum from the Board of the Calcutta Electric Supply Corporation, Limited.***I.—Introductory.*

1. The Board of Directors of the Calcutta Electric Supply Corporation, Limited, in submitting the following observations on the report of the Committee which was appointed to enquire into the charges levied by the Company for electrical energy, desire in the first place to express their recognition of the care and thoroughness of the enquiry, and the ample opportunity which the Committee afforded to the representatives of the Company to explain the working of the Company and to deal with the outside evidence which the Committee received. It is a matter of much gratification to the Board that the Committee has recorded so favourable a verdict on the conduct and methods of the Company's business, and particularly that it has rejected many irresponsible and unfounded charges which had been brought against the Company. In addition to dealing with the main question referred to them, viz., the charges levied by the Company for the supply of electrical energy, the Committee has made a number of suggestions for the future administration of the Company's business. Some of these have already been engaging the attention of the Board; others will demand and receive examination. The Directors will not delay their reply for a full examination of all the suggestions and criticisms made by the Committee, but submit at once this expression of opinion on their conclusions with regard to the charges levied by the Company. The present memorandum is accordingly confined to the question of those charges, including all matters which have a bearing thereon.

2. The kernel of the problem which was before the Committee was the propriety or otherwise of the net flat rate charged to domestic consumers. The present domestic flat rate of 2½ annas per unit was attacked in evidence before the Committee as excessive. The contention of the Company on the other hand was that, whether intrinsically or in comparison with other similar undertakings anywhere, the rate is extremely moderate. The Committee apparently concurred in the view that the rate is moderate, but they held that on the normal profits of the Company calculated on the basis of the 1934 accounts, there is room for further reduction, and they recommended that the domestic flat rate should be reduced at once to 2 annas per unit.

3. As a general comment on this conclusion, the Board wish to make their position clear. It has been their continuous policy to reduce their charges concurrently with the growth of the business; ample evidence of this can be seen in the past history of the Company. Before any question of an enquiry arose, three lines of advance in this direction were engaging the consideration of the Board. Along one of these lines indeed a distinct advance had already been made. The Board had submitted for the sanction of the Government, a proposal for the revision of the tariff applicable to the industrialist who uses electrical energy of low or medium pressure (Rate "E" in the Company's Rate Book). The Board subsequently extended the scope of this proposal to cover concerns operating under Rate "D". They are glad to note that the Committee has endorsed these proposals and accepted them as a sufficient and satisfactory measure of relief in the case of the smaller industries. As the majority of possible consumers of this class are already connected to the Company's system, it will be recognised that the measure entails a considerable sacrifice of revenue.

4. The second line of advance has reference to the domestic flat rate. Although this had been reduced from 2¾ annas to 2½ annas per unit on the 1st January 1935, it had become evident that, by reason of the great increase in the industrial high tension load, a further reduction was in sight. Had it not been for the appointment of the Committee of Enquiry, which naturally precluded any changes in the Company's tariff, this reduction would have been made before now. The third measure centred round the establishment of a new super-station at Mulajore. With a reduction of the high tension rates (Rate "A" in the Company's Rate Book) which are now being considered, the Company looks forward to an expansion of its business with a large increase in output, all of which would tend to the lowering of the domestic rate. The question of the high tension rates will be referred to again later in this memorandum. Meanwhile, the Government will observe that the Company has been mindful of the interests of all its consumers. Cheaper electricity to the industries, both great and small, on which the prosperity of Calcutta depends, is as much a service to the community as a small concession in the price of the domestic supply. And the more the industrial load develops, the greater is its contribution towards the cheapening of the domestic supply.

II.—The Committee's Recommendations.

5. The Committee has taken a somewhat different view, both of the Board's duty and of the public interest, and its method of approaching the question is as follows. In the first place, it establishes a figure of immediate surplus profits such as would, in its opinion, justify a reduction in charges by approximately £225,000 a year, as

compared with the tariff of 1934 (when the flat rate was still 2½ annas). In the second place, the Committee advises that this reduction should be devoted exclusively, though in various forms, to the relief of the domestic consumer and the small power user.

6. In working out what it considers ought to be the annual profits of the Company on the present tariffs, the Committee takes the actual accounts of 1934, and makes a number of alterations which will be examined in some detail below. It then assesses the yield which it considers the Company may fairly expect on the capital sunk in the business; and by whatever amount its notional figure of profits exceeds this figure, it regards that amount as a surplus which can and should be returned to the consumer by reductions in the charges. The theoretical yield which the Committee considers fair is 7 per cent. on the net capital (paragraph 78); and the net capital it takes as being equivalent to the fixed assets of the Company, less its depreciation account balances (paragraph 31), or approximately £4.6 millions. The considerations which led the Committee to adopt these figures are not stated. Based upon existing money rates—and seemingly this was the underlying consideration—there might be some justification for a ratio of 7 per cent. But it must not be overlooked that the bulk of the Company's capital was raised during the past 25 years at rates far in excess of those prevailing to-day. A rate suitable for a Company established under present day conditions is hardly suitable for a Company long established and developed under conditions materially different from those now obtaining. The Board are informed that, for electrical undertakings in England, 7 per cent. is an average normal figure, with 6 per cent. as the minimum. If allowance be made for the additional risks of an electrical undertaking in India, 9 per cent. is the lowest rate which could fairly be assumed in the case of this Company. (In the recent Lahore enquiry, it would appear that upon a calculation similar to that which is now being discussed, the ratio accepted as suitable was 7½ per cent. *free of income tax.*)

7. The second reason why the Directors cannot accept the calculation of the Committee is that a Company cannot live on its fixed assets alone. For the purposes of the calculation which the Committee had in mind, it is imperative to allow for working capital, debtors, stores, etc., as well as for sums raised in connexion with plans for early expansion of the business, and not yet invested in it. According to the Board's estimate, at least half a million sterling must be added for these purposes; and thus the fair return to which the Company considers itself entitled, is 9 per cent. on £5.1 millions and not 7 per cent. on £4.6 millions (paragraph 78), or nearer £460,000 than the £323,000 on which the Committee found its conclusions. The difference is serious and affects the whole argument; but the Board cannot conceive that the arbitrary pronouncement of the Committee and the summary and imperfect reasons in support of it in paragraph 78 will meet with the approval of the Government. Should the Government concur in the contention of the Company on this point, the Board are prepared to adopt it as the basis of their policy in the future.

8. An examination must now be made of the method by which the Committee arrived at its conclusion that as much as £225,000 of the existing surplus, based on the 1934 figures, can be utilised for the purpose of reducing charges. This figure they reach by making certain changes in the accounts; the revenue is written up, and the expenditure and appropriations from revenue are written down. In dealing with the revenue the Committee rightly excluded one abnormal item; but the Board do not consider that there is justification for disallowing any provision for bad debts. The Committee seemed to be under the impression that there is some hidden reserve or fund to meet the losses on this account, which is not the case. With about 64,000 consumers, a large proportion of whom are constantly changing residence, bad debts are inevitable, notwithstanding all the safeguards, and in the Board's opinion some allowance must be made. The figure of £5,000 a year is not unreasonable. In dealing with the expenditure, the main items which the Committee have written down relate to obsolescence and general reserve. As regards the obsolescence of spare parts in stores, the Board cannot understand why a recurring charge of this nature should be entirely disallowed, especially as the Committee advises it being spread over several years. The reasoning here is confused, and the Board must maintain a provision of at least £5,000 under this head.

9. The question of General Obsolescence is more serious. The Committee considers the normal provision for depreciation to be "in no way excessive" (paragraph 55) and recognises that it has "failed to meet fully the requirements in the past" (paragraph 58). But it regards the additional provision for obsolescence as over-generous. The Board cannot share that view. The reasons for the Company's present policy were set out in a document which the Committee has printed in Appendix III of its report (*vide* pages 75-6). The statement of the case was brief, and does not seem to have impressed the Committee. It appears necessary therefore now to explain the policy in more detail.

10. At the outset it should be understood that the provision made for depreciation and obsolescence is settled, year by year, on the requisition of the auditors of the Company. To them accordingly the Board have referred the Committee's proposals for opinion. The reply, so far as it is directly relevant, may be quoted:—"The suggestion of charging the ½ per cent. obsolescence fund on written-down values shows a failure to appreciate the outstanding necessity for a flat rate on original cost to correct

the inherent weakness of depreciation on written-down values." (This being the system now practised.) "Rather than advise adoption of a cut in the obsolescence allocation, we would recommend, wherever possible, depreciation on a percentage of prime cost.....As to the allocation of £20,000 made last year in respect of Cossipore, the Directors of the Company will probably find it absolutely necessary to set a similar amount aside again, as it is known now that Cossipore must be reduced to a lower status."

11. As is implied in this quotation, the depreciation and the obsolescence provisions hang together; and their adequacy is not a matter of expediency or of secondary importance to any of the other claims on the business. Still less are they, as some of the Committee's witnesses argued, a device for hiding away profits. The first essential of a sound undertaking is that its manufacturing capacity should not be allowed to deteriorate, and the provision of ample funds for this purpose is a primary responsibility resting on those who are answerable for the conduct of the business and who alone are in a position to decide whether the provision is adequate or not. In this Company, that responsibility has been a constant anxiety with the Directors; for the special risks to which delicate electrical plant is exposed by the Calcutta climate have to be added to the rapidity with which the machinery generally is superannuated by the developments in electrical science. The expectation of life on which our depreciation percentages are based has, in several important instances, proved unduly sanguine, and in particular it is becoming plain that the percentages should be struck on the original cost of plant and not, as is the present practice, on its written-down value.

12. The whole question of the adequacy of the accumulated depreciation account is being examined; but it is a long and difficult question. In order therefore to meet the more obvious imperfections of the system, the obsolescence provisions were started a few years ago. The fact stressed by the Committee that the actually realised obsolescence averages only £21,000 a year is no possible guide to the proper allowance for plant which is still in commission and is rapidly approaching the end of its economic life. As it is now a practical certainty that the large and fully equipped Cossipore Station will have to be reduced to a stand-by, special provision for amortising the initial cost of its equipment has become an absolute necessity; the ordinary ratios of depreciation would be wholly inappropriate. It may be that, when the whole subject has been thrashed out by the Company's accountants, there will be a readjustment between the depreciation and the obsolescence figures; but any diminution of the total aggregate at present would be false economy in the interests both of the Company and of the consumer; and the Board cannot agree to it.

13. Examining next the General Reserve, the Committee considers further appropriations to it to be unnecessary on the grounds that the Company's total reserves are nearly 25 per cent. of the Block Account, and that, after this year, they will be "much more than what is normally provided for undertakings of this kind." For this latter judgment the Board have been unable to find confirmation. Electrical undertakings with extended tenures may build up their reserves more slowly; but in the circumstances of this Company the ideal of a 25 per cent. reserve is a matter of simple commercial prudence; and its policy in this respect has carried weight in financial circles in London and has materially helped in the obtaining of cheap and abundant capital for the business, a point to which the Board must invite the Government's special consideration.

14. To the Committee's argument that a point has almost been reached where our reserves are equivalent to 25 per cent. of our Block Account, the Board emphatically demur. Apart from the plain fact that the Block Account is rapidly growing, the Committee only reached its conclusion by lumping together (I) the General Reserve, (II) the reserve against reduction of rates, and (III) the debentures sinking fund. As regards the first item, it has recently, in the Company's balance sheets, included a sum of £515,049 which represents premiums that were paid on ordinary shares. This sum has been entirely utilised in financing the Company's development. The propriety of including these premiums in the Reserve Fund has now been questioned by the Company's auditors, who hold that this amount is just as much a part of the capital of the Company as are the shares and loan. On this view—which accords with recognised practice in England—the General Reserve at the end of 1934 amounted to only £729,056. The second item is obviously meant to serve a specific purpose, and is earmarked for that purpose. The third item is not available for any purpose whatsoever except the redemption of the debentures; and although, on redemption, it will be transferred to one or other of the reserves, that may not happen for a considerable number of years, and it is wholly premature to regard the sinking fund as available, now or in the near future, for any emergency which would make a call on our General Reserve. The Board cannot, therefore, whether in the interests of the proprietors or of the consumer, cease to build up the General Reserve at present. They are willing, however, to adopt a slower pace of accretion, and to adopt as a standard appropriation a figure of approximately £25,000 after the present year.

15. There remain the Insurance and Retiring Gratuity Funds. To the former the Board do not propose further appropriations until necessity arises for strengthening the fund. But the Committee's suggested reduction of appropriations to the Retiring Gratuity Fund is inadvisable. As time goes on and the business grows, the

number of senior officials, both British and Indian, steadily increases; and the Board are satisfied that the normal annual charges on the fund will average, in the near future, at least £6,500 a year. It would be unwise to attempt a nominal saving here.

16. It will be seen from the foregoing that it is not possible, working on the figures for 1934, to make available for reduction in rates a sum of the magnitude proposed by the Committee, and thus to reduce the domestic rate to 2 annas a unit. The Board, however, recognise, and they are sure that the Government will appreciate, that in a concern like this, where both the operations and the policy are steadily developing, too much stress cannot be laid on the figures of any single year, though the method employed in this respect by the Committee was clearly safer and fairer than the attempting of forecasts. The Board, however, are engaged, and will continue, in endeavours to budget for the future, with a view to deciding when, and what, further relief can be given to consumers generally.

17. This leads to a consideration of the scope of relief. The Committee definitely excluded the H. T. power rate from participation in any benefits now to be distributed. Its conclusion in this respect does not give sufficient consideration to the part played by the industrial load in the development of the Company's business. There seems to be a considerable impression that the profits from the H. T. supply are negligible in comparison with those derived from the domestic flat rate; and indeed it was alleged in evidence that the domestic consumer is penalized for the benefit of the large power user. The Board desire to remove these misconceptions. Recent years have shown a marked development in the receipts from H. T. power consumers and a gradual reduction in the domestic rate; from which it might be inferred that the profits derived from the industrial supply have been constantly rising and constitute an increasingly large proportion of the annual profits. The Board, however, have minutely examined the facts and analysed the results; and a statistical examination shows that there is a striking closeness between the percentage of profit derived from the power unit and that which is derived from the domestic unit. True it is that the profit on the H. T. unit is but a small fraction of an anna; but that small fraction multiplied many million times means many lakhs of rupees. In truth the profits from the flat rate paid by domestic consumers come to little more than half of the total profits. This in itself is sufficient justification for declining to assent to the Committee's recommendation in favour of refusing to the H. T. consumer any share in such relief in rates as is possible. Furthermore if the Committee's suggestion means that the immediate financial future of the Company is to be mortgaged solely for the benefit of consumers other than the large industries, then it would involve a serious misconception and a narrow outlook. The prosperity of Calcutta and its people depends so much on the large industries that all assistance given to them is a service to the community far exceeding small concessions here and there in the price of domestic necessities. And furthermore, it cannot be too forcibly represented that important extensions of our supply, such as go to the big industries, mean increased output, reduced overheads, and consequently a powerful contribution towards the cheapening of the private consumers' supply. This has been demonstrated so often and so clearly in the history of the Company that it hardly needs emphasizing, were it not for the general refusal to recognise it in the evidence taken by the Committee. The Board must therefore continue to regard their plans for a reduction in H. T. power rates as soon as the developments now in progress are sufficiently advanced, as essential to the interests of the Company and all classes of consumers.

III.—The Board's Proposals.

18. With this necessary explanation, the Board can now represent to the Government how far they consider it reasonable and safe that they should go in meeting the recommendations of the Committee as summarised in paragraph 142 of the report.

(a) *Domestic flat rate.*—This rate has already been reduced to 2½ annas per unit, with effect from the 1st January 1935. The Board are prepared to reduce it further to 2½ annas per unit at once, as well as to make certain other reductions in charges which will be set out below. But to take the further plunge and go down to 2 annas is more than the Board consider can safely be undertaken until they see their way more clearly than they do at present.

(b) *Special charges and public lighting.*—As is elsewhere explained, certain reductions in special contract charges and public lighting charges will automatically follow the change in the domestic rate.

(c) *Cooking, heating, etc.*—The charge for cooking, heating, refrigeration, etc., presents difficulties which were not brought before the Committee. Plans for meeting these difficulties are actively engaging the Calcutta staff, and as soon as they are successful, the Board will readily bring the rate down to 75 of an anna. In the meantime, they would prefer that the question of reduction be deferred until they have had a further opportunity of investigating the matter.

(d) *Battery charging.*—Although no argument is advanced for the change the Board have no objection to reducing the rate for battery charging from 1½ annas to 1 anna per unit.

(e) *Minimum charge.*—The Board have also no objection to abolishing the minimum charge of Rs. 1-8 per month levied under clause 27 of their Rate Book.

(f) *Rebates.*—The complaint against the rebate on the gross rates of the Rate Book was the most unreal of all the grievances which the Committee entertained. The gross rates and the rebates are simply a means of encouraging consumers to pay, with reasonable punctuality, for electric energy *which they have already used*.

The Committee suggests 10 per cent. as an adequate margin between gross and net rates; but the Board can hardly believe that a rebate of $\frac{1}{4}$ anna, for example, would be an effective incentive to the punctual payment of a net charge of $2\frac{1}{2}$ annas. The Board, however, have no desire to be obstructive in the matter, and are ready to accept a gross rate which will always be one-half anna higher than the net rate for the time being.

(g) *Meter rents.*—The only other important conclusion is a reduction in meter rents. To what the Committee has said in its examination of this question (paragraphs 100-109) the Board have little to add, except that the figures in paragraph 106 include nothing for supervision charges or a share in the general management expenses. The Board have no desire to make a profit out of meter hiring; but the proposed reduction of the monthly rental from 8 annas to 4 annas will mean that the department for testing and conditioning meters will be working at a loss. If, however, it will tend to greater contentment, and if the Government are satisfied that it will not establish an embarrassing precedent for smaller Indian undertakings which are more dependent on meter rents than this Company is, the reduction may be made at once.

(h) *Small power users.*—The important reduction in the rates for small power users, which apparently meets with the Committee's approval, is being introduced as soon as the instruments for recording the maximum demand can be procured and installed.

19. The Board have no desire whatever to appear obstructive or to postpone measures for the relief of the consumers as and when such measures can be safely introduced. The lines on which the Committee would have them proceed are inconsistent with the safety at which the Company has always aimed. The Committee makes inadequate provision for possible contingencies—rise in prices, wages, cost of coal, shorter hours in industrial working, fluctuations in exchange, etc. etc. It gives no recognition to the fact that capital while money is cheap is being raised for extensive developments which will take several years to come into bearing. It differentiates unreasonably between consumers. There is some danger of its proposals shaking the credit which the Company, for the good of all concerned, occupies in the investment market. This position has been built up over a series of years, with the result that the Company has a reputation for stability which stands it in good stead when cheap and abundant capital has to be obtained. It would be a serious matter both for the Company and the Calcutta public if the Company's good name in this respect were imperilled by any precipitate change. With their more intimate knowledge of the Company's business and affairs, it is not unreasonable to assume that the Board must be in the best position to arrive at responsible decisions regarding the general policy of the Company's undertaking, while striking a fair and even balance between all interested parties. But it is the considered opinion of the Board that the recommendations of the Committee, so far as they exceed the limits to which the Board have intimated their willingness to go, are inadvisable and risky, having regard to all facts and circumstances relative to the Company's position at the present time.

II. (1) *Capital and Income*.—The capital of the Institution consists of a permanent investment of Rs. 10,67,000. in 3½ per cent. stock certificates together with a temporary investment of Rs. 30,673-6-0 as detailed below:—

(1) Rupees 17,000 in 4½ per cent. loan of 1955-60.

(2) Rupees 5,500 in 5 per cent. loan of 1939-43, the scrip of which is all held by the Imperial Bank of India.

(3) Rupees 3,173-6-0 at 1½ per cent. in the Savings Bank Account of the Imperial Bank of India.

(4) Rupees 5,000 at 2½ per cent. as fixed deposit with Lloyds Bank, Ltd.

(2) The temporary investment from savings thus stood at the end of the year at Rs. 30,673-6-0 as compared with Rs. 34,599-8-0 in 1934.

(3) The total interest obtained in 1935 was Rs. 35,354-1-2 against Rs. 38,397-14-11 in 1934 and Rs. 38,200-4-0 in 1933. In addition there was a refund of Rs. 4,000 transferred from the Savings Bank Account to the current account and Rs. 3,166-3-0 on other accounts as well as Rs. 410-0-0 as contributions from parents, and Rs. 118-3-0 as interest in the Savings Bank Account, making the total income for the year Rs. 43,048-7-2, as compared with Rs. 42,912-6-11 in 1934.

(4) The amounts received as interest, etc., were kept with the Imperial Bank of India, and in November 1935 it was found necessary to transfer Rs. 3,000-0-0 from the Savings Bank Account of the Imperial Bank of India to the current account, and to retain the Rs. 5,000-0-0 at 2½ per cent. in fixed deposit with Lloyds Bank, Ltd., with a view to re-investment at favourable rates.

The year opened with a balance of Rs. 8,108-11-7, and closed with a balance of Rs. 16,210-9-3. This balance includes the sum of Rs. 8,173-6-0 in the Savings Bank Account, Imperial Bank of India, and on fixed deposit with Lloyds Bank, Ltd.

(5) The following table shows the progress of expenditure during the last five years as compared with the income:—

(6) From the above summary it will be seen that the financial position of the fund is steadily improving. Further investments have not been possible during the year owing to banks not accepting fixed deposit for short periods, and if the policy is pursued of striking off the names of wards whose work is unsatisfactory there will be during the next few years, an annual surplus of income over expenditure for investment. This may ultimately enable the Governors to consider the possibility of raising the present age limit of 17, and assisting more girls to take University Examinations or some special training.

(7) The number of wards on the 31st December, for each of the last five years, will be seen from the table given below:—

1931.	1932.	1933.	1934.	1935.
93	95	84	97	99

(8) Four wards were withdrawn during the year. Up to the date of writing of this report (25th March 1936) 9 of the total of 99 wards on 31st December left. At the time of writing there are therefore 90 old wards plus 16 newly elected wards or 106 wards in all, as compared with 103 on the same date in 1935.

III. (1) *Election to vacancies, etc.*—The annual election of wards was held on Monday, the 2nd December 1935. On that date 10 vacancies were anticipated before 1st January 1936, but it had previously been decided to advertise 15 vacancies, and 102 applications were received. These were considered by a sub-committee consisting of (1) the Revd. Father F. Keyeux, S. J., (2) the Ven'ble Archdeacon E. J. Young, (3) the Revd. C. H. Archibald, (4) Mrs. W. A. Burns and (5) Mr. R. Wolfenden, Inspector of European Schools, Bengal (Convenor), and on their recommendation 15 girls were elected. Of the 15 girls elected (against 16 in the previous year) four were placed in the Pratt Memorial School, three in the Loreto Convent, Entally, one in the Convent of St. Joseph's, Kalimpong, three in St. Thomas' School, Kidderpore, two in the Calcutta Girls' High School, one in the Loreto Convent, Asansol, and one in St. Michael's Diocesan Girls' School, Darjeeling. Out of the three girls placed on the reserve list one was given a vacancy which was reported later and placed in the Calcutta Girls' High School, thus bringing the number of new wards in 1936 to 16.

(2) As favourable medical and school reports were received regarding the 8 girls elected in 1934, their election was confirmed by the Governors.

(3) Of the 13 girls who left during the year under report:—

one was withdrawn on the expiration of the extension granted to her,

two were withdrawn by their parents,

two on expiration of the extension granted to them for completing the Commercial Course at the Y. W. C. A., and

eight on completing 17 years.

(4) Of the 6 girls who left during the year 1934, three took up shorthand-typing with a view to employment. One joined the Civil Hospital, Amritsar, as a probationary nurse. One was withdrawn by her parents who left Calcutta on the retirement of the father from the Railway, and another was reported to be employed as a child's nurse.

(5) At the close of the year the 99 girls on the rolls were distributed as follows:—

(6) The following table gives particulars as to the class and religion of the wards at the close of the year:—

(3) Those who have both parents alive ..	9	6	3	18

V. (1) *Education and maintenance.*—nature of the education imparted to the wards continued to be that prescribed for a higher grade school under the Code of Regulations for European Schools in Bengal, but at more than half the total number of wards read in secondary schools.

2) The Governors are anxious that Bruce wards should become useful citizens when they leave school and have accordingly asked Visiting Governors to make, in consultation with the school authorities, definite proposals where this seems desirable for trainees who have attained or about to attain age of 14, so that the last three years of their school life may be spent to the best advantage and be a preparation for earning a living.

3) The following are the only successes of Bruce wards at Public Examination that have been reported up to the date of issue of this report:—

One passed the Senior Cambridge Examination and two the Junior Cambridge Examination. One passed the Higher Local Practical and Theoretical Examinations of the Trinity College of Music, one the Junior and obtained Honours in the Theoretical Examination, another the Practical Senior (Trinity College)—Piano, and one the St. John's Ambulance First Aid.

4) Under the rules a ward is not ordinarily allowed to remain on the Foundation after age of 17, when an outfit grant of Rs. 100 is given to enable her to make a start in life, in cases where wards wish to be trained as teachers, and have the support of the school authorities, or when some special training is recommended, or when a ward is preparing for a higher examination, such as the Intermediate Arts of Commercial Course Examinations, and in the event of a ward being well-advanced on, some extension of the period of benefit is generally allowed. Nine wards were granted extensions during the year under report, one up to the 31st March 1937, another up to the 30th November 1937 for training as a teacher, one up to the 30th June 1937, one up to the 30th September 1936, two up to the 31st December 1936, to appear in the Junior Cambridge, another up to the 30th September 1936 to take a commercial course and two others up to the end of the school year in 1936.

5) The average monthly cost for the actual education and maintenance of each ward amounted to Rs. 25-2-9 against Rs. 26-2-0 in the preceding year. If all expenditure in connection with the Trust be included the figures are Rs. 28-4-5 and Rs. 29-8-0 respectively.

(6) The amounts paid under the different heads of expenditure were as noted below:—

V. *Inspection.*—Mrs. W. A. Burns was appointed Visiting Governor for the first half and the second half of the year 1935 to visit schools—chiefly those in Calcutta—who have Bruce wards. Mrs. Burns visited all the schools in Calcutta and saw the wards in each of them. She was very much impressed with the healthy appearances of the girls and the great care taken of Bruce wards by those in charge. Mrs. Burns desired to place on record the deep interest taken by those in charge of the five Calcutta schools containing Bruce wards, and the attention and care given to them. All the Bruce girls are in good health and happy, and in most cases doing well.

VI. *Meetings.*—Four meetings were held during the year, and among the resolutions passed the following may be noted:—

That the following rule be substituted for the existing rule 14 of the rules of the Bruce Institution:

44. The Governors may, however, at their discretion permit a ward to be so educated or maintained after her seventeenth birthday either—

- (a) to enable her to remain at school until the end of the school term or year, or
- (b) to enable her to prepare for and take an examination, or
- (c) to enable her to take up some approved course of training.

In no case may a girl receive the benefits of the Bruce Institution after she has attained the age of 19 years.

W. A. JENKINS,

Honorary Secretary to the Governors of the Bruce Institution (offg.).

ARJEELING, THE 5TH MAY 1936.

RESOLUTION—No. 99T.A.I.

Minister-in-charge: The Hon'ble Nawab Sir Mohiuddin Feroqui, Kt., of Ratanpur.

Read—

The Report on the working of the Co-operative Societies in the Presidency of Bengal for the year ending 30th June 1935.

Khan Bahadur A.M. Arshadali was in charge of the Department throughout the year. There was no change in the supervising staff of the Department during the period under review.

2. Unfavourable climatic conditions and the continued economic depression resulted in another year of anxiety and rain. The frozen condition of the agricultural credit movement continued, and collections of both principal and interest in the central banks and primary societies showed a decline on the percentages of the previous year. Loans and deposits from central banks and individuals decreased, and there was a decline in the amount of cash loans issued. There was no scope for the organisation of fresh societies although the embargo on their formation was lifted in January 1935, when sanction was given to a cautious advance under safeguards intended to prevent over-lending and the use of short-term loans for long-term purposes and to ensure increased supervision and a sound investment of reserve funds. Central banks, however, took no advantage of this sanction and generally preferred to aim at the reduction of their commitments. This has been attempted both by the repayment of some part of the loans and deposits falling due and by a reduction of interest charges. Depositors in the

central banks have in many cases agreed to a reduction of the rates payable on their deposits, and it is calculated that these reductions have enabled the central banks to pass on a reduction of interest charges to societies amounting to about Rs. 2·87 lakhs. Societies in turn have in many cases been able to offer still further concessions to members on full payment of their annual demand and some part of the arrear interests, the total effect of which is estimated to be about Rs. 12·5 lakhs. Government notice with satisfaction the attempt made by the Registrar to improve the efficiency of the Departmental activities by the organisation of audit circles and the increased control which he is prepared to exercise over the supervisors of such banks as are willing to place them under his direction.

3. During the year two land mortgage banks were established (at Jessore and Birbhum), bringing up the total to the five mentioned in the last year's resolution. Disappointment has been expressed at the slowness of the progress made by these banks, and the cultivators' response to the facilities offered by them has been surprisingly hesitant. Up to the end of June 1935, applications received averaged for each bank only about two for every three days of the bank's working. There had been 1,599 applications for loans aggregating Rs. 3·99 lakhs, of which 962 had not been examined. Of the remainder 266 or 42 per cent. had been accepted for Rs. 1·04 lakhs; and 65 applicants had actually received Rs. 23,435, more than two-thirds of which was for the redemption of prior debt. Delay is at first inevitable and it is very desirable that progress should be slow and should be consolidated at every step. In Bengal the problems created by the slump in land values and the reduction of the debtor's capacity to repay are enhanced by problems peculiar to the province arising from the existence of co-sharers amongst both the tenants and the landlords and from the provisions of the tenancy law. A very detailed and often laborious enquiry is necessary into title and encumbrances, and it is very desirable to effect such scaling down of debts as can be amicably arranged with the existing creditors. Government note with satisfaction the measure of success achieved in scaling down the debts of applicants to whom loans have been issued in Mymensingh and Pabna. The issue of

debentures to finance the advances made by the banks has not yet been possible pending investigation by the law officers of Government of certain connected legal problems; but there has hitherto been no difficulty in obtaining from the Provincial Co-operative Bank the finance necessary for the loans advanced up to the present. The banks already established are experimental and if, as Government hope, they prove to be sound financially and an effective means of freeing the agricultural population from its burden of debt, further land mortgage banks will be gradually opened throughout the province.

4. Government note with pleasure the report that the non-agricultural credit organisations have maintained a satisfactory position in spite of decreases in loans issued and repayments made and an increase of overdues. Government also notice with satisfaction the report of good work done by relief, rural reconstruction and house-building societies, the satisfactory start made by the Malda Co-operative Sugar Mill, the prospects of success in the later developments of the Badarkhali colonisation scheme and the partial success of artisan and fishermen's societies. They are convinced of the utility of these and other forms of non-credit organisations for which there is considerable scope.

5. During the year Government received a report by Mr. M. L. Darling, C.I.E., I.C.S., an officer of the Government of India, deputed to enquire into

the condition of the co-operative movement in Bengal. As a result of his recommendations Government decided to strengthen the movement by the appointment of an I.C.S. officer as Joint Secretary to Government in this department whose duties are to concentrate on the work of the co-operative department and to advise on questions of policy and by the appointment of a more junior I.C.S. officer as Deputy Registrar. Effect has been given to this decision since the close of the co-operative year 1934-35, and further action has also been taken upon recommendations in Mr. Darling's report which will fall to be commented upon next year.

6. The thanks of Government (Ministry of Agriculture) are due to Khan Bahadur A. M. Arshadali for his administration of the department during yet another year of stress. The Minister in charge also acknowledges with pleasure the assistance rendered to the movement by the various district, sub-divisional and other officers named by the Registrar and by the non-official workers connected with it and places on record his satisfaction with the good work done by departmental officers mentioned by the Registrar.

By order of the Govt. of Bengal

(Ministry of Agriculture),

A. E. PORTER,

Joint Secy. to the Govt. of Bengal.

**DEPARTMENT OF AGRICULTURE,
BENGAL.**

Dacca, the 11th May 1936.

**Third and Final Forecast of the Spring Oilseed
Crops of Bengal, 1935-36.**

Note.—On an average of the five years ending 1933-34, the area under linseed in Bengal has represented some 3·5 per cent. and that under rape and mustard 11·3 per cent. of the total area under these crops in British India.)

Character of the season.—After the issue of the second forecast continued drought caused damage to the crops in parts of West and North Bengal, but conditions were favourable elsewhere notably in the districts of Mymensingh and Faridpur resulting in a slight increase in outturn. On the whole a fair crop was reaped for the province.

Area sown.—Oilseeds are chiefly grown in the Rajshahi, Dacca and Presidency Divisions. In the other two divisions the cultivation is not extensive. The total area under these crops (excepting sesamum for which separate forecasts are issued) is returned at 850,400 as against 892,100 acres last year.

Outturn.—From the District Officers' estimates the provincial outturn of the different oilseed crops works out at 76 per cent. as against 87 per cent. last year.

Taking $7\frac{3}{8}$ ths maunds as the normal yield per acre for linseed, $7\frac{3}{5}$ ths maunds for rape and mustard and $4\frac{1}{4}$ maunds for other oilseeds, the total yield of the crops for the province is estimated at 176,700 tons this year as against 212,200 tons last year.

Dacca, the 12th May 1936.

**Final Forecast of the Wheat Crop of Bengal,
1935-36.**

Note.—On an average of the five years ending 1933-34, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage total wheat acreage in (a) British India and (b) in the territory now reported on has, in the five years ending 1933-34, averaged (a) 41·1 and (b) 10·4 per cent., respectively.)

Character of the season.—At the outset the weather was generally unfavourable owing to drought. Since the issue of the third forecast April last the conditions have practically remained unchanged. A satisfactory outturn

is expected in the districts of Dinajpur, Darjeeling, Rangpur and Faridpur.

Acreage.—According to District Officers' estimates, the total area sown is 127,100 acres this year as against 154,700 acres last year.

Outturn.—The provincial outturn as worked out from the district estimate is 70 per cent. of the normal as against 90 per cent. last year. Taking the normal yield to be 10 maunds per acre, the gross yield of the crop for the province is estimated at 32,700 tons this year as against 51,100 tons last year.

At the end of April the wholesale price of wheat in the Calcutta mart was Rs. 3-7-0 annas per maund or about 6 per cent. higher than the price ruling at the corresponding period of last year. The price of common rice at Calcutta was Rs. 4-8-0 per maund against the same rate last year.

**Resolution on the Annual Report of the Department of Agriculture,
Bengal, for the year 1934-35.**

DEPARTMENT OF AGRICULTURE AND INDUSTRIES.

Agriculture.

DARJEELING, THE 19TH MAY 1936.

RESOLUTION—No. 215 T.A.I.

Minister-in-charge: The Hon'ble Nawab Sir Mohiuddin Farouki, Kt., of Ratanpur.

Read—

The Annual Report of the Department of Agriculture, Bengal, for the year 1934-35.

Administration.—Mr. K. McLean was in charge of the department during the year.

Mr. M. Carbery, Agricultural Chemist, Bengal, went on leave in October 1934 and was succeeded by Babu Gosta Behari Pal, Assistant Agricultural Chemist. In April 1934, Mr. F. Smith, Deputy Director of Agriculture, Eastern Circle, went on leave preparatory to retirement and Rai Sahib J. K. Biswas took over charge of his office.

Messrs. J. N. Sarkar, Deputy Director of Agriculture, Western Circle, A. R. Malik, Deputy Director of Agriculture, Northern Circle, and D. Dutt, Second Economic Botanist, were confirmed in the Bengal Higher Agricultural Service during the year.

In the latter part of the year Mr. A. R. Malik, Deputy Director of Agriculture, Northern Circle, was appointed to be the Senior Marketing Officer in connection with the scheme for the marketing of agricultural produce.

General.—Although the season was on the whole satisfactory for the winter and *rabi* crops and fair for the autumn crops in North and East Bengal, the conditions in parts of West Bengal where the rainfall was insufficient were far from satisfactory. The districts of Burdwan, Birbhum, Bankura, Hooghly and Murshidabad as well as Rajshahi suffered most from drought. Parts of Rajshahi and Murshidabad districts were also affected by floods, while heavy rainfall in the hills of Assam was responsible for the overflowing of the Meghna river system, which caused loss to the standing crops in Eastern Mymensingh and in the Brahmanbaria subdivision of the Tippera district.

During the year a great impetus was given to the propaganda for the restriction of the area under cultivation of jute—the methods employed in the preceding years were considerably improved and intensified and a special officer was appointed for the organisation of propaganda with the assistance of local officials and non-officials. The services of the officers of the department were largely utilised for encouraging the cultivators to grow alternative crops in place of jute and for distributing seed; and a fair measure of success was achieved. The East India Jute Association, Limited, and the Calcutta Hessian Exchange, Limited, contributed Rs. 2,500 and Rs. 2,000, respectively, for the purchase and distribution of seed of alternative crops. District boards also provided funds in this direction, the Rangpur district board in particular contributing Rs. 10,000. The department was responsible for the supply and distribution of the seed in all these cases in addition to the free distribution of a large quantity of sugarcane cuttings sanctioned by Government.

Research and experiment.—In recent years there has been a remarkable expansion in the activities of the research section with funds provided by the Imperial Council of Agricultural Research. Noteworthy among the schemes is that for the improvement of marketing of agricultural produce, the importance of which cannot be over-estimated. Nine other schemes of research were financed by the Council during the year of which three were undertaken at the Universities of Calcutta and Dacca.

With grants from the Indian Central Cotton Committee, two schemes of research on cotton—one for investigation of the possibilities of improving Comilla cotton and the other for investigation into the village consumption of cotton in Bengal—were worked during the year.

The value of sugarcane as a substitute crop for jute is recognised by the cultivators and there is a growing demand for cane by the sugar factories. To secure the cultivation of the departmental types of canes over one crore cuttings were distributed. The demand for departmental types of tobacco increased while the cultivation of *Bidi* types is extending. *Bidi* tobaccos which are now imported from other provinces fetch a good price ranging between Rs. 30 and Rs. 50 per maund. The types grown and cured in this province are approved by manufacturers and there are prospects of extension of the crop. Interesting experiments on flax were conducted with a view to arriving at a process of extraction suitable for local conditions. The Imperial Council of Agricultural Research has been approached for a small grant to enable the work to be carried on a more extensive scale. There has been a heavy demand for groundnut seed, the crop being taken up as an alternative to jute. Some heavy crops have been obtained, 30 maunds and over per acre being a common return. Akola No. 10 has proved a very popular type and a heavy yielder.

Animal husbandry.—Considerable progress was made during the year in the improvement of live-stock in the districts of Malda, Rajshahi, Nadia and Hooghly where live-stock officers were posted—one officer for two districts. The appointment of three extra live-stock officers has been sanctioned by Government.

Fourteen bulls were maintained at the district farms against 15 of the previous year. These bulls covered 1,088 cows against 1,229 for the preceding year. Twenty young bulls were distributed free from the surplus stock of the Dacca Farm. The premium scheme still continues. It has, however, been decided to reduce the amount of premium for each individual premium holder from Rs. 10 to Rs. 5, thus allowing an increased number of owners of bulls to receive the premium and their bulls to come under departmental supervision. The bulls under the premium system covered 2,733 cows against 2,333 cows last year.

In the Animal Nutrition Section results of economic importance have been obtained. It has been found that paddy straw alone is not a maintenance ration and that cattle fed continuously on this alone must eventually die. The addition to the diet of even a small quantity of protein in the shape of linseed cake balances the ration and life is maintained. Another point of interest is that *aus* paddy straw has been found to be of a much higher value than *aman* paddy straw as cattle fodder. Experiments at Dacca have shown that *aus* paddy straw makes excellent silage.

Satisfactory results have been obtained in the Poultry Section at the Dacca Farm towards the improvement of stock both by selection of the pure-bred races of imported Rhode Island Red and the local Chittagong, and by crossing the two breeds. The average number of eggs laid by the Rhode Island Reds has been increased from 50 to 132 per annum, the Chittagongs from 60 to 95, whilst the average of the 5th cross between the two breeds is 125 eggs per annum. The cross bred is a good table bird and an active forager and the average weight of eggs is 2 ozs.

Demonstration and propaganda.—In spite of the limitations imposed by the lack of funds useful work continued to be done on the demonstration and propaganda side by means of numerous lantern lectures in *hats*, exhibitions and fairs and through the medium of wireless talks on agriculture given by departmental officers in Calcutta. The departmental officers also participated in and delivered lectures on agriculture at many of the cinema shows organised by the Government Publicity Department. Besides, a large number of leaflets containing departmental recommendations were issued to the public.

Both the Government and private farms have functioned successfully in their respective spheres as centres of experiment, demonstration and seed multiplication and as centres for the multiplication of departmental seeds and for the demonstration of departmental types and improved methods. Noteworthy progress was made during the year in the introduction of departmental varieties of paddy, jute, tobacco and sugarcane which it is estimated were grown on 598,050, 1,090,257, 7,384 and 130,838 acres, respectively. The quantities of improved varieties of seeds and cuttings distributed during the year were paddy 5,699 mds.; jute 132 mds., sugarcane cuttings 11,878,381 and tobacco seeds 3,754 tolas.

Agricultural Education.—During the year under report fifty-four schools participated in the scheme for instruction in agriculture in High English and Middle English Schools. Government aid had to be withdrawn from three schools, leaving fifty-one schools in number of which twenty-five were High English and twenty-six Middle English Schools. Three thousand and eighty-four students received instruction both in theory and practice, the area under cultivation being 216 acres. The training of *Bhadralok* youths in practical agriculture and in the principles of co-operation at the Faridpur Farm with the object of settlement with them of char land in the district was continued.

Agricultural Engineering.—The Agricultural Engineer continued his work on designing and production of improved machinery. The demonstration sugar factory at Rajshahi worked for the second year and had to be closed down early owing to shortage of supply of sugarcane. A number of *Bhadralok* youths who received instruction in sugar manufacture in the factory have obtained employment in small factories.

Sericulture.—During the year under report the strength of the Sericultural Section was further reduced by 12 posts as a measure of retrenchment.

Owing to general trade depression there has been a further fall in the price of silk. The slump is likely to continue until the economic condition of the people improves.

The work of rearing the indigenous breeds by careful selection in successive generations was continued, special attention being paid to the adaptability of the different stock strains to local conditions. The experiments with foreign univoltines were also continued at Kurseong.

Successful results have generally been obtained by replacing bush mulberry by tree mulberry excepting at Vishnupur, where the dwarf tree and bush plantations have been found to be more satisfactory. Considerable damage was done to the plantations at Malda and Murshidabad by floods, which also prevented the further extension of tree mulberry cultivation.

As a result of propaganda *Eri* rearing is being extended in the Bogra district. The total number of improved rearing houses in Malda was 2,443 of which 60 were improved by the demonstration staff during the year under report. A large number of cases of outbreak of epidemic diseases were checked by preventive measures.

Acknowledgment.—Government in the Ministry of Agriculture are pleased to acknowledge the work done by Mr. McLean; the names of the departmental officers mentioned in the report have also been noted. The thanks of Government are due to Professor P. C. Mahalanobis of the Indian Educational Service for the valuable assistance rendered by him in regard to the statistical examination of experimental data; to the numerous officials and non-officials who helped the department in various ways; and to the members of the Provincial Agricultural Research Committee and other Committees and Boards attached to the Department for the services rendered by them.
